About Global Power

Texas-based Global Power Equipment Group Inc. is a design, engineering and manufacturing firm providing a broad array of equipment and services to the global power infrastructure, energy and process industries. Through its Services Division, the Company provides on-site specialty support and outage management services for commercial nuclear reactors in the United States and maintenance services to fossil and hydroelectric power plants and other industrial operations. Through its Products Division, the Company designs, engineers and manufactures a comprehensive portfolio of equipment for gas turbine power plants and power-related equipment for industrial operations, with over 40 years of power generation industry experience. With a strong competitive position in its product lines, the Company benefits from a large installed base of equipment in domestic and international markets. Additional information about Global Power Equipment Group Inc. may be found at www.globalpower.com.
