Ingram Micro Opens New ITAD Facility in Peru

IRVINE, Calif.--(BUSINESS WIRE)-- Ingram Micro Commerce & Lifecycle Services today announced the opening of its newest IT Asset Disposition (ITAD) Processing Center, located in Lima, Peru. This is the fourth new ITAD facility Ingram Micro has opened this year, and is our third facility in South America, providing a broad range of efficient, safe and secure technology disposition services, including data erasure and drive destruction, processing, remarketing and recycling.

“The addition of our Lima ITAD facility to our current operations in Brazil and Colombia enables us to offer directly-managed services in three of the four most populous countries in South America,” said Todd Zegers, vice president, ITAD, Commerce & Lifecycle Services. “We are committed to providing these necessary and in-demand services for our customers wherever they are located around the world, and plan to announce additional facility openings later this year.”

“The market for ITAD services in South America is strong, and Peru is a strategic expansion for Ingram Micro,” adds Martin Garcia-Brosa, executive director Latin America, Commerce & Lifecycle Services. “We are already taking orders for service through the Lima facility, and we look forward to continuing business growth across the region.”
