Getac Integrates Veritone Redact into Getac Video Suite

Getac Video Suite now includes Veritone Redact, enabling agencies to redact video evidence within the same workflow

IRVINE, Calif., Oct. 21, 2026 /PRNewswire/ -- Getac Technology Corporation ("Getac"), a leading provider of rugged computing and mobile video solutions and a manufacturer with advanced in-house capabilities, today announced the expansion of its partnership with Veritone, a leader in enterprise AI and data solutions, integrating Veritone Redact directly with Getac Video Suite to help public safety agencies streamline the review and redaction of video evidence.

With Veritone Redact integrated in Getac Video Suite, users can redact body-worn camera footage, in-car video and other evidence within the same workflow. Veritone Redact uses AI to help automatically detect and redact heads, license plates, mobile display terminals, screens and other potentially sensitive or personally identifiable information (PII), including spoken PII. Reviewers can verify and adjust redactions, and agencies remain responsible for reviewing all redactions before release. Integration of Veritone Investigate with Getac Video Suite is also in development and is anticipated to be available in early 2027.

"Getac and Veritone share a commitment to giving public safety agencies technology that help save time where it matters most," said Scott Worley, Director of Video Sales, Getac North America. "By building Veritone Redact directly into Getac Video Suite, we're giving agencies a faster path from captured footage to evidence prepared for disclosure, while helping agencies support the privacy protections the public expects."

As video evidence volumes continue to grow, law enforcement agencies face increasing demands to review footage, remove PII and prepare video for public records requests. Manual review and redaction can add significant time to the evidence-release process.

"Agencies don't need another standalone tool to learn; they need AI that works inside the

systems they already rely on," said Jon Gacek, Senior Vice President of Public Sector, Veritone. "Integrating Redact into Getac Video Suite puts automated redaction directly in the evidence workflow, so staff can help protect personal information and release footage faster without switching platforms."

Demonstrations of Getac Video Suite, including the Veritone Redact integration, will be shown at the International Association of Chiefs of Police (IACP) Annual Conference and Exposition, taking place Oct. 24-27 in Orlando. Visit Getac at Booth 1501.

Safe Harbor Statement
This news release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, without limitation, statements regarding the anticipated benefits, capabilities, and performance of the integration of Veritone Redact with Getac Video Suite; the expected impact of the integration on redaction workflows, evidence release, and agency efficiency for public safety agencies;

the planned integration of Veritone Investigate with Getac Video Suite and its anticipated timing; expected customer adoption of and demand for Veritone's public sector offerings; and Veritone's business strategy, partnerships, market position, and growth opportunities. Words such as "anticipates," "believes," "could," "estimates," "expects," "intends," "continue," "can," "may," "plans," "potential," "projects," "seeks," "should," "will," "would" or similar expressions and the negatives of those expressions may identify forward-looking statements. These statements are based on current expectations, estimates, assumptions, and projections and involve known and unknown risks and uncertainties that may cause actual results, performance, or achievements to differ materially from those expressed or implied in such statements. These risks and uncertainties include, but are not limited to, those described in Veritone's filings with the Securities and Exchange Commission, including its most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. Although Veritone believes that the assumptions underlying the forward-looking statements are reasonable, any of the assumptions could prove inaccurate. In light of the significant uncertainties inherent in the forward-looking information included herein, the inclusion of such information should not be regarded as a representation by Veritone or any other person that their objectives or plans will be achieved. Veritone undertakes no obligation to update or revise the forward-looking statements contained herein to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.
