Included in first quarter 2013 was a \$3.2 million, or \$0.05 per diluted share, gain on sale of real estate.

"This quarter we commenced the marketing of our medical office portfolio, and as expected we are seeing strong interest from potential investors. Operationally, we saw an increase in same-store portfolio occupancy from the fourth quarter, particularly in our office sector, and we are hopeful that this is the beginning of a sustainable improvement in our markets," said George F. "Skip" McKenzie, President and Chief Executive Officer of WRIT.

2013 Guidance

Management reiterates its previously announced 2013 Core FFO per fully diluted share guidance of \$1.82 - \$1.90, excluding any acquisition and disposition activity, including the potential Medical Office Division sale.

"First quarter 2013 core FFO was in line with our expectations, though it was below fourth quarter 2012 results. Fourth quarter results included higher expense recoveries and lower incentive compensation, and first quarter results reflected seasonal increases in operating expenses and normalized incentive compensation estimates. We look forward to providing further detail on tomorrow's call," said William T. Camp, Executive Vice President and Chief Financial Officer.

Note: WRIT's press releases and supplemental financial information are available on the company website at www.writ.com or by contacting Investor Relations at (301) 984-9400.

Certain statements in our earnings release and on our conference call are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements involve known and unknown risks, uncertainties, and other factors that may cause actual results to differ materially. Such risks, uncertainties and other factors include, but are not limited to, the potential for federal government budget reductions, changes in general and local economic and real estate market conditions, the timing and pricing of lease transactions, the availability and cost of capital, fluctuations in interest rates, tenants' financial conditions, levels of competition, the effect of government regulation, the impact of newly adopted accounting principles, and other risks and uncertainties detailed from time to time in our filings with the SEC, including our 2012 Form 10-K. We assume no obligation to update or supplement forward-looking statements that become untrue because of subsequent events.

(1) Funds From Operations ("FFO") - The National Association of Real Estate Investment Trusts, Inc. ("NAREIT") defines FFO (April, 2002 White Paper) as net income (computed in accordance with generally accepted accounting principles ("GAAP")) excluding gains (or losses) associated with sales of property, impairment of depreciable real estate and real estate depreciation and amortization. FFO is a non-GAAP measure and does not replace net income as a measure of performance or net cash provided by operating activities as a measure of liquidity. We consider FFO to be a standard supplemental measure for equity real estate investment trusts ("REITs") because it facilitates an understanding of the operating performance of our properties without giving effect to real estate depreciation and amortization, which historically assumes that the value of real estate assets diminishes

predictably over time. Since real estate values have instead historically risen or fallen with market conditions, we believe that FFO more accurately provides investors an indication of our ability to incur and service debt, make capital expenditures and fund other needs.

Core Funds From Operations (“Core FFO”) is calculated by adjusting FFO for the following items (which we believe are not indicative of the performance of WRIT’s operating portfolio and affect the comparative measurement of WRIT’s operating performance over time): (1) gains or losses on extinguishment of debt, (2) costs related to the acquisition of properties, (3) severance expense related to corporate reorganization and related to the CEO’s retirement and (4) property impairments not already excluded from FFO, as appropriate. These items can vary greatly from period to period, depending upon the volume of our acquisition activity and debt retirements, among other factors. We believe that by excluding these items, Core FFO serves as a useful, supplementary measure of WRIT’s ability to incur and service debt and to distribute dividends to its shareholders. Core FFO is a non-GAAP and non-standardized measure and may be calculated differently by other REITs.

(2) Net Operating Income (“NOI”), defined as real estate rental revenue less real estate expenses, is a non-GAAP measure. NOI is calculated as net income, less non-real estate revenue and the results of discontinued operations (including the gain on sale, if any), plus interest expense, depreciation and amortization, general and administrative expenses, acquisition costs and real estate impairment. We provide NOI as a supplement to net income calculated in accordance with GAAP. As such, it should not be considered an alternative to net income as an indication of our operating performance. It is the primary performance measure we use to assess the results of our operations at the property level.

(3) For purposes of evaluating comparative operating performance, we categorize our properties as “same-store” or “non-same-store”. A same-store property is one that was owned for the entirety of the periods being evaluated. A non-same-store property is one that was acquired or placed into service during either of the periods being evaluated.

(4) Funds Available for Distribution (“FAD”) is a non-GAAP measure. It is calculated by subtracting from FFO (1) recurring expenditures, tenant improvements and leasing costs that are capitalized and amortized and are necessary to maintain our properties and revenue stream and (2) straight-line rents, then adding (3) non-real estate depreciation and amortization, (4) amortization of restricted share and unit compensation, and adding or subtracting amortization of lease intangibles, as appropriate. We consider FAD to be a measure of a REIT’s ability to incur and service debt and to distribute dividends to its shareholders. FAD is a non-standardized measure and may be calculated differently by other REITs.

Physical Occupancy Levels by Same-Store Properties (i) and All Properties

Segment	Physical Occupancy			
	Same-Store Properties		All Properties	
	1st QTR 2013	1st QTR 2012	1st QTR 2013	1st QTR 2012
Multifamily	93.8%	95.2%	93.8%	95.2%

Office	85.4%	86.4%	85.4%	86.3%

Retail	92.4%	92.9%	92.4%	92.9%
Overall Portfolio	89.1%	90.2%	88.6%	89.7%

(i) Same-Store properties include all stabilized properties that were owned for the entirety of the current and prior year reporting periods. We consider newly constructed properties to be stabilized when they achieve 90% occupancy. For Q1 2013 and Q1 2012, same-store properties exclude:

Multifamily Acquisitions: none;

Office Acquisition: Fairgate at Ballston;

Medical Office Acquisition: 19500 at Riverside Office Park (formerly Lansdowne Medical Office Building);

Retail Acquisition: none.

Also excluded from Same-Store Properties in Q1 2013 and Q1 2012 are:
