## Disposition and Acquisition Activity

Washington REIT has announced that it has entered into two separate contracts with an institutional buyer to sell all six of its suburban Maryland office buildings totaling approximately 1.2 million square feet for \$240 million dollars. Management expects the first transaction to close late in the second quarter of 2016 and the second transaction to close late in the third quarter of 2016. The Company is also under contract to sell a parcel of land at Dulles Station in Herndon, Virginia.

Washington REIT has one multifamily asset that it expects to place on the market later this year to complete its planned suburban Maryland asset sales. Additionally, it has one suburban office asset currently in the market to evaluate investor interest.

The Company has also signed a contract to acquire Riverside Apartments, an apartment community in Alexandria, Virginia consisting of 1,222 units and on-site density to develop approximately 550 additional units, for \$244.75 million. This acquisition provides a value-add opportunity to renovate approximately 850 units to generate rental growth, and a further opportunity to develop additional density in a desirable submarket with strong employment drivers.

Riverside Apartments consists of three, 15-story buildings over 28 acres of land located half a mile from Metro, near the intersection of Route 1 and the Capital Beltway and in the heart of the dynamic Huntington Metro corridor in Fairfax County, Virginia.

## Expected Debt Repayment

Washington REIT currently plans to pay down approximately \$100 million dollars of net debt in 2016.

## Earnings Guidance

Management reaffirms 2016 Core FFO guidance of \$1.70 to \$1.77 per fully diluted share and

has increased same store NOI guidance to range from flat to 1%.

Washington REIT's 2016 Core FFO guidance is based on a number of factors, many of which are outside its control and all of which are subject to change. Washington REIT may change its guidance during the year as actual and anticipated results vary from these assumptions.

## 2016 Guidance Reconciliation Table

Certain statements in our earnings release and on our conference call are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements in this earnings release preceded by, followed by or that include the words "believe," "expect," "intend," "anticipate," "potential," "project," "will" and other similar expressions. Such statements involve known and unknown risks, uncertainties, and other factors that may cause actual results to differ materially. Such risks, uncertainties and other factors include, but are not limited to, the potential for federal government budget reductions, changes in general and local economic and real estate market conditions, the risk of failure to complete contemplated acquisitions and dispositions, the timing and pricing of lease transactions, the availability and cost of capital, fluctuations in interest rates, tenants' financial conditions, levels of competition, the effect of government regulation, the impact of newly adopted accounting principles, and other risks and uncertainties detailed from time to time in our filings with the SEC, including our 2015 Form 10-K and subsequent Quarterly Reports on Form 10-Q. We assume no obligation to update or supplement forward-looking statements that become untrue because of subsequent events.

(1) Funds From Operations ("FFO") - The National Association of Real Estate Investment Trusts, Inc. ("NAREIT") defines FFO (April, 2002 White Paper) as net income (computed in accordance with generally accepted accounting principles ("GAAP")) excluding gains (or losses) associated with sales of property, impairment of depreciable real estate and real estate depreciation and amortization. FFO is a non-GAAP measure and does not replace net income as a measure of performance or net cash provided by operating activities as a measure of liquidity. We consider FFO to be a standard supplemental measure for real estate investment trusts ("REITs") because it facilitates an understanding of the operating performance of our properties without giving effect to real estate depreciation and amortization, which historically assumes that the value of real estate assets diminishes predictably over time. Since real estate values have instead historically risen or fallen with market conditions, we believe that FFO more accurately provides investors an indication of our ability to incur and service debt, make capital expenditures and fund other needs.

Core Funds From Operations ("Core FFO") is calculated by adjusting FFO for the following items (which we believe are not indicative of the performance of Washington REIT's operating portfolio and affect the comparative measurement of Washington REIT's operating performance over time): (1) gains or losses on extinguishment of debt, (2) expenses related to acquisition and structuring activities, (3) executive transition costs and severance expense related to corporate reorganization and related to executive retirements or resignations, (4)

property impairments and gains or losses on sale not already excluded from FFO, as appropriate, and (5) relocation expense. These items can vary greatly from period to period, depending upon the volume of our acquisition activity and debt retirements, among other factors. We believe that by excluding these items, Core FFO serves as a useful, supplementary measure of Washington REIT's ability to incur and service debt and to distribute dividends to its shareholders. Core FFO is a non-GAAP and non-standardized measure and may be calculated differently by other REITs.

(2) Net Operating Income ("NOI"), defined as real estate rental revenue less real estate expenses, is a non-GAAP measure. NOI is calculated as net income, less non-real estate revenue and the results of discontinued operations (including the gain on sale, if any), plus interest expense, depreciation and amortization, general and administrative expenses, acquisition costs, real estate impairment and gain or loss on extinguishment of debt. We also present NOI on a cash basis ("cash NOI") which is calculated as NOI less the impact of straight-lining of rent and amortization of market intangibles. We provide NOI as a supplement to net income calculated in accordance with GAAP. As such, it should not be considered an alternative to net income as an indication of our operating performance. It is the primary performance measure we use to assess the results of our operations at the property level.

(3) For purposes of evaluating comparative operating performance, we categorize our properties as "same-store" or "non-same-store". A same-store property is one that was owned for the entirety of the periods being evaluated and excludes properties under redevelopment or development and properties purchased or sold at any time during the periods being compared. A non-same-store property is one that was acquired, under redevelopment or development, or placed into service during either of the periods being evaluated. We define redevelopment properties as those for which we expect to spend significant development and construction costs on existing or acquired buildings pursuant to a formal plan which has a current impact on operating results, occupancy and the ability to lease space with the intended result of a higher economic return on the property. Properties under redevelopment or development are included within the non-same-store properties beginning in the period during which redevelopment or development activities commence. Redevelopment and development properties are included in the same-store pool upon completion of the redevelopment or development, and the earlier of achieving 90% occupancy or two years after completion.

(4) Funds Available for Distribution ("FAD") is a non-GAAP measure. It is calculated by subtracting from FFO (1) recurring expenditures, tenant improvements and leasing costs, that are capitalized and amortized and are necessary to maintain our properties and revenue stream (excluding items contemplated prior to acquisition or associated with development / redevelopment of a property) and (2) straight line rents, then adding (3) non-real estate depreciation and amortization, (4) non-cash fair value interest expense and (5) amortization of restricted share compensation, then adding or subtracting the (6) amortization of lease intangibles, (7) real estate impairment and (8) non-cash gain/loss on extinguishment of debt, as appropriate. FAD is included herein, because we consider it to be a measure of a REIT's ability to incur and service debt and to distribute dividends to its shareholders. FAD is a non-GAAP and non-standardized measure, and may be calculated differently by other REITs.

**Physical Occupancy Levels by Same-Store Properties (i) and All Properties**

Segment	Physical Occupancy							
	Same-Store Properties				All Properties			
	1st QTR 2016		1st QTR 2015		1st QTR 2016		1st QTR 2015

Office	90.6	%	90.5	%	87.8	%	86.7	%
Retail	91.2	%	95.4	%	91.2	%	94.7	%
Overall Portfolio	91.7	%	92.5	%	90.6	%	89.5	%

(i) Same-store properties include all stabilized properties that were owned for the entirety of the current reporting period and the prior year, and exclude properties under redevelopment or development and properties purchased or sold at any time during the periods being compared. We define redevelopment properties as those for which we expect to spend significant development and construction costs on existing or acquired buildings pursuant to a formal plan which has a current impact on operating results, occupancy and the ability to lease space with the intended result of a higher economic return on the property. Redevelopment and development properties are included in the same-store pool upon completion of the redevelopment or development, and the earlier of achieving 90% occupancy or two years after completion. For Q1 2016 and Q1 2015, same-store properties exclude:

Also excluded from same-store properties in Q1 2016 and Q1 2015 are:
