Second Quarter 2015 Results: Net Investment Income for the quarters ended March 31, 2015 and December 31, 2014, were each \$3.7 million, or \$0.18 per share. Total investment income increased by 5.7% quarter over quarter primarily due to a higher weighted average principal balance outstanding on our interest bearing investment portfolio during the three months ended March 31, 2015, when compared to the three months ended December 31, 2014, or \$334.6 million compared to \$283.0 million, respectively. This was partially offset by an increase in interest expense quarter over quarter due to a higher outstanding balance throughout the period on our credit facility.

Net Asset Value per common share for the quarter ended March 31, 2015 increased to \$9.55, compared to \$9.31, from the December 31, 2014 quarter. The quarter over quarter increase is primarily due to a net increase of \$6.5 million in net unrealized appreciation on investments during the period resulting from an increase in financial and operational performance of certain portfolio companies.

Subsequent Events: Subsequent to March 31, 2015, the following significant events occurred:

- **Portfolio Activity:** Received \$3.3 million in scheduled and unscheduled principal repayments from existing portfolio companies, including \$3.0 million from the sale of a syndicated second lien debt investment.
