Cemtrex Launches Next Generation SmartDesk for Laptop Users

State-of-the-Art SmartDesk Connect Includes 4K UHD Monitors, Sit-Stand Desk, Ergonomic Tabletop & Built-In Wireless Phone Charger

Brooklyn, NY, Dec. 17, 2020 (GLOBE NEWSWIRE) -- — [Cemtrex Inc.](#) (NASDAQ: CETX, CETXP, CETXW), a technology company driving innovation in Internet of Things (IoT), security, machine vision & artificial intelligence, and augmented & virtual reality, today unveiled its new SmartDesk, the [SmartDesk Connect](#). The SmartDesk Connect is an advanced workstation that includes 4K UHD monitors, a sit-stand desk, ergonomic tabletop, with built-in wireless phone charger, all powered by a user's laptop when connected to the SmartDesk.

The product is an evolution of the Company's original SmartDesk, which is an advanced workstation that includes a powerful Windows 10 machine. This new SmartDesk Connect provides much of the same features but allows users to use their own laptop instead of a built-in PC. This allows the product to work with both Windows and MacOS.

The Company is expected to start taking orders on the product in January and shipping of units planned to start approximately four to eight weeks thereafter. The Company will be manufacturing the SmartDesk Connect in New York, from imported parts. The SmartDesk Connect will be available for purchase at \$2299, with shipping and installation included.

"Today is an important milestone for Cemtrex as we launch our next generation SmartDesk that encompasses new capabilities for today's enterprise and retail consumers," said Cemtrex's CEO, Saagar Govil. "Now more than ever in today's Covid-19 landscape, delivering a Mac and Windows agnostic solution, whether for remote workers to bolster their home office setup or for enterprises looking to modernize their work environment, is paramount and something that our customers have expressed an interest in. I am also happy to report that the SmartDesk Connect will be made in the USA and we are proud to bring additional jobs to the NYC Metro area in the months and years to come," concluded Govil.
