Huntsman Releases Third Quarter 2010 Results

STRONG THIRD QUARTER ADJUSTED EBITDA RESULTS OF \$273 MILLION AND ADJUSTED EPS OF \$0.34; IMPROVED GLOBAL DEMAND AND HIGHER AVERAGE SELLING PRICES

THE WOODLANDS, Texas, Nov. 4, 2010 /PRNewswire-FirstCall/ --

Third Quarter 2010 Highlights

- Revenues for the third quarter of 2010 were \$2,401 million, an increase of 16% compared to \$2,075 million for the same period in 2009 and an increase of 2% compared to \$2,343 million for the second quarter of 2010.
- Adjusted EBITDA for the third quarter of 2010 was \$273 million compared to \$205 million for the same period in 2009 and \$257 million for the second quarter of 2010.
- Adjusted net income for the third quarter of 2010 was \$83 million or \$0.34 per diluted share. This compares to adjusted net loss of \$48 million or \$0.21 loss per diluted share for the same period in 2009 and adjusted net income of \$75 million or \$0.31 per diluted share for the second quarter of 2010.
- Net income attributable to Huntsman Corporation (NYSE: HUN) for the third quarter of 2010 was \$55 million or \$0.23 per diluted share. This compares to net loss attributable to Huntsman Corporation of \$68 million or \$0.29 loss per diluted share for the same period in 2009 and \$114 million of income or \$0.47 per diluted share for the second quarter of 2010.

Recent Highlights

- Effective August 4, 2010, Sir Robert Margetts was appointed as a new director to our Board of Directors. Sir Robert currently serves as Chairman of Ensus Limited, the Energy Technologies Institute, and Ordnance Survey, and serves as Non-Executive Director of Wellstream Holdings PLC and Falck Renewables PLC. He was previously Chairman of Legal & General Group PLC and BOC Group PLC. Sir Robert worked for ICI PLC in various levels of increasing responsibility since 1969, where he ultimately served as the Vice Chairman of its Main Board until 2000.
- On September 24, 2010, we completed our \$350 million offering of senior subordinated notes due 2021 which carry an interest rate of 8 5/8%. We used the net proceeds of the offering to purchase euro 132 million (approximately \$177 million equivalent) of our 6 7/8% senior subordinated notes due 2013 and \$159 million of our 7 7/8% senior subordinated notes due 2014.
- On October 28, 2010, we priced an issuance of an additional \$180 million senior subordinated notes due 2021 at an effective yield of approximately 7 1/4%. The closing is expected to occur on November 12, 2010. We expect to use the net proceeds from the offering to redeem all \$188 million of our outstanding 7 7/8% senior subordinated notes due 2014. In connection with the redemption, we expect to record charges of approximately \$7 million in the fourth quarter related to the early extinguishment of this debt.

Peter R. Huntsman, our President and CEO, commented:

"I am very pleased with our earnings in the third quarter, 2010. We have seen a continuous recovery in global demand for all of our products and margins are increasing in most product lines. We have previously used 2007 as a benchmark for a normalized demand environment. In the third quarter our total company sales volumes exceeded the same period volume in 2007, however, with a very different product and geographic profile. As our global focus is on the further development of our specialty products, we continue to see many opportunities for growth."

Three Months Ended September 30, 2010 Compared to Three Months Ended September 30, 2009

Revenues for the three months ended September 30, 2010 increased to \$2,401 million from \$2,075 million for the same period in 2009. For the three months ended September 30, 2010, Adjusted EBITDA was \$273 million compared to \$205 million for the same period in 2009.

Polyurethanes

The increase in revenues in our Polyurethanes division for the three months ended September 30, 2010 compared to the same period in 2009 was primarily due to higher sales prices and higher sales volumes. Average selling prices for MDI increased in response to higher raw material costs while average selling prices for MTBE decreased as a result of increased industry supply. MDI sales volumes increased as a result of improved demand in all regions and across all major sectors with the exception of appliances, while PO/MTBE sales volumes increased generally due to improved demand. The decrease in Adjusted EBITDA was primarily due to lower contribution margins from higher raw material costs and higher manufacturing costs.

Performance Products

The increase in revenues in our Performance Products division for the three months ended September 30, 2010 compared to the same period in 2009 was due to higher average selling prices and higher sales volumes. Average selling prices increased across all product groups primarily in response to higher raw materials costs and strong market conditions, partially offset by the strength of the U.S. dollar against major European currencies. Sales volumes increased primarily due to higher demand across almost all product groups and additional sales of certain products previously produced under tolling arrangements. The increase in Adjusted EBITDA was primarily due to higher contribution margins and higher sales volumes partially offset by higher manufacturing and selling, general and administrative costs.

Advanced Materials

The increase in revenues in our Advanced Materials division for the three months ended September 30, 2010 compared to the same period in 2009 was due to higher sales volumes and higher average selling prices. Sales volumes increased in the Americas and Asia-Pacific regions while volumes decreased in Europe primarily in our base resin business as a result of less material available. Average selling prices increased in our specialty components and base resins business primarily in response to higher raw material costs and reduced product availability in the epoxy resin business, partially offset by lower average selling prices in our formulations business primarily as a result of changes in our product mix and competitive market pressure. The increase in Adjusted EBITDA was primarily due to higher sales volumes and higher contribution margins.

Textile Effects

The increase in revenues in our Textile Effects division for the three months ended September 30, 2010 compared to the same period in 2009 was due to higher average selling prices and higher sales volumes. Average selling prices increased primarily due to favorable changes in product mix partially offset by the strength of the U.S. dollar against major European currencies. Sales volumes increased across all regions and within apparel and home textiles as well as specialty textiles. The increase in Adjusted EBITDA was primarily due to lower manufacturing and selling, general and administrative costs, higher contribution margins and higher volumes.

Pigments

The increase in revenues in our Pigments division for the three months ended September 30, 2010 compared to the same period in 2009 was due to higher average selling prices and higher sales volumes. Average selling prices increased primarily as a result of price increase initiatives in all regions of the world partially offset by the strength of the U.S. dollar against major European currencies. Sales volumes increased primarily due to recovery in global demand most notably in Europe and Asia Pacific. The increase in Adjusted EBITDA in our Pigments division was primarily due to higher contribution margins and higher sales volumes.

Corporate, LIFO and Other

Corporate, LIFO and other includes unallocated foreign exchange gains and losses, unallocated corporate overhead, loss on our accounts receivable securitization program, income (expenses) associated with the terminated merger with Hexion and related litigation, loss on early extinguishment of debt, income (loss) attributable to non-controlling interests, unallocated restructuring costs, LIFO inventory valuation reserve adjustments and non-operating income and expense. Adjusted EBITDA from Corporate, LIFO and Other decreased by \$9 million to a loss of \$45 million for the three months ended September 30, 2010 compared to a loss of \$36 million for the same period in 2009. The change resulted primarily from increased legal and other general expenses.

Income Taxes

During the three months ended September 30, 2010, we recorded income tax expense of \$41 million compared to \$68 million of income tax expense in the same period of 2009. Our adjusted effective tax rate for the third quarter of 2010 was approximately 28%. We have

tax valuation allowances in countries such as Switzerland and the United Kingdom where our Textile Effects and Pigments businesses have meaningful operations. As these businesses return to greater levels of profitability we expect these tax valuation allowances to eventually be removed. In the meantime, we expect our income tax rate to be fairly volatile. We expect our long term effective income tax rate to be approximately 35%.

Unusual income tax rates caused by valuation allowances have no impact on our cash taxes. During the third quarter of 2010 we paid \$9 million in cash for income taxes. We expect our cash tax rate to continue to be less than our effective income tax rate.

Liquidity, Capital Resources and Outstanding Debt

As of September 30, 2010, we had \$1,471 million of combined cash and unused borrowing capacity compared to \$2,510 million at December 31, 2009. The decrease from year end was primarily attributable to an increase in primary working capital of \$441 million, the net reduction in unused bank credit facilities of \$385 million, the repurchase of convertible notes of \$382 million and the repayment of \$295 million of bank term debt (including \$110 million of repayments funded by insurance proceeds received). On September 30, 2010 we increased the amount of revolving commitments available under our revolving credit facility from \$225 million to \$290 million. There are no outstanding borrowings under this revolving credit facility.

Beginning January 1, 2010, as a result of changes in accounting guidelines outstanding borrowings related to the sales of accounts receivable under our accounts receivable programs are accounted for as secured borrowings. Excluding the impact of this change, our primary working capital (accounts receivable, inventory and accounts payable) increased \$441 million primarily due to increased sales volumes and higher prices partially offset by the strength of the U.S. dollar against major European currencies. Total capital expenditures, net of reimbursements from insurance settlements, other settlement and contributions from noncontrolling shareholders in consolidated subsidiaries of nil were \$54 million during the third quarter of 2010 compared to \$40 million for the same period in 2009. We expect to spend between \$200 and \$225 million on capital expenditures in 2010 net of reimbursements.

Beginning July 1, 2010 we began consolidating our ethylenamines manufacturing 50% joint venture located in Jubail, Saudi Arabia. Previously it was accounted for under the equity method during its developmental stage. Trial production began in the second quarter of 2010 and from July 2010, generated meaningful revenue from the sale of production. The facility has the capacity to produce approximately 60 million pounds of product annually. As a result of the consolidation, \$199 million of total debt has been recognized on the balance sheet which is nonrecourse to Huntsman Corporation.

On September 24, 2010, we completed our \$350 million offering of senior subordinated notes due 2021 which carry an interest rate of 8 5/8%. We used the net proceeds of the offering to purchase approximately euro 132 million (approximately \$177 million equivalent) of our 6 7/8% senior subordinated notes due 2013 and \$159 million of our 7 7/8% senior subordinated notes due 2014. In November 2010, we expect to redeem the remaining \$188 million of our outstanding 7 7/8% senior subordinated notes due 2014 with proceeds from the issuance of additional notes. In the fourth quarter we expect to record approximately \$13 million in total charges related to early extinguishment of debt.

Below is our outstanding debt:

(a) Effective January 1, 2010, as a result of changes in accounting guidelines, our off-balance sheet accounts

receivable securitization programs are now reported on balance sheet as secured debt. December 31, 2009

figures are presented on a pro-forma basis to reflect this change.

(b) We used cash to redeem \$159 million of senior subordinated notes due 2014 on October 10, 2010

(c) Beginning July 1, 2010, we began consolidating our Saudi Arabian ethyleneamines manufacturing joint venture,

the financing of which is nonrecourse to Huntsman.

(1) We use EBITDA and Adjusted EBITDA to measure the operating performance of our business. We also provide Adjusted EBITDA from discontinued operations, Adjusted net income and Adjusted net income from discontinued operations because we feel they provide meaningful insight for the investment community into the performance of our business. We believe that net income (loss) attributable to Huntsman Corporation is the performance measure calculated and presented in accordance with generally accepted accounting principles in the U.S. ("GAAP") that is most directly comparable to EBITDA, Adjusted EBITDA and Adjusted net income. We believe that income (loss) from discontinued operations is the performance measure calculated and presented in accordance with GAAP that is most directly comparable to Adjusted EBITDA from discontinued operations and Adjusted net income from discontinued operations. Additional information with respect to our use of each of these financial measures follows:

EBITDA is defined as net income (loss) attributable to Huntsman Corporation before interest, income taxes, and depreciation and amortization. EBITDA as used herein is not necessarily comparable to other similarly titled measures of other companies. The reconciliation of EBITDA to net income (loss) attributable to Huntsman Corporation is set forth in the operating results table above.

Adjusted EBITDA is computed by eliminating the following from EBITDA: gains and losses from discontinued operations; restructuring, impairment and plant closing (credits) costs; income and expense associated with the terminated merger and related litigation; acquisition related expenses; losses on the sale of accounts receivable to our securitization program; unallocated foreign currency (gain) loss; certain legal and contract settlements; losses from early extinguishment of debt; extraordinary loss (gain) on the acquisition of a business; and loss (gain) on disposition of business/assets. The reconciliation of Adjusted EBITDA to EBITDA is set forth in the Reconciliation of Adjustments table above.

Adjusted EBITDA from discontinued operations is computed by eliminating the following from income (loss) from discontinued operations: income taxes; depreciation and amortization; restructuring, impairment and plant closing (credits) costs; losses on the sale of accounts receivable to our securitization program; unallocated foreign currency (gain) loss; gain on fire insurance settlement; and (gain) loss on disposition of business/assets. The following table provides a reconciliation of Adjusted EBITDA from discontinued operations to income (loss) from discontinued operations:
