RISK MANAGEMENT

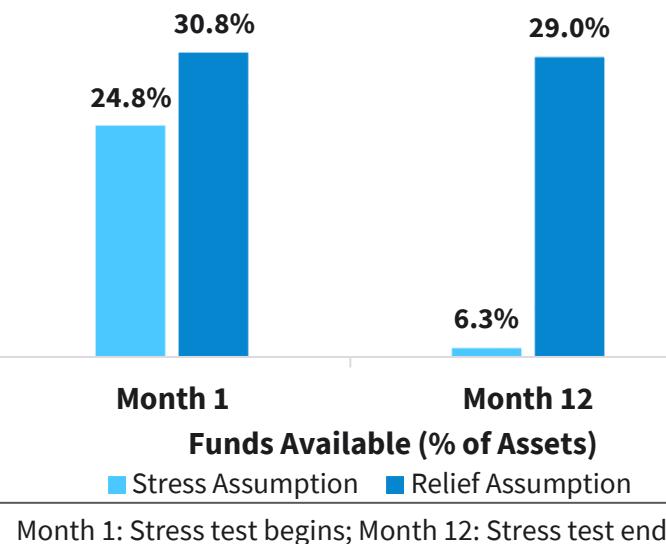

CRE Concentration

Hanmi has not exceeded the supervisory criteria to be considered to have CRE concentration risk under regulatory guidance⁽¹⁾; however, Hanmi's risk management practices address the six elements of regulatory guidance⁽²⁾

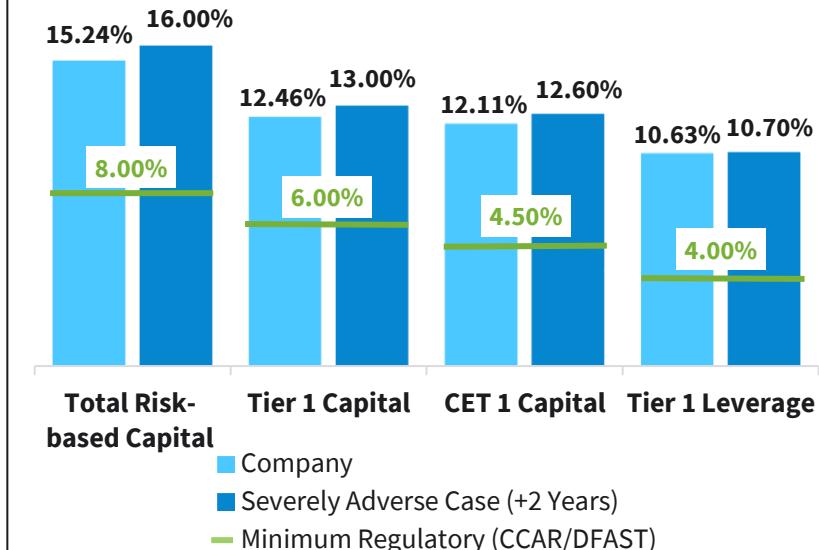

Liquidity Stress Test

Hanmi's risk management practices include comprehensive contingency funding plans intended to plan for funding needs in scenarios of liquidity shortfall. Management performs the test quarterly. The recent stress test indicates that the Bank could withstand a severe stress⁽³⁾ scenario and remain above policy minimums

Capital Stress Test

Hanmi is not required to perform a capital stress test; however, Hanmi's risk management practices include an annual capital stress test for the Company and the Bank using applicable CCAR assumptions⁽⁴⁾

(1) Source: FDIC Financial Institution Letters (FIL-64-2023), as of December 18, 2023; also total ADC (Acquisition, Development, and Construction) loans are well below 100% of Bank's total capital for all periods presented

(2) Six elements of regulatory guidance – (1) maintain strong capital levels, (2) ensure that credit loss allowances are appropriate, (3) manage construction and development (C&D) and CRE loan portfolios closely, (4) maintain updated financial and analytical information, (5) bolster the loan workout infrastructure, (6) maintain adequate liquidity and diverse funding sources

(3) Liquidity stress test based on deposits at December 31, 2024. Severe stress scenario makes the following stress assumptions: (a) 22% deposit outflow over 12 months, (b) Bank unable to replace wholesale deposits, and (c) federal fund lines cut off, and the following relief assumptions: (a) loan-and-securities based FHLB capacity adjusted down for increased haircut, and (b) Bank's assets (loans) are sold to abate the liquidity crisis. Under "Stress Assumption", funds available represent cash, securities, and borrowing capacity from FHLB. Under "Relief Assumption", funds available represent funds under "Stress Assumption" and cash proceeds from loans sale

(4) Capital ratios at December 31, 2024 for the Company. 2025 CCAR makes the following assumptions: (a) trough real GDP growth declining by 8.9%, (b) peak unemployment rate reaching 10.0%, (c) housing prices declining by 33.0%, and (d) CRE valuations declining by 30.0%

4Q25 HIGHLIGHTS

Earnings Performance

- Net income was \$21.2 million, or \$0.70 per diluted share, down 3.7% from the third quarter due to lower noninterest income of \$1.6 million primarily related to bank owned life insurance. While noninterest expense increased \$1.8 million due to higher salaries and professional fees, this was offset by an increase in net interest income of \$1.8 million driven by lower cost of deposits.
- Net interest income continued to grow, increasing 2.9% from the prior quarter due to lower interest expense as the average rate on interest-bearing deposits declined 20 basis points. Although the yield on average loans declined by nine basis points, the average loan balance increased 2.4%. This resulted in another quarter of net interest margin expansion (taxable equivalent) of six basis points to 3.28%.

Loans and Deposits

- Loans receivable increased to \$6.56 billion up 0.5% from the end of the prior quarter. Loan production was \$374.8 million, with a weighted average interest rate of 6.90% compared to the weighted average interest rate of 6.46% for payoffs.
- Deposits were \$6.68 billion, down 1.3% from the prior quarter, however noninterest-bearing demand deposits demonstrated the stability of the customer base, representing 30.2% of total deposits.

Asset Quality

- Asset quality remained strong as nonperforming assets to total assets was 0.26%, an improvement of one basis point from the prior quarter. Nonperforming loans to total loans was 0.28%, an improvement of two basis points from the prior quarter and credit loss expense was \$1.9 million, compared to \$2.1 million in the prior quarter.
