

INNOVATION SAVING LIVES

Annual Report & Accounts For the year ended 30 September 2017 We are a biotechnology company with a proprietary biomarker discovery platform, *EpiSwitch™*, based on the latest advances in gene expression, non-coding RNA and epigenetics.

OUR MISSION

Our vision is to make a significant impact on health services around the world through the adoption of our biomarker discovery platform, *EpiSwitch™*.

We aim to be at the forefront of the personalised medical revolution by using *EpiSwitch™* biomarkers for disease detection, prognostic testing and screening for drug responses in patient healthcare.

OUR VALUES

INNOVATIVE Saving lives by producing high quality *EpiSwitch™* biomarkers.

PIONEERING

Willing to explore and adapt to new ideas and changes.

ACHIEVING EXCELLENCE

Adhering to good working practice and quality procedure compliance.

DIVERSE

Respecting others and encouraging a diverse work environment.

PROFESSIONAL

Maintaining a high standard of work and professionalism.

CAUTIONARY STATEMENT

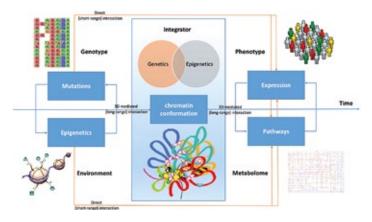

Sections of this annual report, including but not limited to the Directors' report, the Strategic report and the Remuneration report may contain forward-looking statements with respect to certain of the plans and current goals and expectations relating to the future financial condition, business performance and results of the Company. These have been made by the Directors in good faith using information available up to the date on which they approved this report. By their nature, all forward-looking statements involve risk and uncertainty because

they relate to future events and circumstances that are beyond the control of the Company and depend upon circumstances that may or may not occur in the future. There are a number of factors that could cause actual future financial conditions, business performance, results or developments of the Company to differ materially from the plans, goals and expectations expressed or implied by these forwardlooking statements and forecasts. Nothing in this document should be construed as a profit forecast.

CHROMOSOME CONFORMATION SIGNATURES

The science behind *EpiSwitch™*

The dictionary definition of epigenetics is "a stably heritable phenotype resulting from changes in a chromosome without alterations in the DNA sequence": put simply, this means that the way chromosomes are arranged within a cell has an effect on what that cell does, and that this characteristic can be passed on. Studying this phenomenon involves looking at the functional consequences of alterations in genomic organization in 3-dimensional space. This represents a dramatic departure from earlier reductionist thinking, which viewed the genome in a purely linear sense. It also places a larger emphasis on understanding the role of intergenic regions of DNA in regulating how chromosomes are arranged in 3-dimensional space, or "chromosome conformations".

Chromosome conformations as integrators of biological signals. (Image from Tordini et al., Frontiers in Genetics, 15 Nov 2016)

OBD's *EpiSwitch™* technology provides a simple, rapid and reproducible readout of chromosome conformations: *EpiSwitch™* is a proprietary industrial platform for the discovery, evaluation, validation and monitoring of a novel class of epigenetic biomarkers known as 'chromosome conformation signatures' ("CCSs"). CCSs can provide a compelling, stable framework from which changes in the regulation of a genome can be analysed, long before the results of these epigenetic changes manifest themselves as obvious abnormalities. The application of *EpiSwitch™* to clinical samples gives investigators in translational medicine a powerful tool to aid in the stratification of complex physiological phenotypes, helping with the understanding of disease onset and progression, planning drug development programs, and patient stratification in pre-clinical and clinical settings.

EpiSwitch™ biomarkers based on CCSs are a critical cog in personalised medicine: technology to select the right drug at the right dose at the right time for the right patient.

For more background on the science behind OBD's *EpiSwitch™* technology, visit our website **www.oxfordbiodynamics.com**

HIGHLIGHTS

CORPORATE AND OPERATIONAL HIGHLIGHTS

 Successful Initial Public Offering ("IPO") and placing on AIM raising gross proceeds of £20.0m, including gross growth capital of £7.1m.

Commercial collaborations and development agreements

- Development agreement entered into with two of the top 10 global pharmaceutical companies collaborating to develop an anti PD-L1 therapy.
- Collaboration with five other consortium members in the BIO-FLARE study, using *EpiSwitch™* to help identify factors that trigger disease relapses in rheumatoid arthritis.
- Innovative pilot biomarker discovery project initiated to analyse the effects of fitness regimes using the *EpiSwitch™* platform.
- Exclusive Asia licence signed for *EpiSwitch™* to supply its proprietary products and reagents for the potential use in a non-invasive blood test to assist in the diagnosis of breast cancer.
- Expansion of OBD's Amyotrophic Lateral Sclerosis ("ALS") biomarker programme in South East Asia, supported by Innovate UK.

Industry recognition and Intellectual Property

- Peer reviewed paper of OBD's collaborative work with the Cancer Science Institute of Singapore published in the journal *Nature (Scientific Reports)*.
- EpiSwitch[™] data presented at several prestigious conferences including the American Society of Hematology (San Diego), 2nd Biomarker Conference (San Diego), 12th Annual Biomarker Congress (Manchester) and The Lancet Neurology Conference (London).
- Two new patents filed covering the use of the *EpiSwitch™* technology, adding to the Company's established patent family.

Personnel

- David Williams and Stephen Diggle joined the Board in October 2016 as Non-Executive Chairman and Non-Executive Director respectively; Paul Stockdale was appointed as Chief Financial Officer in September 2017, succeeding Katie Long.
- Dr Claudio Carini appointed as an adviser to the Company, and as a member of the Company's Scientific Advisory Panel.
- OBD and Dr Claudio Carini joined the Foundation for the National Institutes of Health Biomarkers Consortium Steering Committees.

Financial highlights

- Revenue of £1.2m (FY16: £1.1m).
- Operating loss of £4.0m (FY16: £2.3m) and adjusted operating loss of £2.5m (FY16: £1.9m) before IPO costs of £1.5m (FY16: £0.4m).
- Cash of £10.8m as at 30 September 2017 (FY16: £7.3m).
- Net assets of £11.6m (FY16: £7.7m).

Post-period end

- Two collaborations with a major US biopharmaceutical company to identify new targets and biomarkers relating to fibrotic mechanisms and predictive biomarkers for immuno-oncology therapeutics.
- Grant of a key patent covering the *EpiSwitch™* platform technology in the US, and two further patents filed shortly after the year end.
- Second fitness-related collaboration, to develop non-invasive epigenetic biomarkers associated with sports-related concussions.
- *EpiSwitch™* data presented the Annual Northeast ALS Consortium Conference (Clear Beach, Florida), the NIH Biomarker Consortium Cancer Steering Committee Annual Symposium (Washington, DC) and the Diabetes Asia 2017 Conference (Kuala Lumpur).

CHIEF EXECUTIVE OFFICER'S REVIEW

Introduction

The year ended 30 September 2017 was a pivotal one for Oxford BioDynamics, with continued scientific progress, growing commercial momentum and the successful completion of its Initial Public Offering ("IPO") and listing on the London Stock Exchange's AIM Market ("AIM"). We have seen significant progress toward our strategic goal: making OBD's *EpiSwitch™* technology the leading industry standard for epigenetic biomarkers for the pharmaceutical and biotechnology industry.

IP0

The Company listed on AIM in December 2016, successfully raising £20.0m of gross proceeds, from both existing investors and a number of well known and highly regarded UK-based institutional investors. Of the £20.0m raised, £12.9m was provided to selling shareholders, and £7.1m was allocated to growth capital to enable the Company to accelerate its growth strategy. The Board is focused on three main areas: increasing the number of proprietary biomarker projects undertaken; ongoing development of OBD's increasingly recognised and important IP portfolio; and establishing US representation to increase the Group's commercial reach within the US.

Commercial progress

During the year, OBD entered into or completed biomarker discovery contracts with several customers, including five of the top 30 global pharmaceutical and biotech companies by revenue¹, in diverse fields including cancer, neurodegenerative diseases, immunotherapy, rheumatoid arthritis, lung fibrosis and breast cancer, as well as non-clinical applications such as fitness training prognostics. In Asia, the Group entered into a licensing agreement for the use of products and reagents provided through the *EpiSwitch*TM platform for a potential blood test to diagnose breast cancer. Post the period end, in January 2018, the Company signed a second collaboration with a major US biopharmaceutical company to extend its development of predictive biomarkers for immune-oncology ("IO") therapies, representing OBD's fourth IO collaboration since 2016.

The Company made further excellent progress with its intellectual property portfolio. Most importantly, post-year end in October 2017, the Company announced the grant of a key patent covering its proprietary *EpiSwitch*TM technology in the US. Several of OBD's ten further patent families advanced during the period: two patents were filed during the period, two more were filed shortly after the year end, and the *EpiSwitch*TM trademark was granted in the US.

Scientific progress

The Company has continued to develop its proprietary $EpiSwitch^{TM}$ technology, adding more advanced, higher capacity technology to its ISO-certified laboratory in Oxford.

In the wider scientific community, we continue to see increasingly broad acceptance of the critical importance of 3-dimensional chromatin conformations in integrating external environmental stimuli and cellular responses, to produce the phenotypic effects seen in both healthy and diseased states. During the year, multiple research studies and reviews were published in the leading peer reviewed journals, including *Science* and *Nature*, providing further evidence of the importance of the links between changes in chromatin structure and cellular function.

Among US pharma and biotech R&D groups the awareness of genome architecture, related biomarkers and their value has significantly increased.

OBD has continued to collaborate with respected academic institutions and other partners and to present its work at several high-profile conferences, including at the National Institutes for Health Foundation Biomarker Consortium Cancer Steering Committee Annual Symposium and the American Society of Hematology Annual Meeting.

Summary and outlook

The year to 30 September 2017 saw significant development by the Group: scientifically, commercially and financially. Over the next year, we will continue to develop our proprietary *EpiSwitch*TM technology, with plans for increased efficiency and capacity at our Oxford laboratory. We expect to continue to make commercial progress: we are seeing a growing acceptance of the importance of epigenetic biomarkers and the quality of results we can provide through *EpiSwitch*TM, and we are actively involved in contractual negotiations with a number of significant pharmaceutical and biotech companies as well as Governmental organisations. A particular focus for the next year will be continued expansion of our US representation, enlargement of our operating capacity in the UK and continued build up of our intellectual property position. With significant cash resources raised through the IPO, the Group remains well positioned to execute these strategic aims.

Initian Hoyer Millar.

Christian Hoyer Millar Chief Executive Officer Oxford BioDynamics Plc 29 January 2018

STRATEGY AND BUSINESS REVIEW

STRATEGIC OVERVIEW

Overview

Oxford BioDynamics ("OBD") is a revenue generating biotechnology company focused on the discovery and development of biomarkers for use within the pharmaceutical and biotechnology industry. The Company's proprietary technology platform, *EpiSwitch*TM, aims to accelerate the drug discovery and development process, improve the success rate of therapeutic product development and take advantage of the increasing importance of personalised medicine. To date, the Company has entered into multiple contracts with six of the top ten global pharmaceutical companies (by 2016 revenue)¹, which demonstrates the momentum the Company is gaining and highlights the potential value of *EpiSwitch*TM as an enabling technology platform.

Business strategy

The Directors believe that the Company's *EpiSwitch*TM platform provides OBD with a leading position in the field of practical applications utilising liquid biopsies for epigenetic biomarker development for the monitoring of regulatory genome architecture. The Board believes this affords the Company the opportunity to make *EpiSwitch*TM the leading standard in this field for the pharmaceutical and biotechnology industry.

The Directors aim to capitalise on the growth in the outsourced biomarker and companion diagnostics markets, which continue to be driven by a number of key trends:

- The growing appreciation of human biological complexity and the acknowledgement of the importance of personalised medicine and biomarker-based patient stratification modalities, including *EpiSwitch™*, to de-risk various stages of the drug discovery and development process.
- The significant cost, time and experience needed for biomarker discovery and development solutions available primarily through third party outsourced providers.
- The need for pharmaceutical and biotechnology companies to access biomarker discovery platforms that offer rapid and accurate validation solutions to trial studies at high risk of failure.

Business objectives

The Company's key business objectives are centred on three main areas:

- Expansion and extension of the current customer and collaborator base. Through the continued development of contracts with pharmaceutical, biotechnology and other research partners, the Company can leverage third party research and development resources, while retaining control and ownership of its intellectual property portfolio.
- Expansion of its own proprietary biomarker research. By accelerating its own biomarker discovery programmes, the Company can utilise validated biomarkers to help shape, influence and expand biomarker-based clinical trials with commercial partners, leading to more successful trial outcomes.
- Licensing of core technology. Through the licensing of the Company's technology platform, *EpiSwitch™*, which can benefit large pharmaceutical and biotechnology companies in their therapeutic development programmes, the enrichment of their clinical trials, and the development of companion diagnostics.

Through the execution of its strategy, the Directors believe the Company can capitalise on significant commercialisation opportunities as it seeks to transition its revenue model towards licence and milestone payments and future royalties associated with pharmaceutical revenues.

Business model

Currently, the Company generates revenue through four main sources:

- Service fees from conducting commercial biomarker projects with major pharmaceutical and biotechnology companies.
- Service fees from conducting collaborative biomarker projects with multiple commercial partners and research institutes.
- Service fees and upfront signing fees from licence agreements for the use of biomarkers in clinical diagnostics in Asia.
- Grant income from Innovate UK.

The terms of the Company's contracts with its customers remain confidential due to commercial sensitivity regarding drug trials, however the value of each contract has typically been up to US\$1m, with amounts payable to the Company in accordance with the respective terms of each contract, usually around the achievement of agreed contract milestones.

The Directors believe that the opportunity for value creation is considerable, as the granting of any licence is expected to materially increase revenue, but not materially to alter the Company's cost base.

To date, the Company has entered into confidential contracts with six of the top ten global pharmaceutical companies (by revenue), and thirteen of the top thirty.

Over the medium to long term, the Directors aim to transition the Company's revenue model to one that is predominantly based upon licence revenue, whereby the Company aims to generate upfront and milestone payments and future royalties from licensing the *EpiSwitch™* technology platform connected to a particular drug to multiple participants within the pharmaceutical and biotechnology industry.

OUR MARKET FOCUS

Our proprietary technology platform enables pharmaceutical companies to accelerate and improve the rate of drug discovery and development.

Through the development of epigenetic biomarkers, $EpiSwitch^{TM}$ can help pharmaceutical companies to:

Reduce the risk, cost and time to market for therapeutic development programmes

- Current time to bring a drug to market is 9 to12 years
- Average cost of development is \$2.6 billion
- Proportion of total cost incurred during phase 3 trials is **60%**
- Drug discovery failure rate is **90%**

Gain significant insights into disease mechanisms, to support the personalisation of medicine.

Personalise therapeutics to patients, to ensure better clinical outcomes of medicine.

¹Source: Pharm Exec's Top 50 Companies, 2017

BUSINESS REVIEW

Trends and factors

OBD's business is based on several key areas of strength including:

- Proprietary technology platform the Directors believe that EpiSwitch™ is the only proprietary technology platform for the use of Chromosome Conformation Signature ("CCS") based biomarkers that meets industry standards and quality requirements, producing binary results at a forensic level of sensitivity, through non-invasive testing (liquid biopsy), in a matter of hours, and on an industrial scale. Through the application of the Senior Management Team's expertise, the Company has sought to protect its technology through extensive 'know-how', patents and patent applications covering multiple jurisdictions.
- Niche position within a large, growing market with strong macro drivers - the global market for biomarkers is estimated to be worth approximately US\$28 billion per annum, with a compound annual growth rate ("CAGR") estimated at 13.8% for the period 2016-2021 (Source: Biomarkers Market – Global Forecast to 2021 – Markets and Markets, published February 2017). The overall biomarkers market can be split by application to include diagnostics, drug discovery and development, personalised medicine and disease risk assessment: OBD's EpiSwitch™ technology offers broad applicability to each of these subsectors. To date, the Company has primarily operated within both the outsourced biomarker and companion diagnostic markets, which as subsectors of the overall biomarker market, the Directors estimate to be likely to be worth in aggregate approximately US\$15 billion by 2018. As a core component of companion diagnostics, it is anticipated that significant opportunities exist for biomarker discovery platforms such as EpiSwitch™, which can provide novel biomarker signatures to support all stages of the drug discovery and development process, thereby improving trial success rates and the personalisation of medicine to address the unmet needs of patients.
- Differentiated business model with significant opportunities for value enhancement – the Company is revenue generating and incurs only relatively modest levels of expenditure in pursuit of its strategic aims and objectives. By collaborating with pharmaceutical and biotechnology companies and research institutes, the Company is able to leverage customer-funded development projects alongside its own proprietary work, which helps maintain a manageable cost base, while providing future opportunities for significant licence and royalty income through multiple licensing of its EpiSwitch™ technology.
- Growing diverse customer base and collaborative research network the Company has established an extensive customer base within the pharmaceutical and biotechnology industry, including leading US and Swiss pharmaceutical companies, which the Directors believe are seeking to accelerate the development of novel biomarkers to be used on an exclusive, licensed basis. The Company is also collaborating with several leading research institutes worldwide, which are utilising its *EpiSwitch™* technology for the purposes of research into new biomarkers and companion diagnostic tests. In addition, the Company has contracted with customers in non-therapeutic fields, with a focus on the application of epigenetic biomarkers and stratifications in well-being and fitness training in the athletics industry.
- Highly experienced management team blending experienced leadership with considerable scientific and technological expertise, the Senior Management Team has the complementary skills and experience to continue to enhance the *EpiSwitch™* technology platform and exploit the commercial opportunity it affords through future potential licensing arrangements.

The primary market in which OBD operates is the outsourced companion diagnostic and biomarker discovery market. The growing importance of personalised medicine has led to the increasing use of companion diagnostics by pharmaceutical and biotechnology companies during all stages of the drug discovery and development process, including target identification and better disease understanding. As a core component of companion diagnostics, biomarkers enable pharmaceutical and biotechnology companies to answer key questions regarding patient groups, which can ultimately lead to improved R&D and clinical development productivity.

The Directors estimate that the global market for outsourced companion diagnostics is likely to be worth approximately US\$7 billion per annum by 2018. This is largely as a result of the demand for biomarker use during the drug discovery and development process (for example to assist in the optimal stratification of patient cohorts for clinical trials), covering not only oncology, but also other pathologies including autoimmune disorders, neurodegenerative and age-related diseases.

In response to the increasing demand for biomarkers during multiple stages of drug discovery and development, the pharmaceutical and biotechnology industry has sought to use outsourced capability for the discovery of biomarkers due to the considerable time, cost and expertise required in this discovery process. The Directors expect that this trend for outsourced biomarker discovery solutions will continue, and estimate that the market is likely to have grown from a value of US\$3 billion per annum in 2014 to US\$8 billion by 2018 (a CAGR of 23 per cent).

As the integration of companion diagnostics within the drug discovery and development process continues, the Directors believe the development of therapeutics is set to become increasingly reliant upon biomarkers and those discovery platforms which can provide robust biomarker signatures for multiple stages of the R&D and drug development process.

Principal risks and risk management

The risk management strategy is a key responsibility of the Board of Directors. The Senior Management Team meet at least twice a month to identify areas of risk and to communicate with the Board as appropriate. The Group's Quality Management System includes extensive risk assessment, planning and reporting as well as the maintenance of detailed risk registers covering its ISO-certified operations. A detailed financial reporting and procedures framework was outlined prior to the IPO and has been implemented during 2017. The Board ensures that all key risks are understood and appropriately managed in light of the Group's strategy and objectives and is satisfied that the Group's risk management and internal control systems are adequate. At this stage of the Company's development, the Board does not consider it to be appropriate to establish an internal audit function, but this will be kept under review.

MARKET METRICS

Value of the **global biomarkers market is \$28 billion** with a five-year compound annual growth rate of **14%**.

Value of the **combined outsourced market** for biomarkers and companion diagnostics is **\$15 billion** with a five-year compound annual growth rate of **19%**.

STRATEGY AND BUSINESS REVIEW (CONTINUED)

Principal risks and risk management (continued)

The principal risks faced by the Group and the steps taken to manage or mitigate them are set out in the table below:

Principal risks	How these risks are managed or mitigated	Change in risk profile in the last 12 months*
The Group is in its early stage of development with a relatively limited operating history and track record of revenue generation – whilst OBD is revenue generating through a number of contracts, it has been (and is expected to remain) loss making over the near to medium term as it continues to develop the commercialisation opportunities for its <i>EpiSwitch</i> TM platform. There is a risk that the Group's current contracts will not lead to substantial licence or royalty payments beyond the contracted fee income under those contracts or that the Group will be unable to secure new licensing or revenue contracts.	The Group has obtained sufficient cash resources from investors and revenue-generating projects to fund its development plans. The Group has recruited a number of senior employees to engage in business development activity and aims to increase this resource further in the short term.	reduced
The Group operates in a complex area of biotechnology which can be subject to considerable levels of uncertainty – rapid scientific and technological change within the pharmaceutical and biotechnology industry could lead to other market participants creating approaches, products and services equivalent or superior to the CCS-based biomarker approaches offered by the Company, which could adversely affect the success of the Group's technology.	The Group's <i>EpiSwitch™</i> platform undergoes regular review and improvement. Whilst entirely new modalities of biomarker development may arise, these are not currently known and would take time to develop. The Directors believe <i>EpiSwitch™</i> is the only CCS-based biomarker technology that meets industry standards on sensitivity, cost and evidence of validated stratifications.	same
The Group remains largely reliant on the pharmaceutical and biotechnology industry – Whilst the Group has broadened its customer base during the year (as outlined in 'Trends and factors' above), a significant portion of its revenue is generated through collaborations with pharmaceutical and biotechnology companies. In the event that the pharmaceutical and biotechnology industry reduces its expenditure on drug development and discovery, or can meet its requirements for biomarker discovery through internal capability and resources, the Group's operations or financial results could be adversely impacted.	The Group seeks to mitigate this risk by contracting with a large number of major pharmaceutical and biotech customers, as outlined in the strategic overview on page 4. The Group has also broadened its customer base during the year to include non-pharma/biotech customers, reflecting the increasing awareness of the importance of epigenetics in non-clinical fields, as outlined in the business review on page 5.	reduced
<i>The Group relies on key suppliers</i> – certain stages of the Company's proprietary processes involve products or services currently sourced from single third party suppliers.	The Group seeks to reduce this risk by bringing critical steps in the process 'in-house' and using multiple suppliers and membership of purchasing groups where possible.	reduced
The Group expects to face competition from other biotechnology companies, which could adversely impact the rate and level of commercialisation of its technology if it fails to compete effectively. The Group's competitors within the biomarker discovery industry may have superior R&D capabilities or better access to the leading pharmaceutical and biotechnology companies who require novel biomarkers. Further, a number of other biomarker discovery companies have greater financial, technical and human capital, which can be deployed in any attempts to gain a superior market position.	The Group has secured wide, early intellectual property protection in what is a relatively nascent field. In the development of its <i>EpiSwitch™</i> platform technology, the Group has also acquired significant know-how, which would be difficult and time-consuming to replicate.	same

Principal risks	How these risks are managed or mitigated	Change in risk profile in the last 12 months*
<i>The Group depends upon a small number of key personnel</i> – In line with groups of a similar size, the Group is managed by a limited number of key personnel, including the Executive Directors and the Senior Management Team, who have significant experience within the Group and the sectors it operates in, and who could be difficult to replace.	The Group has sought to mitigate this risk by expanding its Senior Management Team during the period. Executive and employee remuneration plans, incorporating long-term incentives, are designed to attract and retain staff with appropriate skills.	same
The Company may incur significant costs as a result of intellectual property disputes – the Company's ability to compete depends in part, upon the successful protection of its intellectual property. Third parties may infringe upon or otherwise challenge the Company's intellectual property, release confidential information about the Company's intellectual property or claim technology which is registered to the Company.	The Company seeks to protect its leading intellectual property position through 1) the filing of worldwide patent applications where permissible, 2) strict protection of the know-how required for <i>EpiSwitch™</i> , 3) A sustainable lead in offering a technical solution of quality superior to any late competitor, 4) robust confidentiality obligations on its employees, collaborators, subcontractors and licensees in order to protect the Company from the release of information relating to its know-how.	same
Foreign exchange rate fluctuations may adversely affect the Group's earnings, financial condition, results or future operations – a significant proportion of revenues of the business are denominated in US dollars and the majority of expenditure is in UK pounds sterling US dollars or Malaysian ringgits. Fluctuations in exchange rates between these currencies could have a material impact on the Group's earnings, financial condition, results or future operations, which are required to be reported in UK pounds sterling.	The Group plans what balances to retain in given currencies. It is able to use US dollars received from customers to pay liabilities denominated in US dollars. The Group does not engage in foreign currency trading or speculation.	same
The Group may suffer risks and uncertainties as the UK plans to leave the EU – as the Group's main customers are predominantly based outside of the EU, and the majority of the Group's expenditure originates in the UK the Directors do not expect that Brexit will have a material impact on the future performance and position of the business.	The Directors will continue to monitor developments over the coming year.	same

*Directors' estimates

KEY PERFORMANCE INDICATORS

The Group uses a range of measures to monitor performance, with the main financial key performance indicators ("KPIs") being revenue, operating loss before non-recurring items, net cash used in operating activities, overall cash resources, and adjusted loss per share, as noted in the Financial review on page 9.

The main non-financial KPIs monitored by the Group include: the number of contracts agreed with customers; the number and size of customers contracted with; the quality of results achieved in biomarker discovery and development projects; time taken for individual project phases; the number of high quality presentations and publications of the Group's research; and the extent of the protection of the Group's intellectual property afforded by its patent and trademark portfolio.

STRATEGY AND BUSINESS REVIEW (CONTINUED)

CORPORATE RESPONSIBILITY

Corporate social responsibility

The Group is committed to maintaining the highest standards of corporate social responsibility in its business activities. The Group aims to be at the forefront of the personalised medical revolution by using *EpiSwitch*TM biomarkers for disease detection, prognostic testing and screening for drug responses in patient healthcare. The Group aspires to high standards of practice through a process of continual improvement and the adoption of international codes and standards where practicable. To meet this commitment, the Group has implemented, and will continue to review and update, management systems in its operations that accord with the requirements of its corporate social responsibility standards, and strives to:

- Comply with all applicable laws and regulations, wherever the Group operates;
- Achieve and comply with relevant quality and people management standards;
- Consult with and respond to the concerns of our stakeholders;
- Work towards realising the Group's mission and vision statements; and
- Behave with honesty and integrity in all the Group's activities and relationships with others and reject bribery and corruption in all its forms.

Human rights

The Group aims to conduct its business with integrity, respecting the different cultures and the dignity and rights of individuals in the countries where it operates, and to:

- Create a professional, diverse work environment, free of harassment and bullying, where everyone is treated with dignity and respect;
- Identify, assess and manage human rights risks within its sphere of influence and activities, working firstly to avoid or mitigate them, and then seek to remedy any actual or potential impacts;
- Ensure that appropriate mechanisms are in place for those affected by its operations to raise grievances; and
- Respect and support internationally recognised human rights standards wherever the Group operates and seek to ensure non-complicity in human rights abuses.

Community

The Group has the aim that communities in which it operates should benefit directly from its presence through the wealth and jobs created, and the investment of its time and money in the community. In pursuit of this aim, the Group seeks to:

- Assist in local community development activities where it operates, in consultation with local government, the public and other stakeholders; and
- Respect the rights of indigenous peoples in all countries in which it operates.

Customers, suppliers and shareholders

The Group is committed to:

- Providing high quality, consistent, accessible and reliable services to its customers;
- Ensuring that contractors and suppliers are aware of, and where necessary, work with it to comply with its business principles, policies and standards; and
- Conducting its operations in accordance with the principles of good corporate governance, and providing timely, regular and reliable information on the business to all of its shareholders.

Gender diversity

The Directors recognise the benefits of diversity in the workforce and, whilst the Group continues to make all appointments based on the best candidate for the role, the Directors acknowledge that it is not just gender diversity that supports the strength and future success of the business. The Board remains focused on achieving the right level of diversity whether related to ethnicity, gender, creed or culture.

Health and safety

The Directors are committed to ensuring the highest standards of health and safety, both for employees and for the communities within which the Group operates. Alexandre Akoulitchev is the Director with overall responsibility for health and safety matters.

The Group seeks to meet legal requirements aimed at providing a healthy and secure working environment to all employees and understands that successful health and safety management involves integrating sound principles and practice into its day-to-day management arrangements and requires the collaborative effort of all employees. All employees are positively encouraged to be involved in consultation and communication on health and safety matters that affect their work.

Environment

The Group does not operate within a highly regulated environment; however, it does hold all of the licences it requires in order to operate its business, including a Human Tissue Authority licence for the storage of material from the human body, namely blood samples. The Group also maintains uniform levels of quality control and quality assurance standards throughout its reference facilities and laboratories, through the application of its quality management systems as demonstrated by its international standards, ISO 9001 and ISO 13485.

The Group:

- Is fully committed to minimising the impact that running its business has on the environment and it encourages its clients, suppliers and other stakeholders to do the same;
- Is aware that its business activities result in various environmental impacts and will comply with all relevant legislative, regulatory and other environmental requirements in order to act in a socially responsible manner; and
- Will strive to continuously improve its environmental performance.

FINANCIAL REVIEW

Overview

During the year ended 30 September 2017, the Company continued to focus on developing contracts with global pharmaceutical and biotechnology companies, investing in proprietary R&D projects, and strengthening its intellectual property portfolio.

The Company successfully completed its IPO and listing on AIM on 6 December 2016. The Company issued 4.5m new shares at a placing price of 158p, raising gross proceeds of \pounds 7.1m, with the intention of using the funds principally to expand proprietary biomarker programme activity, enhance the Company's intellectual property portfolio, and establish representation in the US, all of which have progressed during the year.

Financial performance

Revenue in the year ended 30 September 2017 was £1.18m (2016: £1.09m), comprising services fees received for commercial biomarker projects with pharmaceutical and biotechnology companies, services fees generated from collaborations with research institutions, and services and licence fees from agreements for the use of biomarkers in clinical diagnostics in Asia.

Operating expenses (excluding share option charges and IPO costs) were £3.55m in the year ended 30 September 2017 (2016: £2.73m). Of the £0.82m increase in operating costs, £0.41m was attributable to staff costs, £0.45m to general and other admin, and approximately £0.08m to increased depreciation, offset by a reduction in non-staff R&D costs of £0.11m.

Other operating income in the year of £0.25m (2016: £0.16m) mainly comprised grant income from Innovate UK, supporting the Group's ALS biomarker research and development programme.

Operating loss for the Group before IPO-related costs of £1.49m (2016: £0.45m), was £2.51m (2016: £1.88m).

Financial income of £0.09m related mainly to interest receivable (2016: £0.25m comprised mainly foreign exchange gains). Finance costs of £0.12m related primarily to foreign exchange losses.

The taxation credit of £0.23m in the year (2016: £0.34m) represents tax relief on research and development expenditure during the period, net of total adjustments in respect of the last two years' claims of approximately £0.1m. The Group has not recognised any deferred tax assets in respect of trading losses arising in the current or prior financial periods.

Net loss for the year was £3.80m (2016: £1.73m). Loss per share was 4.5 pence (2016: 2.1 pence) and adjusted loss per share was 2.7 pence (2016: 1.6 pence) excluding one-off IPO costs of £1.49m (2016: £0.45m).

Financial position

Cash and cash equivalents at 30 September 2017 totalled £10.80m (2016: £7.28m), reflecting the net cash proceeds of £5.40m raised from the IPO and placing in December 2016.

Total assets at 30 September 2017 were £12.68m (2016: £9.02m), reflecting the increased cash balance, investment in tangible and intangible fixed assets and less significant movements in working capital.

Total liabilities decreased slightly to $\pm 1.09m$ at 30 September 2017 (2016: $\pm 1.28m$) reflecting reductions in accruals for IPO-related costs at the end of September 2016.

Cash flow

Net cash used in operating activities for the year ended 30 September 2017 was £1.53m (2016: £1.35m). Net cash used in investing activities was £0.32m (2016: £0.16m) and net cash generated by financing activities was £5.40m (2016: net cash used of £0.08m). Overall there was a net cash increase for the year ended 30 September 2017 of £3.51m (2016: net cash outflow of £1.16m) including exchange movements on non-GBP denominated cash and cash equivalents of £0.04m (2016: £0.42m).

The Strategic report, comprising pages 2 to 9, has been approved by the Board and is signed by order of the Board by:

knitian Hoyer Millar.

Christian Hoyer Millar Chief Executive Officer 29 January 2018

Registered office: 26 Beaumont Street Oxford OX1 2NP

Registered number: 06227084

BOARD OF DIRECTORS

DAVID WILLIAMS (Non-Executive Chairman)

David has been involved in The City for 45 years, during which time he has been chairman of a significant number of companies, including Waste Recycling Group and Entertainment One plc (LSE:ETO). He currently sits on the boards of Breedon Group plc (AIM: BREE) and Shearwater Group plc (AIM: SWG) and serves as chairman of the Nomination Committee and is a member of both the Audit and Remuneration Committees. David was appointed to the Board on 4 October 2016.

CHRISTIAN HOYER MILLAR (Chief Executive Officer)

Christian read Politics, Philosophy and Economics at Lincoln College, Oxford. His career started at the Boston Consulting Group, where he worked both in Europe and in the US. He then moved to the UK Holding Company, a subsidiary of the German/Dutch conglomerate Hoogovens/ Hoechst, as a director of two of their subsidiaries in the UK, winning the Queen's award for Exports in one of those subsidiaries. He then became vice president of Fox Pitt Kelton, where he worked on the mergers and acquisitions of US regional banks. Subsequently, Christian worked in venture capital, notably in conjunction with Ensign Trust PLC, owned by the Merchant Navy Pension Fund. Christian co-founded Oxford BioDynamics in 2007 with Dr. Alexandre Akoulitchev and Dr. Aroul Ramadass. Christian is a non-executive director of both Chronos Therapeutics Limited and Sibelius Limited. Christian was appointed to the Board on 25 April 2007 and is also a member of the Nomination Committee.

DR ALEXANDRE (SASHA) AKOULITCHEV (Chief Scientific Officer)

Sasha read Mathematics, Physics, Chemistry, Biochemistry and Biophysics at Moscow Institute of Physics and Technology. In 1989 he was selected by the George Soros Foundation for the Oxford Scholarship, associated with St. Antony's College, along with twenty top Soviet graduate students from the USSR. He obtained his PhD in cell biology from University College, London (with the research based at the Imperial Cancer Research Fund). He spent six years at the Robert Wood Johnson Medical School-UMDNJ, NJ, as a research assistant funded by the Howard Hughes Medical Institute. Upon his return to England. he established his research laboratory at the Sir William Dunn School of Pathology, University of Oxford. He was a University Academic Fellow (Research Council UK) and a Senior Fellow of Exeter College, sponsored by Cancer Research UK, The Wellcome Trust, The Medical Research Council. Sasha is also a Fellow of the Royal Society of Medicine. He is currently a non-executive director of Sibelius Limited. Sasha was appointed to the Board on 8 June 2007.

PAUL STOCKDALE (Chief Financial Officer)

Paul joined the Company in September 2017 from e-Therapeutics plc, where he held the position of Financial Controller from 2012. Paul is a Chartered Accountant and was a Senior Manager at Deloitte, where he worked from 1996 until 2004. Following this, he worked in finance and operations management in the charitable and automotive sectors. He read Natural Sciences at St John's College, University of Cambridge.

ALISON KIBBLE (Independent Non-Executive Director)

Alison read Biochemistry at New College, Oxford. Her career stared as a product manager of R&D Systems Europe Limited in 1992, after which she moved on to become general manager of Quantum Appligene and a consultant to Actigen Limited. In 2000, Alison became the sales director of eLabs Europe and in 2001 became the chief executive officer of Molecular Sensing plc. She transitioned Molecular Sensing plc from the R&D phase through project development to launch of their first commercial product, and was instrumental in technology transfer and eventual licence of the technology to Roche, before sale of the company to Osmetech plc. In 2005, Alison was recruited as the chief executive officer of Femeda Ltd. Through her company, Lobes Ltd, she acted as a board advisor and non-executive director for a number of companies, ranging from start-ups to more established businesses. She specialises in commercialisation strategies and fund-raising. Alison formerly represented Oxford University on the Board of Directors for the Company. Alison was appointed to the Board on 7 December 2007 and serves as the Chairman of both the Audit and Remuneration Committees. She is also a member of the Nomination Committee.

STEPHEN DIGGLE (Non-Executive Director)

Stephen is the founder and Chief Executive Officer of Vulpes Investment Management (a significant shareholder in the Company), and co-founder and former managing partner of Artradis Fund Management, one of the largest hedge fund groups in Asia. Stephen has been involved in equity capital markets for nearly thirty years, leading trading teams across a number of institutions including Salomon Brothers and Lehman Brothers, and has considerable experience investing in and supporting life science businesses through the Vulpes Life Sciences Fund. Stephen holds an MA from the University of Oxford. He was appointed to the Board on 4 October 2016.

DIRECTORS' REPORT

The Directors present their Directors' report together with the financial statements for the year ended 30 September 2017. The Corporate Governance report on pages 14 to 16 also forms part of this Directors' report.

Review of business

The Chief Executive Officer's review on page 3 and the Strategic report on pages 2 to 9 provide a review of the business, the Group's trading for the year ended 30 September 2017, key performance indicators and an indication of future developments and risks.

Capital structure

During the reporting period, the following allotments and restructuring of the issued share capital of the Company took place:

On 13 October 2016 the Company re-registered as a public company pursuant to s90 Companies Act. In connection with the re-registration, a balance sheet of the Company was prepared as at 31 August 2016, which showed net assets of £8,033,725. The balance sheet was audited in accordance with the requirements of s92 Companies Act by Mercer Lewin Limited, which had given a clean opinion on the audit.

On 6 December 2016, pursuant to the Company's Admission to trading on AIM and the Placing, 4,498,228 ordinary shares of 1 pence each were allotted at the placing price of 158 pence per share, and the entire issued share capital of the Company was admitted to trading on AIM.

Holders of ordinary shares are entitled to receive all shareholder documents, to attend, speak and exercise voting rights, either in person or by proxy, on resolutions proposed at general meetings and participate in any distribution of income or capital. There are no restrictions on the transfer of the ordinary shares in the Company other than certain restrictions which may from time to time be imposed by laws and regulations (for example, insider trading laws); and pursuant to the Market Abuse Regulation whereby certain employees of the Company require the approval of the Company to deal in the ordinary shares.

Movements in the Company's issued share capital during the year under review are set out in note 22 to the financial statements. The issued share capital as at 30 September 2017 was £860,982.28, comprising 86,098,228 ordinary shares of 1 pence each in nominal value. Each share carries one vote, and all rank equally.

Share option schemes and warrants

As at 26 January 2018 (the latest practicable date before the publication of this document), options to subscribe for shares were outstanding which entitle their holders to acquire 7,089,411 ordinary shares of 1 pence each (representing 8.1 per cent of the issued share capital).

On 30 November 2016, the Company granted warrants over ordinary shares representing 2.0 per cent of the post-IPO issued share capital (being 1,721,964 ordinary shares) to Wentworth Limited ("Wentworth") in consideration for Wentworth procuring Placees pursuant to the Placing. David Williams, the Company's Chairman is the beneficial owner of Wentworth. 689,441 of these warrants were exchanged for 689,441 new ordinary shares on 4 December 2017. In accordance with the 'cashless exercise' provisions contained in the warrant instrument, the shares were issued at a nominal price of 1p per share, and Wentworth simultaneously waived its right to subscribe for shares under the remaining warrants.

Results and dividend

The results for the period and financial position of the Company and the Group are as shown in the annexed financial statements and reviewed in the Strategic report. No dividends will be proposed for the financial year ended 30 September 2017 (2016: \pounds nil).

Research and development

The Group's research and development activities relate to the development of technologies to discover and develop novel biomarkers for use within the pharmaceutical and biotechnology industry. During the financial year ended 30 September 2017, not including the cost of staff engaged in research and development, the Group invested £407,000 into research and development (2016: £516,000).

Our staff

The Group adopts a policy of equal opportunities in the recruitment and engagement of staff as well as during the course of their employment. The Group endeavours to promote the best use of its human resources on the basis of individual skills and experience, matched against those required for the work to be performed. In support of this aim, during the year the Company achieved the Investors in People standard accreditation. The Group aims to:

- Ensure employees operate and behave in line with the values of the Group;
- Respect the rights and dignity of every employee and treat them fairly and without discrimination;
- Encourage team working and the sharing of knowledge by creating transparency and trust among employees;
- Recognise employees' individual and team contribution and reward them appropriately;
- Ensure each member of staff has structured training and development opportunities based on their individual requirements and aspirations;
- Encourage a pioneering environment where employees are willing to explore and adapt to new ideas and embrace change; and
- Create a culture of continuous improvement and excellence by encouraging innovation and a high standard of work and professionalism.

DIRECTORS' REPORT (CONTINUED)

Directors

The current Directors of OBD are presented on page 10. The Directors of the Company who served during the financial year ended 30 September 2017 were:

A Akoulitchev

- S C Diggle (appointed 4 October 2016)
- C G Hoyer Millar
- A C Kibble
- **K J Long** (appointed 4 October 2016, resigned 30 June 2017)
- P L Stockdale (appointed 15 September 2017)
- **D J Williams** (appointed 4 October 2016)

Directors' indemnity provisions

The Company has made qualifying third party indemnity provisions for the benefit of its Directors, which remain in force at the date of this report. In addition, the Company has purchased and maintains Directors' and Officers' liability insurance cover against certain legal liabilities and costs for claims incurred in respect of any act or omission in the execution of their duties.

Directors' interests

The beneficial interests of the Directors holding office on 30 September 2017 in the issued share capital of the Company were as follows:

Ordinary share capital	As at 30 September 2017 Number £0.01 shares	As at 1 October 2016 Number £0.01 shares
Alexandre Akoulitchev	5,806,930	6,452,145
Stephen Diggle ¹	11,591,883	n/a
Christian Hoyer Millar ²	12,326,303	16,779,399
Alison Kibble		_
Paul Stockdale		n/a
David Williams ³	632,911	n/a

¹ Includes the shareholding of Vulpes Life Sciences Fund, which is associated with Stephen Diggle. ² Includes 4,473,140 shares held by Christian Hoyer Millar's wife, Mrs P Hoyer Millar. ³ Held by Wentworth Limited, which is owned by David Williams. Wentworth Limited exchanged warrants over 689,441 shares on 4 December 2017, as noted on page 11.

Details of the Directors' share options are disclosed on page 21.

Political donations

The Company made no political donations during the reporting period.

Financial instruments

The Group's financial risk management policy is set out in note 30 in the notes to the consolidated financial statements.

Major interests

As at 26 January 2018, being the latest practicable day prior to the publication of this report, the Company had been notified of the following shareholdings amounting to 3% or more of the issued share capital of Oxford BioDynamics Plc:

Number of shares	%
12,326,303	14.1%
11,591,883	13.25%
8,599,823	9.82%
6,360,529	7.27%
6,153,082	7.03%
5,830.468	6.66%
4,236,644	4.84%
	12,326,303 11,591,883 8,599,823 6,360,529 6,153,082 5,830.468

¹Christian Hoyer Millar's holding includes 4,473,140 shares held by his wife, Mrs P Hoyer Millar.

Purchase of own shares by the Company

At the general meeting held on 15 March 2017, shareholders authorised the Directors to make market purchases of the Company's ordinary shares up to a maximum number of 8,609,823 shares on such terms and in such manner as the Directors determined from time to time, subject to the limitations set out in the resolution.

This authority remains valid until the date of the next annual general meeting. No such purchases were made during the year. At the close of business on 26 January 2018, the Company had 87,479,973 ordinary shares in issue, none of which were held in treasury. A renewal of the authority to make market purchases of the Company's ordinary shares, if believed appropriate, will be sought at the forthcoming annual general meeting, although the Board has no present intention of exercising such authority.

If this resolution is passed, the Company will be authorised to purchase up to a maximum of 8,747,997 ordinary shares, being approximately 10% of the Company's issued ordinary share capital on 26 January 2018 (being the latest practicable date before the date of this document). The resolution sets out the minimum and maximum price that the Company may pay for purchases of its ordinary shares.

Going concern

The Group's business model is set out in the Strategic overview on page 4. As noted there, the Directors aim, in the medium to long term, to transition the Company's revenue model to one that is predominantly based upon licence revenue, whereby the Company aims to generate upfront and milestone payments and future royalties from licensing the *EpiSwitch*TM technology platform connected to a particular drug to multiple participants within the pharmaceutical and biotechnology industry.

In the short-to-medium term, the Group is expected to remain lossmaking as outlined in the table of principal risks on pages 6 and 7. The loss and operating cash outflow for the year ended 30 September 2017 are consistent with the Directors' expectations of the performance of the Group and Company at this stage in the development of its business model.

The Group has prepared detailed financial forecasts which show that, in the absence of significant revenue growth or further fundraising from investors, the Group could continue at planned activity levels for the next 4 years.

Given the above, and after making appropriate enquiries, the Directors have a reasonable expectation that the Group has adequate resources to continue in operational existence for the foreseeable future and the Board continues to adopt the going concern basis in preparing the financial statements.

Disclosure of information to the Auditors

Each person who is a Director at the date of approval of this annual report confirms that:

- So far as the Director is aware, there is no relevant audit information of which the Group's Auditor is unaware; and
- The Director has taken all reasonable steps as a Director in order to make himself/herself aware of any relevant audit information and to establish that the Group's Auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of Section 418 of the Companies Act 2006.

Independent Auditor

KPMG LLP has indicated that they are willing to continue in office as the Group's Auditors. A resolution to re-elect KPMG LLP as Auditor for the ensuing year will be proposed at the forthcoming annual general meeting.

Annual general meeting

The annual general meeting of the Company will be held at The FitzHugh Auditorium, Cohen Quadrangle, Exeter College, Walton Street, Oxford, OX1 2HE on 15 March 2018 at 11am. The notice convening the meeting is set out on pages 56 and 57, along with a summary of the business to be transacted. A copy of the notice is also available on the Company's website at www.oxfordbiodynamics.com.

By order of the Board

Hoyer Millar.

Christian Hoyer Millar Chief Executive Officer 29 January 2018

CORPORATE GOVERNANCE REPORT

AN INTRODUCTION FROM THE CHAIRMAN

Dear Shareholders,

I have pleasure in introducing this Corporate governance report. In the previous annual report, we set out the Company's approach to governance and provided information on how the Board and its committees would operate following the IPO in December 2016, and this year's report focuses on that period.

The Board seeks to follow best practice in corporate governance to the extent appropriate to the Company's size, nature and stage of development and in accordance with the regulatory framework that applies to AIM companies. The Board seeks to apply the principles and provisions of the Quoted Companies Alliance Corporate Governance Code for Small and Mid-Size Quoted Companies (the "QCA Code"), and by doing so to support the Group's achievement of its strategic goals with appropriate high quality governance processes, reducing the risk of poor decisions being made, or decisions being made for the wrong reasons. The main features of the Group's corporate governance arrangements are set out below.

O.

David Williams Chairman

Board composition

The Board is responsible to the shareholders and sets the Group's strategy for achieving long-term success. It is ultimately responsible for the management, governance, controls, risk management, direction and performance of the Group.

The Board currently comprises three Executive and three Non-Executive Directors, one of whom, Alison Kibble, is considered by the Directors to be independent for the purposes of the QCA Code. Alison joined the Board on 7 December 2007 and, prior to this, had no association with the Company. Alison has previously represented the University of Oxford's shareholding in the Company, however this representation has since ceased. Accordingly, the Directors consider that Alison satisfies the independence criteria set out in the QCA Code.

In seeking to follow best practice in corporate governance, the Directors recognise the QCA Code recommends that a company should have at least two independent non-executive directors. However, it further notes that small and mid-sized companies may find it difficult to meet these criteria. As such, it remains the Board's intention to seek to appoint a second independent Non-Executive Director in due course. In the interim, the Directors believe that the Board continues to operate effectively with one independent Director in place, and that whilst David Williams as Chairman is not considered independent by virtue of the Wentworth Warrant (and subsequently Wentworth's shareholding see pages 11 and 12 for further details), David does bring significant public markets and corporate governance experience to the Board, having previously overseen and supported a number of high growth companies on AIM. Given there is only one independent Non-Executive Director, the Board does not consider it necessary to appoint a senior independent non-executive director.

Division of responsibilities between Chairman and Chief Executive Officer

The Chairman, David Williams, is responsible for leadership of the Board, ensuring its effectiveness on all aspects of its role, setting its agenda and ensuring that the Directors receive accurate, timely and clear information. The Chairman also ensures effective communication with shareholders and facilitates the effective contribution of Non-Executive Directors. The Chairman's other commitments are described on page 10.

The Chief Executive Officer, Christian Hoyer Millar, is responsible for running the business and for managing the management team, which reports formally to the Board at each Board meeting.

Dividing responsibilities in this way ensures no one individual has unfettered powers of decision-making.

Board meetings

The Board meets at least four times per year for formal Board meetings. The Board approves financial statements, dividends (if any) and significant changes in accounting practices and key commercial matters, such as decisions to be taken on whether to take forward or to cancel a material collaboration project or commercial agreement. There is a formal schedule of other matters reserved for decision by the Board.

The Board considers that it has shown its commitment to leading and controlling the Group by meeting ten times during the year ended 30 September 2017, and the attendance of each Director at Board and Committee meetings during the period is set out in the table below:

Director	Board ¹	Audit Committee ¹	Remuneration Committee ¹	
A Akoulitchev	7/10	—	_	_
S C Diggle (appointed 4 October 2016)	8/10			_
C G Hoyer Millar	10/10	—	_	2/2
A C Kibble	10/10	3/3	3/3	2/2
K J Long (appointed 4 October 2016, resigned 30 June 2017)	8/8		_	_
P L Stockdale (appointed 15 September 2017)	1/1			_
D J Williams (appointed 4 October 2016)	9/9	3/3	3/3	2/2

¹Attendance is expressed as the number of meetings attended/number eligible to attend. Directors' attendance by invitation at meetings of Committees of which they are not a member is not reflected in the above table.

In cases of non-attendance, this was generally as a result of the respective Board meeting being called on short notice.

Timeliness and quality of Board information

The Board seeks to ensure that Directors are properly briefed on issues arising at Board meetings by establishing procedures for distributing Board papers in a timely manner in advance of meetings; considering the adequacy and quality of the information provided before making decisions; and adjourning meetings or deferring decisions when Directors have concerns about the information available to them.

Board Committees

The Company established an Audit Committee, a Remuneration Committee and a Nomination Committee on Admission, on 6 December 2016, and the Board has delegated specific responsibilities to those committees as detailed below. Copies of each Committee's terms of reference are available on the Company's website at www.oxfordbiodynamics.com.

Nomination Committee

Details of the activities and responsibilities of the Nomination Committee are set out on page 17.

Audit Committee

A report on the duties of the Audit Committee and how it discharges its responsibilities is provided later in the Audit Committee report on pages 18 and 19.

Remuneration Committee

The Directors' Remuneration Report and details of the activities of the Remuneration Committee are set out on pages 20 and 21. It sets out a summary of the Group's policy on remuneration policy, having due regard to the interests of shareholders, and details of the elements of the remuneration package of each individual Director.

Board effectiveness

The skills and experience of the Board are set out in their biographical details on page 10. The experience and knowledge of each of the Directors gives them the ability to challenge strategy constructively and to scrutinise performance.

Induction of new Directors

On joining the Board, Directors take part in a formal induction process, including briefing on AIM rules by the Company's Nominated Adviser and the provision of past Board materials to provide background information on the Company and information on the Board's processes and governance framework. The induction is tailored to meet each new Director's specific needs. Training is also provided to all Directors on an ongoing and timely basis.

All current Directors took part in a thorough induction process either in conjunction with the Company's listing on AIM or on their appointment.

Time commitments

On joining the Board, Non-Executive Directors receive a formal appointment letter, which identifies the terms and conditions of their appointment and, in particular, the time commitment expected of them. A potential Director candidate (whether an Executive Director or Non-Executive Director) is required to disclose all significant outside commitments prior to their appointment.

The Board is satisfied that the Chairman and each of the other Non-Executive Directors is able to devote sufficient time to the Company's business.

Evaluation

The Board conducts an annual evaluation of its performance by way of a questionnaire and Chairman interviews. The evaluation of the performance of the Board during the first year since the Company's Admission to AIM is currently underway, and a summary of its results will be published in the next annual report.

Information and development

The Board receives detailed reports from executive management on the performance of the Group at Board meetings and other information as necessary, and the Senior Management Team regularly make presentations to the Board on their areas of responsibility. Regular updates are provided on relevant legal, corporate governance and financial reporting developments and Directors and the Senior Management Team are encouraged to attend external seminars on areas relevant to their role.

All Directors have access to the advice and services of the Company Secretary. The removal and appointment of the Company Secretary is a matter reserved for Board approval. The Board also obtains advice from independent professional advisers, at the Company's expense, as and when required.

External appointments

In the appropriate circumstances, the Board may authorise Executive Directors to take non-executive positions in other companies and organisations, provided the time commitment does not conflict with the Director's duties to the Company, since such appointments should broaden their experience. The acceptance of appointment to such positions is subject to the approval of the Chairman.

Conflicts of interest

At each of its meetings, the Board considers Directors' conflicts of interest. The Company's articles of association provide for the Board to authorise any actual or potential conflicts of interest.

Election of Directors

All Directors are subject to election by shareholders at the first annual general meeting following their appointment by the Board. The Company's current articles of association came into effect on 6 December 2016 and state that each Director shall retire and (unless his/her terms of appointment with the Company specify otherwise) is eligible for election or re-election at the annual general meeting held in the third calendar year (or such earlier calendar year as may be specified for this purpose in his/her terms of appointment with the Company) following his/her last appointment, election or re-election at any general meeting of the Company. In practice, this means that every Director stands for re-election at intervals of not more than three years.

Paul Stockdale was appointed as a Director on 15 September 2017 and accordingly will retire at the AGM and, being eligible, will offer himself for re-election at the forthcoming annual general meeting.

Each of Christian Hoyer Millar, Dr Alexandre Akoulitchev, David Williams, Stephen Diggle and Alison Kibble retired and was re-elected at the annual general meeting held on 15 March 2017.

CORPORATE GOVERNANCE REPORT (CONTINUED)

Risk management policy

The QCA Code recommends that a company should have in place a risk management policy and a risk management register. The Group's approach to risk management, including the maintenance of risk registers is outlined in the strategic report. These are particularly well-developed and managed for its ISO-certified activities and are now also in place to cover other areas of the business. The Board expects further to develop its risk management processes in these areas over the coming year.

Internal controls

The Board has ultimate responsibility for the Group's system of internal control and for reviewing its effectiveness. However, any such system of internal control can provide only reasonable, but not absolute, assurance against material misstatement or loss. The Board considers that the internal controls in place are appropriate for the size, complexity and risk profile of the Group.

The principal elements of the Group's internal control system include:

- Close management of the day to day activities of the Group by the Executive Directors;
- Clearly defined lines of responsibility and delegated authority;
- A comprehensive system for consolidating financial results from Group companies and reporting these financial results to the Board;
- Annual revenue, cash flow and capital forecasts which are reviewed regularly during the year, regular monitoring of management accounts and capital expenditure reported to the Board, and regular comparisons with forecasts;
- Financial controls and procedures including hierarchical dual authorisation of payments and segregation of duties wherever possible; and
- The Company's Audit Committee (established on 6 December 2016) which approves audit plans and published financial information and reviews reports from the external Auditors arising from the audit and deals with significant control matters raised.

The Group continues to review its system of internal control to ensure compliance with best practice, whilst also having regard to its size and the resources available. The Board considers that the introduction of an internal audit function is not appropriate at present, but this will be kept under review.

The Board monitors the activities of the Group through regular Board meetings and it retains responsibility for approving any significant financial expenditure or commitment of resources.

Dialogue with shareholders

The Company maintains communication with institutional shareholders through individual meetings with Executive Directors. Private shareholders are encouraged to attend the annual general meeting at which the Group's activities are considered and questions answered. General information about the Group is also available on the Company's website (www.oxfordbiodynamics.com). This includes an overview of activities of the Group and details of all recent Company announcements. The Non-Executive Directors are available to discuss any matter stakeholders might wish to raise, and the Chairman and Independent Non-Executive Director will attend meetings with investors and analysts as required.

Approved by the Board and signed on its behalf by:

kultine Hoyer Millar.

Christian Hoyer Millar Chief Executive Officer 29 January 2018

NOMINATION COMMITTEE REPORT

Nomination Committee

The Nomination Committee is responsible for reviewing the structure, size and composition of the Board based upon the skills, knowledge and experience required to ensure the Board operates effectively. The Nomination Committee meets at least once per year and at other times as and when required. The Nomination Committee also identifies and nominates suitable candidates to join the Board when vacancies arise, and makes recommendations to the Board for the re-appointment of any Non-Executive Directors. David Williams acts as Chairman of the Nomination Committee and its other members are Alison Kibble and Christian Hoyer Millar.

Since its establishment on 6 December 2016, the Nomination Committee has met twice. Details of meeting attendance are shown in the Corporate governance report on page 14.

In discharging its duties, the Nomination Committee was engaged in the proposed appointment of a new Chief Financial Officer following Katie Long's resignation. In its search for suitable candidates, the Company engaged an external search consultancy, Page Executive, which resulted in a shortlist of applicants being identified. Page Executive does not provide any other services to, and is not otherwise connected with, the Group. A number of the short-listed applicants, including Paul Stockdale, were interviewed by certain members of the Board and the Nomination Committee. The Nomination Committee subsequently reviewed Paul Stockdale's candidacy alongside that of the other candidates and concluded that he fulfilled the key requirements for the role. His proposed appointment was, therefore, recommended to the Board for approval.

The Nomination Committee also reviewed the structure, size and composition of the Board and was of the view that the current composition of the Board of three Executive Directors and three Non-Executive Directors (one of whom was considered to be independent for the purposes of the QCA Code) was appropriate at the present time. However, the structure, size and composition of the Board would be monitored and kept under review, and it remained the Board's intention to seek to appoint a second independent Non-Executive Director in due course.

The Nomination Committee has also noted that succession planning was a key area of consideration and that this would be reviewed by the Nomination Committee on an ongoing basis alongside the capability of the Senior Management team and Directors.

The Nomination Committee also considered the retirement and re-election of Directors, noting that all the current Directors, save for Paul Stockdale, had stood for election at the 2017 AGM, and therefore, only he would retire and, being eligible, would offer himself for election at the 2018 AGM.

AUDIT COMMITTEE REPORT

Audit Committee

The Audit Committee's principal functions include ensuring that the appropriate accounting systems and financial controls are in place, monitoring the integrity of the financial statements of the Group, reviewing the effectiveness of the Group's accounting and internal control systems, reviewing reports from the Group's Auditors relating to the Group's accounting and internal controls, and reviewing the interim and annual results and reports to shareholders, in all cases having due regard to the interests of shareholders.

The Audit Committee meets at least three times a year, with regard to the reporting and audit cycle. Alison Kibble has recent and relevant financial experience through her roles as CEO of other healthcare companies and acts as Chairman. David Williams is the other member of the Audit Committee.

No one other than the Audit Committee Chairman and the other member receive automatic invitations to meetings of the Audit Committee. The Chief Financial Officer and external Auditors are invited to attend meetings on a regular basis, and other non-members may be invited to attend all or part of any meeting as and when considered appropriate and necessary. The Company Secretary acts as secretary to the Audit Committee.

The Audit Committee intends to meet the external Auditor at least once a year without executive management present, and the Chairman of the Audit Committee keeps in touch on a continual basis with the key people involved in the Company's governance, including the Chief Executive Officer, the Chief Financial Officer, the Company Secretary and the external audit lead partner.

Summary of the role of the Audit Committee

The Audit Committee has primary responsibility for monitoring the quality of internal controls, ensuring that the financial performance of the Group is properly measured and reported on, and for reviewing reports from the Group's Auditors relating to the Group's accounting and internal controls, in all cases having due regard to the interests of shareholders. In the course of discharging its duties and responsibilities, the Audit Committee focuses particularly on compliance with legal requirements and accounting standards and on ensuring that an effective system of internal financial controls is maintained.

Its other areas of focus include reviewing and monitoring:

- the external Auditor's independence and objectivity and the effectiveness of the audit process, and making recommendations to the Board on the appointment and re-appointment of the Group's external Auditor;
- the integrity of the financial statements of the Group and any formal announcements relating to the Group's financial performance;
- the requirement for an internal audit function;
- the Group's internal financial controls and internal control and risk management systems; and
- the Group's whistleblowing, anti-bribery and fraud protection procedures;

The Audit Committee reports to the Board and the effectiveness of the Audit Committee is reviewed by the Board annually.

External auditors

The Audit Committee is responsible for making recommendations to the Board on the appointment, reappointment and removal of the external Auditor and assesses annually the qualifications, expertise, resources, remuneration and independence of the external Auditor. The Audit Committee also receive reports annually on the external audit firm's own internal quality control procedures. For each annual cycle, the Audit Committee undertakes to ensure that appropriate plans are in place for the external audit.

KPMG LLP are the Company's Auditor and were the Auditor of the Group for the financial year ended 30 September 2016. In accordance with professional standards, the KPMG LLP senior statutory auditor responsible for the audit is rotated every five years. The current senior statutory auditor was appointed in respect of the year ended 30 September 2017.

The Audit Committee annually reviews the effectiveness of the external Auditor. This process involves the external Auditor presenting to the Audit Committee its proposed audit scope, such presentation last having taken place in September 2017 in relation to the audit of the financial statements for the year ended 30 September 2017. The external Auditor also reports to the Audit Committee on its detailed year-end work and the Audit Committee challenges significant judgments (if any). In making its assessment of external Auditor effectiveness, the Audit Committee reviews the audit engagement letters before signature, reviews the external Auditor's summary of Company issues, and conducts an overall review of the effectiveness of the external audit process and the external Auditor. The Audit Committee reports its findings to the Board.

The Audit Committee and the Board have been satisfied with the performance of the external Auditor during the year, and with the policies and procedures they have in place to maintain their objectivity and independence. There are no contractual obligations restricting the Company's choice of external auditor.

The Audit Committee also approves in advance any non-audit services to be performed by the Auditor such as tax compliance and advisory work, and non-audit-related assurance services.

Any non-audit services that are to be provided by the external Auditor are reviewed in order to safeguard Auditor objectivity and independence. During the reporting period, non-audit services relating to the Company's Admission to AIM and tax compliance services have been provided by the external Auditor. Accordingly, the Board can confirm that during the reporting period there have been no non-audit services that are considered to have impaired the objectivity and independence of the external Auditor. A full breakdown of payments made to the external Auditor during the financial year is disclosed within note 8 on page 42.

Work undertaken by the Audit Committee

The Audit Committee met three times during the period since its establishment on 6 December 2016. Details of meeting attendance are shown in the Corporate governance report on page 16.

The key matters considered by the Audit Committee whilst discharging its duties and responsibilities are set out below:

- review and approval of the Annual Report and Accounts for the year ended 30 September 2016.
- consideration and approval of the unaudited interim financial statements for the period ended 31 March 2017
- discussions with the external Auditor on the audit approach and strategy, the audit process, significant audit risks and key matters of focus for the annual audit;

- review of the financial integrity of the Group's financial statements including relevant corporate governance statements;
- consideration and approval of the audit fees for the financial year ended 30 September 2017;
- review of new financial reporting standards;
- approval of non-audit work to be carried out by the external Auditor;
- consideration of the independence and objectivity of the external Auditor;
- review of the internal controls and risk management systems within the Group;
- consideration of the requirement for the Group to have an internal audit function;
- review of the effectiveness of the external Auditor, as more fully described above;
- approval of the continuing appointment of KPMG LLP as the Group's Auditor; and
- post-period, review of the Annual Report and Accounts for the year ended 30 September 2017.

The ultimate responsibility for reviewing and approving the financial statements in the interim and annual reports remains with the Board.

Significant issues related to the financial statements

The Audit Committee, in conjunction with the external Auditor, has considered significant issues relating to the preparation of the financial statements contained in this Annual Report as follows:

Revenue recognition

The Group's contracts with customers include research service contracts with different deliverables and payment milestones, and licence agreements. The payment milestones may not necessarily equate to the revenue recognition points. The determination of the number of revenue components contained in contracts and the appropriate revenue recognition points requires considerable judgement. The Audit Committee reviewed and challenged, where necessary, the judgements of Management, taking into account the views of the external Auditor, and was satisfied that those judgements made are appropriate.

Share options and warrants

The Audit Committee reviewed the assumptions and estimates used by Management in the calculation of share option and warrant-related charges, taking into account the views of the external Auditor, and was satisfied that the valuation methodologies adopted and estimates used are reasonable.

Risk management and internal control

The Board has overall responsibility for, and maintains a system of, internal controls, to safeguard shareholders' investment and the Group's assets, and has established a continuous process for identifying, evaluating and managing the significant risks the Group faces. The Board regularly reviews the process, which has been in place throughout the period and up to the date of approval of the Annual Report and Accounts.

The Board's internal control and risk management review process (conducted with the assistance of the Audit Committee), is outlined on page 16.

Internal audit

The Board considers the need for an internal audit function annually and in consultation with the Auditor has concluded that, given the current size of the Group's operations, it is not necessary at this time.

Going concern

The Group's business model is set out in the Strategic overview on page 3. As noted there, the Directors aim, in the medium to long term, to transition the Company's revenue model to one that is predominantly based upon licence revenue, whereby the Company aims to generate upfront and milestone payments and future royalties from licensing the *EpiSwitch*TM technology platform connected to a particular drug to multiple participants within the pharmaceutical and biotechnology industry.

In the short-to-medium term, the Group is expected to remain lossmaking as outlined in the table of principal risks on pages 6 and 7. The loss and operating cash outflow for the year ended 30 September 2017 are consistent with the Directors' expectations of the performance of the Group and Company at this stage in the development of its business model.

The Group has prepared detailed financial forecasts which show that, in the absence of significant revenue growth or further fundraising from investors, the Group could continue at planned activity levels for the next 4 years.

Given the above, and after making appropriate enquiries, the Directors have a reasonable expectation that the Group has adequate resources to continue in operational existence for the foreseeable future and the Board continues to adopt the going concern basis in preparing the financial statements.

Approved on behalf of the Board

Alison Kibble Chairman of the Audit Committee 29 January 2018

REMUNERATION COMMITTEE REPORT

Remuneration Committee

The Remuneration Committee was established on 6 December 2016. It considers all aspects of the Executive Directors' remuneration, including pensions, bonus arrangements, benefits, incentive payments and share option awards, and the policy for, and scope of, any termination payments. The remuneration of the Non-Executive Directors is a matter for the Board. The Remuneration Committee meets at least twice a year (and at such other times as may be deemed necessary). No Director may be involved in discussions relating to their own remuneration. Alison Kibble acts as Chairman of the Remuneration Committee and the other member is David Williams.

The Remuneration Committee met three times during the period since its establishment. Details of meeting attendance are shown in the Corporate governance report on page 14.

In discharging its responsibilities, the Remuneration Committee:

- considered and approved bonus awards for the period ended 31 December 2016;
- set bonus performance targets for the year ended 31 December 2017;
- · reviewed and approved a grant of share options; and
- reviewed and approved the remuneration package of the incoming Chief Financial Officer.

Post-period, the Remuneration Committee met to conduct a review of all aspects of the remuneration packages of the Executive Directors to ensure that they continue to reward and motivate achievement of medium and long-term objectives, and to align the interests of Executive Directors and shareholders.

Policy on executive remuneration

The policy of the Remuneration Committee is to ensure that the Executive Directors are rewarded for their individual contributions to the Company's overall performance, and to provide them with a fair and competitive remuneration package (including long-term incentive plans) to attract, retain and motivate individuals of the experience and competence required to ensure that the Company is managed effectively and successfully, having regard to the interests of shareholders. When setting the remuneration policy for Directors, the Remuneration Committee reviews, and has regard to, the pay and employment conditions across the Group and also within the sector in which the Group operates, especially when determining salary increases.

Policy on Non-Executive Directors' remuneration

Non-Executive Directors receive a fixed fee and do not receive any pensions payments or other benefits. No additional fees are payable in respect of membership of the Board's Committees.

Ordinarily, the Non-Executive Directors do not participate in bonus or incentive schemes. However, Alison Kibble was granted options prior to the IPO, further details of which are set out on page 21. In addition, through Wentworth Limited, of which he is the beneficial owner, David Williams was granted IPO-related warrants over ordinary shares, further details of which are set out on page 21.

The notice periods for all Non-Executive Directors are three months.

for the 2016 calendar year.

Executive Directors' remuneration package

The components of the remuneration package are base salary and benefits, bonuses, and pension contributions. Base salaries are reviewed by the Remuneration Committee annually, normally in January. The Senior Management Team may also receive bonuses, depending on whether certain financial, operational or strategic objectives are met. The annual standard bonus plan for the Executive Directors has a maximum threshold of between 20% and 30% of base salary and exceptional bonuses are considered at the Remuneration Committee's discretion. The benefits packages offered include private health insurance and payments to money purchase pension schemes. Notice periods for all Executive Directors are set at between three and six months.

Details of the emoluments of Directors who served during the current and prior years are also set out on the opposite page.

Share option scheme

The share options of the Directors are set out below:

¹As announced post-period on 13 December 2017, in order to ensure the continued alignment of the interests of shareholders and the option holders, in light of the liquidity of the Company's shares, the independent Directors of the Company approved an extension of the exercise period of certain options which were due to expire on 31 December 2017 unless exercised prior to that date. Those options will now expire on 31 December 2022. All other terms and conditions, including the exercise price, remain unchanged.

Warrants

Warrants held by Directors are set out below:

	30 September 2016 No.	Issued in the period No.	Exercised in the period No.	Lapsed in the period No.	30 September 2017 No.	Exercise price Pence	Expiry date
Non-Executive Directors							
D J Williams		1,721,964	_	_	1,721,964	158p	30 November 2019

On 30 November 2016, the Company granted warrants over ordinary shares representing 2.0 per cent of the post-IPO issued share capital (being 1,721,964 ordinary shares) to Wentworth Limited ("Wentworth") in consideration for Wentworth procuring Placees pursuant to the Placing and general corporate and strategic advice. David Williams, the Company's Chairman is the beneficial owner of Wentworth. 689,441 of these warrants were exchanged for 689,441 new ordinary shares on 4 December 2017. In accordance with the 'cashless exercise' provisions contained in the warrant instrument, the shares were issued at a nominal price of 1p per share, and Wentworth simultaneously waived its right to subscribe for shares under the remaining warrants.

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE ANNUAL REPORT AND THE FINANCIAL STATEMENTS

The Directors are responsible for preparing the Annual Report and the Group and Parent Company financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare Group and Parent Company financial statements for each financial year. Under the rules of the London Stock Exchange's AIM Market, they are required to prepare the Group financial statements in accordance with International Financial Reporting Standards ("IFRSs"), as adopted by the EU, and applicable law, and have elected to prepare the Parent Company financial statements on the same basis.

Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Group and Parent Company and of their profit or loss for that period. In preparing each of the Group and Parent Company financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with IFRSs as adopted by the EU;
- asses the Group and Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Group or Parent Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Parent Company's transactions and disclose with reasonable accuracy at any time the financial position of the Parent Company and enable them to ensure that its financial statements comply with the Companies Act 2006. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to prevent and detect fraud and other irregularities. Under applicable law and regulations, the Directors are also responsible for preparing a Strategic Report and a Directors' Report that complies with that law and those regulations.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF OXFORD BIODYNAMICS PLC

1. Our opinion is unmodified

We have audited the financial statements of Oxford BioDynamics Plc ("the Company") for the year ended 30 September 2017 which comprise the consolidated income statement, consolidated statement of comprehensive income, consolidated and company statements of financial position, consolidated and company statements of changes in equity, consolidated and company statements of cash flows and the related notes, including the accounting policies in note 3.

In our opinion:

- the financial statements give a true and fair view of the state of the Group's and of the Parent Company's affairs as at 30 September 2017 and of the Group's loss for the year then ended;
- the Group financial statements have been properly prepared in accordance with International Financial Reporting Standards as adopted by the European Union (IFRSs as adopted by the EU);
- the Parent Company financial statements have been properly prepared in accordance with IFRSs as adopted by the EU and as applied in accordance with the provisions of the Companies Act 2006; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

2. Key audit matters: our assessment of risks of material misstatement

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the financial statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation

The risk

Overview Materiality: £40,200 Group financial statements as a whole 1% of Group total expenditure excluding IPO costs Coverage 97% of Group loss before tax Risks of material misstatement Revenue (Group and Parent Company)

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the Group in accordance with, UK ethical requirements including the FRC Ethical Standard as applied to listed entities. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In arriving at our audit opinion above, the key audit matters were as follows:

Our response

Our procedures included:

Verification of contract terms

We inspected a sample of research service and licencing contracts and verified the key factors used in the accounting such as total value and billing milestones back to the contracts;

Assessing methodology

For each contract reviewed, we evaluated the Group's accounting method including the number of revenue components and the revenue recognition point against the requirements of IAS 18 Revenue. For research service contracts this included an assessment of management's evaluation of the stage of completion based on progress towards project milestones specified in the contract. Our assessment of this included discussion with laboratory management, review of deliverables and we sense checked the stage of completion with reviews of inputs such as hours. For licencing contracts this included an assessment of the remaining obligations, uncertainties in respect of future royalties and whether the contract is cancellable.

Mathematical accuracy

For the research service contracts in our sample where the stage of completion method was used we verified the mathematical accuracy of the calculation of revenue and deferred income.

Assessing disclosures

We assessed the adequacy of the Group's disclosures on revenue recognition.

Revenue (Group and Parent Company risk) £1.2million

Refer to note 3 (Significant accounting policies) and note 4 (Critical accounting judgements and key sources of estimation uncertainty).

Subjective estimate

Oxford BioDynamics have complex

contracts with customers which include research service contracts with different deliverables and payment milestones; and licencing contracts. The payment milestones may not necessarily equate to the revenue recognition points. The determination of when to recognise revenue for research service contracts requires judgment to estimate the stage of completion of each project at the reporting date. The determination of when to recognise licence contract income requires judgement as to whether the transaction is, in substance, a sale of an asset or right or whether the transaction is a licencing arrangement. These judgments could materially affect the timing and quantum of revenue recognised.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF OXFORD BIODYNAMICS PLC (continued)

3. Our application of materiality and an overview of the scope of our audit

Materiality for the Group financial statements as a whole was set at £40,200, determined with reference to a benchmark of Group expenditure, normalised to exclude this year's IPO costs as disclosed in note 7, of which it represents 1%.

This benchmark has been selected reflecting our assessment of matters relevant to shareholders post the listing.

Materiality for the Parent Company financial statements as a whole was set at £38,000, determined with reference to a benchmark of Company total expenses (excluding IPO costs), of which it represents 1%.

We agreed to report to the Audit Committee any corrected or uncorrected identified misstatements exceeding £2,010, in addition to other identified misstatements that warranted reporting on qualitative grounds.

Of the Group's 4 reporting components, we subjected one to a full scope audit for Group purposes and 3 to specified risk-focused audit procedures, including verification of revenue and cash and cash equivalents. The latter were not individually financially significant enough to require a full scope audit for Group purposes.

The components within the scope of our work accounted for the percentages illustrated opposite.

The Group audit team approved the component materialities, which ranged from £14,000 to £38,000, having regard to the mix of size and risk profile of the Group across the components. The audit work on all 4 components, including the audit of the Parent Company, was performed by the Group Audit team.

4. We have nothing to report on going concern

We are required to report to you if we have concluded that the use of the going concern basis of accounting is inappropriate or there is an undisclosed material uncertainty that may cast significant doubt over the use of that basis for a period of at least twelve months from the date of approval of the financial statements. We have nothing to report in these respects.

5. We have nothing to report on the other information in the Annual Report

The Directors are responsible for the other information presented in the Annual Report together with the financial statements. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work we have not identified material misstatements in the other information.

Strategic report and Directors' report

Based solely on our work on the other information:

- we have not identified material misstatements in the strategic report and the Directors' report;
- in our opinion the information given in those reports for the financial year is consistent with the financial statements; and
- in our opinion those reports have been prepared in accordance with the Companies Act 2006.

Full scope for group audit purposes 2016/17 Specified risk-focused audit procedures 2016/17 Residual components

6. We have nothing to report on the other matters on which we are required to report by exception

Under the Companies Act 2006, we are required to report to you if, in our opinion:

- adequate accounting records have not been kept by the Parent Company, or returns adequate for our audit have not been received from branches not visited by us; or
- the Parent Company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of Directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in these respects.

7. Respective responsibilities

Directors' responsibilities

As explained more fully in their statement set out on page 22, the Directors are responsible for: the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Group and Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

8. The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. Corporate information

The consolidated financial statements of Oxford BioDynamics PIc and its subsidiaries (collectively, "the Group") for the year ended 30 September 2017 were authorised for issue in accordance with a resolution of the Directors on 29 January 2017. Oxford BioDynamics PIc (the 'Company') is a public limited company incorporated in the United Kingdom, whose shares were admitted to trading on the AIM market on 6 December 2016. The Company is domiciled in the United Kingdom and its registered office is 26 Beaumont Street, Oxford OX1 2NP. The registered company number is 06227084 (England & Wales).

The Group is primarily engaged in biomarker research and development.

2. Basis of accounting

Basis of preparation

These consolidated financial statements and the financial statements of the Company have been prepared under the historical cost convention in accordance with the Companies Act 2006 and in accordance with International Financial Reporting Standards (IFRSs) as adopted by the EU ("adopted IFRSs") in response to the IAS regulation (EC 1606/2002).

The preparation of financial statements in compliance with adopted IFRSs requires the use of certain critical accounting estimates. It also requires the Group's management to exercise judgement in applying the Group's accounting policies. The areas for which significant judgements and estimates have been made in preparing the financial statements and their effect are disclosed in note 4.

Reporting currency

The consolidated financial statements are presented in pounds sterling (GBP), which is also the Company's functional currency.

Applicable accounting standards and interpretations issued but not yet adopted

At the date of authorisation of the consolidated financial statements, the following Standards and Interpretations which have been issued and endorsed by the EU (except where indicated), have not been applied by the Group in preparing the consolidated financial statements:

- IFRS 15 Revenue from Contracts with Customers (mandatory for years commencing on or after 1 January 2018)
- Recognition of Deferred Tax Assets for Unrealised Losses Amendments to IAS 12 (mandatory for years commencing on or after 1 January 2017)
- Disclosure Initiative Amendments to IAS 7 (mandatory for years commencing on or after 1 January 2017)
- IFRS 16 Leases (mandatory for years commencing on or after 1 January 2019)
- IFRS 9 Financial Instruments (mandatory for years commencing on or after 1 January 2018)
- Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts Amendments to IFRS 4 (mandatory for years commencing on or after 1 January 2018)

In addition, the following Standards and Interpretations are not yet EU-endorsed:

- Amendments to IFRS 2: Classification and Measurement of Share-Based Payment Transactions (effective date: 1 January 2018)
- Annual Improvements to IFRSs 2014-2016 Cycle (effective date: 1 January 2018)
- IFRIC Interpretation 22 Foreign Currency Transactions and Advance Consideration (effective date: 1 January 2018)
- Amendments to IAS 40 Investment Property (effective date: 1 January 2018)
- IFRIC 23 Uncertainty over Income Tax Treatments (effective date: 1 January 2019)
- Amendments to IAS 28 Investments in Associates and Joint Ventures (effective date: 1 January 2019)
- IFRS 17 Insurance contracts (effective date: 1 January 2021)
- Amendments to IFRS 9: Prepayment Features with Negative Compensation (effective date: 1 January 2019)
- Annual Improvements to IFRSs 2015-2017 Cycle (effective date: 1 January 2019)

The Directors are in the process of assessing whether the adoption of the standards listed above will have a material impact on the consolidated financial statements of the Group in future periods. The most significant are likely to be IFRS 15 *Revenue from Contracts with Customers* and IFRS 16 *Leases*. Adoption of IFRS 15 will be mandatory for the Group with effect from the year ending 30 September 2019; the Directors have not yet decided whether to adopt IFRS 15 early and have not yet determined the likely impact on the consolidated financial statements of doing so. IFRS 16 requires operating leases to be recognised on the balance sheet and is likely to have a significant impact in that the assets and liabilities for all operating leases with a term of more than 12 months under which the Group is a lessee (mainly rental properties) will be recognised on the balance sheet. Application of IFRS 16 is mandatory for the Group with effect from the year ending 30 September 2020. No detailed assessment of the likely impact of its adoption has been carried out to date.

Going concern

As noted in more detail in the Directors report, after making enquiries, the Directors have a reasonable expectation that the Company and the Group have adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the annual report and consolidated financial statements.

3. Significant accounting policies

The Group has consistently applied the following accounting policies to all periods presented in these consolidated financial statements.

Basis of consolidation

a) Business combinations

The Group accounts for business combinations using the acquisition method when control is transferred to the Group. The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Any goodwill that arises is tested annually for impairment. Any gain on a bargain purchase is recognised in profit or loss immediately. Transaction costs are expensed as incurred, except if related to the issue of debt or equity securities.

The consideration transferred does not include amount related to the settlement of pre-existing relationships. Such amounts are generally recognised in the profit or loss.

Any contingent consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent consideration that meets the definition of a financial instrument is classified as equity, then it is not remeasured and settlement is accounted for within equity. Otherwise, other contingent consideration is remeasured at fair value each reporting date and subsequent changes in fair value of the contingent consideration are recognised in profit or loss.

If share-based payment awards (replacement awards) are required to be exchanged for awards held by the acquiree's employees (acquiree's awards), then all or a portion of the amount of the acquirer's replacement awards is included in measuring the consideration transferred in the business combination. This determination is based on the market-based measure of the replacement awards compared with the market-based measure of the acquiree's awards and the extent to which the replacement awards relate to pre-combination service.

b) Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

When necessary, adjustments are made to the results of subsidiaries to bring their accounting policies into line with those used by other members of the Group.

c) Non-controlling interests

Non-controlling interests (NCI) are measured at their proportionate share of the acquiree's identifiable net assets at the date of acquisition.

Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

d) Loss of control

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related NCI and other components of equity. Any resulting gain or loss is recognised in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

e) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated. Unrealised gains arising from transactions with equity-accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the provision of services and licences in the ordinary course of the Group's activities. Revenue is shown net of sales taxes, discounts and after eliminating intra-group sales.

a) Provision of services

The Group recognises revenue for services when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the entity;
- the stage of completion of the transaction at the end of the reporting period can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

The Group recognises revenue from the rendering of its research service contracts in proportion to the stage of completion of the transaction at the reporting date. The stage of completion is assessed based on progress towards project milestones specified in the contract.

Revenue recognised in the income statement but not yet invoiced is held on the balance sheet within 'Trade and other receivables'. Revenue invoiced but not yet recognised in the income statement is held on the balance sheet within 'Deferred revenue'.

(CONTINUED)

3. Significant accounting policies (continued)

Revenue recognition (continued)

b) Upfront licence fees

Revenue generated from entering licence agreements is recognised upon signing the contract if the licence contract is, in substance, a sale of an asset or right as the risks and rewards have transferred to the licensee. Revenue generated from entering licence agreements is spread over the life of the contract if the substance of the transaction is a licencing arrangement.

c) Interest income

Interest income is recognised when it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

d) Government grants

Government grants are included within Other Operating Income and are recognised so as to match the expenditure to which they are intended to contribute. Government grants comprise amounts from Innovate UK to support the Group's biomarker research and development activities whereby 60% of eligible costs incurred can be claimed for. There are no unfilled conditions or contingencies relating to grant income recognised in the income statement.

Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases. Rentals payable under operating leases are charged to income on a straight-line basis over the term of the relevant lease.

In the event that lease incentives are received at the time the entity enters into an operating lease agreement, such incentives are recognised as a liability and recycled through profit and loss over the term of the lease agreement. The aggregate benefit of incentives is recognised in profit and loss as a reduction to rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

Foreign currencies

The individual financial statements of each subsidiary are presented in the currency of the primary economic environment in which it operates (its functional currency). Sterling is the predominant currency of the Group and presentation currency for the consolidated financial statements.

In preparing the financial statements of the individual companies, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognised in profit or loss in the period in which they arise except for:

- exchange differences on transactions entered into to hedge certain foreign currency risks (see below under financial instruments/hedge accounting); and
- exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely
 to occur (therefore forming part of the net investment in the foreign operation), which are recognised initially in other comprehensive income
 and reclassified from equity to profit or loss on disposal or partial disposal of the net investment.

For the purpose of presenting consolidated financial information, the assets and liabilities of the Group's foreign operations are translated at exchange rates prevailing on the balance sheet date. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the date of transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity (attributed to non-controlling interests as appropriate).

Retirement benefit costs

Payments to personal pension schemes of employees are charged as an expense as they fall due.

Holiday pay accrual

The Group recognises a provision for annual leave accrued by employees as a result of services rendered in the current period, in order to account for the timing difference between the Group's holiday year and its financial year. The provision is measured at the salary cost (including employer's national insurance contributions) payable for the period of absence.

Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated.

a) Dilapidations

Provisions for dilapidations are recognised on a lease by lease basis and are based on the Group's best estimate of the likely committed outflow.

Taxation

The tax expense represents the sum of the tax currently payable and deferred tax.

a) Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Full provision is made for research and development tax credits calculated at the tax rates effective for the current year. It is included as an income tax credit under trade and other receivables.

b) Deferred tax

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered in the foreseeable future.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on tax laws and rates that have been enacted at the balance sheet date. Deferred tax is charged or credited in the income statement, except when it relates to items charged or credited in other comprehensive income, in which case the deferred tax is also dealt with in other comprehensive income.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

Tangible and intangible assets

a) Property, plant and equipment

The Group has held no land and buildings in the period covered by these financial statements.

Other items of property, plant and equipment are stated at cost less accumulated depreciation and any recognised impairment loss.

Depreciation is recognised so as to write off the cost or valuation of assets less residual value over their useful lives, using the straight-line method, on the following bases:

3 years
3 years
5 years
Life of lease

The gain or loss arising on the disposal of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in income on the transfer of the risks and rewards of ownership.

The Group has no class of tangible fixed asset that has been revalued in the period covered by the consolidated financial statements.

b) Research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset is recognised only if all of the following conditions are met:

- an asset is created that can be identified (such as product designs and new processes);
- it is probable that the asset created will generate future economic benefits; and
- the costs of developing this asset can be measured reliably.

To the extent that the above criteria are not met, any development costs are recognised as an expense in the period in which they are incurred.

(CONTINUED)

3. Significant accounting policies (continued)

Tangible and intangible assets (continued)

c) Patents

Patent costs, both those incurred at initial registration and those subsequently incurred on renewal, are expensed to the income statement.

d) Impairment of tangible and intangible assets

At each balance sheet date, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. An intangible asset with an indefinite useful life is tested for impairment at least annually and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of: (i) fair value less costs to sell and (ii) value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease to the extent that the revaluation balance is greater than the impairment loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised in prior years for the asset (or cash-generating unit). A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and, where applicable, direct labour costs, and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using either the First-In-First-Out method or, for fast moving items, the average cost method. Net realisable value represents the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances, demand deposits and term deposits with an initial maturity of less than three months.

Financial instruments

Financial assets and financial liabilities are recognised in the Group's balance sheet when the Group becomes a party to the contractual provisions of the instrument.

a) Financial assets

All financial assets are normally recognised and derecognised on a trade date basis where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the timeframe established by the market concerned, and are initially measured at fair value, plus transaction costs, except for those financial assets classified as at fair value through profit or loss, which are initially measured at fair value. On derecognition however, where a specific transaction is entered into with a counterparty that is judged to carry a high credit or liquidity risk, then management may determine that derecognition of the financial asset shall be based on settlement date rather than trade date, with any realised gain or loss taken to profit and loss on date of settlement.

Financial assets are classified into the following specified categories: financial assets at 'fair value through profit or loss' ("FVTPL"), 'held-to-maturity' investments, 'available-for-sale' ("AFS") financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL.

Classes of financial asset

- *Financial assets at FVTPL* The Group holds no financial assets classified as financial assets at fair value through profit or loss.
- Held-to-maturity investments
 The Group holds no financial assets classified as held-to-maturity investments.
- Available for sale financial assets The Group holds no financial assets classified as available for sale.
- Loans and receivables

Trade receivables, loans, and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. Loans and receivables are measured at amortised cost using the effective interest method, less any impairment. Interest income is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at each balance sheet date. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For listed and unlisted equity investments classified as AFS, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For all other financial assets, including finance lease receivables, objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- · default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation.

For certain categories of financial asset, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortised cost, the amount of the impairment is the differences between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

b) Financial liabilities and equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

Financial liabilities are classified as either financial liabilities 'at FVTPL' or 'other financial liabilities'.

- Financial liabilities at FVTPL
 - The Group holds no financial liabilities classified as financial liabilities at fair value through profit or loss.
- Other financial liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

(CONTINUED)

3. Significant accounting policies (continued)

Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire.

Costs charged directly to equity

Costs relating directly to the issue of new shares have been deducted from the share premium reserve. Costs relating jointly to the Company's IPO and the issue of new shares have been allocated between share premium and the income statement by considering the number of shares newly issued at the time of the IPO as a proportion of the total number of shares in issue immediately following the IPO.

4. Critical accounting judgements and key sources of estimation uncertainty

In the application of the Group's accounting policies, which are described in note 3, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgements in applying the Group's accounting policies

The following are the critical judgements that the Directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements.

Revenue recognition

For revenue arising from the provision of research services, Management is satisfied that revenue has been recognised appropriately for the stage of the contracts at the reporting date based on reliable estimates. This requires management to estimate for each project the stage of completion at the reporting date based on an analysis of information from the laboratory-based team and analysis of progress towards project milestones specified under the terms of customer contracts. Deferred income at 30 September 2017 is £311,000 (2016: £286,000) which represents revenue invoiced but not yet recognised in the income statement. A change in estimate of the stage in completion at the reporting date would result in more of this balance being recognised as revenue or less revenue being recognised in the year.

Included within revenue for the year ended 30 September 2017 is an amount of £538,000 in respect of upfront licence fee income. There were no such fees recorded in the year ended 30 September 2016. The determination of the appropriate accounting treatment for upfront licence fees requires judgement, notably whether there are any continuing obligations in respect of the licences and whether the risks and rewards had transferred to the licensee. This involves the consideration of whether contracts are cancellable, any remaining obligations and uncertainties in respect of future royalties.

As at 30 September 2017, the Group has not yet earned any royalty income on licence contracts.

Key sources of estimation uncertainty

Management is required to disclose information relating to any key assumptions concerning the future, and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Share option scheme and warrants

The Company has established a share option scheme ('the Scheme') through which options to purchase shares in the Company may be granted to certain individuals. The fair value of the options issued under the Scheme is derived by the Company using a Black-Scholes model and the resultant values are allocated to the income statement over the vesting period (typically one, two or three years). The Company also issued warrants during the period. The fair value of the warrants was derived using a Monte Carlo model.

In arriving at the fair value of options and warrants using these models, Management have used judgement in arriving at the estimated share price volatility which is a key input to the valuation models. A 10% change in the level of volatility used would have an impact on the loss for the year of approximately £10,000 (in the case of share options) or £50,000 (in the case of warrants). Further details regarding the options and warrants granted and outstanding under the Scheme are set out in note 27.

Operating lease commitments

The Group has entered into commercial property leases as a lessee of property, plant and equipment. The classification of such leases as operating or finance lease requires the Group to determine, based on an evaluation of the terms and conditions of the arrangements, whether it retains or acquires the significant risks and rewards of ownership of these assets and accordingly whether the lease requires an asset and liability to be recognised in the statement of financial position.

5. Revenue

An analysis of the Group's revenue is as follows:

	2017 £000	2016 £000
Continuing operations USA Rest of World	310 873	795 296
Consolidated revenue	1,183	1,091

All revenue is derived from the Group's principal activity, biomarker research and development.

6. Business segments

Products and services from which reportable segments derive their revenues

Information reported to the Group's Chief Executive (who has been determined to be the Group's Chief Operating Decision Maker) for the purposes of resource allocation and assessment of segment performance is focused on the sole service which Oxford BioDynamics sells. The Group's sole reportable segment under IFRS 8 is therefore that of biomarker research and development.

The Group's non-current assets, analysed by Geographical location were as follows:

	2017 £000	2016 £000
Non-current assets UK Malaysia	662 103	576 95
Total non-current assets	765	671

Information about major customers

The Group's revenues for the periods covered by this report are derived from a small number of customers, many of which represent more than 10% of the revenue for the period. These are summarised below:

	2017 £000	2016 £000
Revenue from individual customers each representing more than 10% of revenue for the period:	893	1,019

7. Loss for the year

Loss for the year has been arrived at after charging/(crediting):

	Note	2017 £000	2016 £000
Net foreign exchange losses/(gains)		116	(183)
Research and development costs (excluding staff costs)		407	516
Government grants		(193)	(141)
Depreciation and impairment of property, plant and equipment	17	242	166
(Profit) on disposal of property, plant and equipment		_	
Operating lease rental expense	29	110	108
Staff costs	11	1,551	1,146
Initial public offering costs		1,490	447
Share based payments charge to profit and loss	27	398	402

Research and development costs consist of inventories recognised as an expense as disclosed in note 19 and other costs of materials and services.

(CONTINUED)

8. Auditor's remuneration

	2017 £000	2016 £000
Fees payable to the Group's auditors:		
Annual audit	37	30
Other services pursuant to taxation	13	—
Other services in connection with the IPO prior to appointment as auditors	41	132
	91	162

9. Finance income

	2017 £000	2016 £000
Bank deposit interest Exchange gains	88	71 183
Finance income	88	254

10. Finance costs

	2017 £000	2016 £000
Bank interest Exchange losses	1 116	=
Finance costs	117	_

11. Staff costs

	2017 £000	2016 £000
Wages and salaries Social security costs Other pension costs	1,348 132 71	961 116 69
	1,551	1,146

The average number of persons, including Executive Directors, employed by the Group during the year was as follows:

	2017 Number	2016 Number
General and administration	28	23
	28	23

12. Income tax

	2017 £000	2016 £000
Current tax: UK corporation tax credit at rates: 2017: 19.50% (2016: 20.00%) Over-provision of tax credit in prior periods Foreign income tax	(330) 102 —	(362) 18 —
Total current tax charge/(credit)	(228)	(344)
Deferred tax: Origination and reversal of temporary differences	_	_
Total tax expense/(credit)	(228)	(344)

The tax credits assessed for the two years ended 30 September 2017 and 30 September 2016 related entirely to R&D tax credit relief. Taxation for the overseas subsidiaries is calculated at the rates prevailing in the respective jurisdictions.

The tax charge for the year can be reconciled to the loss per the income statement as follows:

	2017 £000	2016 £000
Loss before tax on continuing operations	(4,032)	(2,074)
Weighted average corporation tax rate for the year Tax at the above rate on loss for the year	19.7% (795)	20.00% (415)
Tax effect of:Expenses that are not deductible in determining taxable profitEnhanced R&D expenditureOver-provision of R&D tax credit in prior periodsTrading losses surrendered for R&D tax creditUnrecognised deferred tax assetNon-trading loan relationship creditShare-based paymentsDepreciation in excess of capital allowancesOther timing differences	295 (255) 102 107 275 (17) 78 (22) 4	96 (282) 18 137 55 (13) 80 (20)
Tax credit for the year	(228)	(344)

Factors affecting the future tax charge

A reduction in the UK corporation tax rate from 20% to 19% (effective from 1 April 2017) was substantively enacted on 26 October 2015. A further reduction to 17% (effective 1 April 2020) was substantively enacted on 6 September 2016. This will reduce the Company's future current tax charge accordingly.

There is an unrecognised deferred tax asset at 30 September 2017 of approximately £2,542,000 (2016: £827,000) in respect of tax losses carried forward and unexercised share options. The asset has not been recognised in respect of these due to uncertainty over its recoverability.

13. Dividends

No dividends have been declared for the year ended 30 September 2017 (2016: £nil).

14. Profit of Parent Company

As permitted by Section 408 of the Companies Act 2006, the profit and loss account of the Parent Company is not presented as part of these financial statements. The Parent Company's loss for the financial year ended 30 September 2017 was £3,818,000 (2016: £1,935,000 loss).

(CONTINUED)

15. Earnings per share

From continuing operations

The calculation of the basic and diluted earnings per share is based on the following data:

	2017 £000	2016 £000
Earnings for the purposes of basic earnings per share being net loss attributable to owners of the Company	(3,804)	(1,730)
Earnings for the purposes of diluted earnings per share	(3,804)	(1,730)
	2017 No	2016 No
Number of shares Weighted average number of ordinary shares for the purposes of basic and diluted earnings per share*	85,272,526	81,600,000
Earnings per share Basic and diluted earnings per share	Pence (4.5)	Pence (2.1)

*Potential ordinary shares are not treated as dilutive as the entity is loss making.

16. Intangible fixed assets

18. Subsidiaries

Company	Group Undertakings £000	Total £000
Cost At 1 October 2016 and 30 September 2017	524	524
Amounts written off At 1 October 2016 Written off/(back) in year	243	243
At 30 September 2017	243	243
Carrying amount At 30 September 2017	281	281
At 30 September 2016	281	281

All subsidiary undertakings of the Company, listed below, are included in the consolidated financial statements of the Group:

Name	Country of registration or incorporation	Principal activity	Class of shares	2017 %	2016 %
Oxford BioDynamics Pte Ltd	Singapore	Diagnostic research	Ordinary	100	100
Oxford BioDynamics Australia Pty Ltd	Australia	Dormant	Ordinary	86	86
Oxford BioDynamics (Cardiovascular) Pte Ltd	Singapore	Dormant	Ordinary	n/a	100
Oxford BioDynamics (Hepa) Pte Ltd	Singapore	Dormant	Ordinary	n/a	100
Oxford BioDynamics (M) SDN BHD	Malaysia	Diagnostic research	Ordinary	100	100

Oxford BioDynamics (Hepa) Pte Limited and Oxford BioDynamics (Cardiovascular) Pte Limited were struck off in March 2016 and July 2016 respectively.

19. Inventories

		Group		Company
	2017	2016	2017	2016
	£000	£000	£000	£000
Laboratory consumables	90	105	75	69

The cost of inventories recognised as an expense during the year was as follows:

	2017 £000	Group 2016 £000	2017 £000	Company 2016 £000
Cost of inventories recognised as an expense	271	345	247	330

No inventories have been pledged as security against borrowings during the 30 September 2017 financial year or the prior year.

20. Trade & other receivables

	2017 £000	Group 2016 £000	2017 £000	Company 2016 £000
Amounts receivable for the provision of services Income taxes recoverable Amounts owed by Group undertakings Other debtors Prepayments and accrued income	31 590 — 121 287	340 362 	31 590 803 120 285	340 362 39 147 113
	1,029	965	1,829	1,001

Trade receivables disclosed above are classified as loans and receivables and are measured at amortised cost.

The average credit period offered to customers during the year ended 30 September 2017 was 10 days (2016: 50 days). The average days sales outstanding ("DSO") in 2017 was 61 days (2016: 114 days).

The Group has not charged interest for late payment of invoices in the year ended 30 September 2017 (2016: £nil). No allowances are made in relation to doubtful debts in view of the blue-chip nature of the Group's customers and by reference to past default experience.

Before accepting any significant new customer, the Group assesses the potential customer's credit quality. The Company enters into commercial biomarker projects with a number of customers, the majority of which are global pharmaceutical and biotechnology companies. Because the contracts in which the Company is involved tend to be invoiced by means of milestone payments covering a substantial portion of the whole project, this may distort the credit exposure profile at certain points during the financial period. Accordingly, at 30 September 2017, the proportion of revenue attributable to one customer was 56% (2016: 64%), but the Directors are of the view that this does not signify that there is more than a low to moderate risk in this respect, and this is borne out by the Company's history of having had no bad debts throughout the period.

Trade receivables disclosed above include no amounts which are past due at the year-end (see ageing analysis below). Accordingly, the Group has not recognised an allowance for doubtful receivables. There has not been a significant change in credit quality and all amounts are considered recoverable.

Ageing of trade receivables (none of which are considered to be impaired):

	2017 £000	Group 2016 £000	2017 £000	Company 2016 £000
Not overdue	31	348	31	348
Overdue between 0-30 days	-	—	-	—
Overdue between 31-60 days Overdue between 61-90 days	_	_	_	
Overdue between 91-120 days	_	—	_	_
Overdue more than 120 days	—	(8)	—	(8)
	31	340	31	340

The Directors consider that the carrying amount of trade and other receivables approximates to their fair value.

21. Cash and cash equivalents

	2017 £000	Group 2016 £000	2017 £000	Company 2016 £000
Cash and bank balances	10,795	7,279	9,386	6,730

Cash and cash equivalents comprise cash and short-term bank deposits with an original maturity of three months or less, net of outstanding bank overdrafts. The Directors consider the carrying amount of these assets to be approximately equal to their fair value.

(CONTINUED)

22. Share capital of the Company

	2017	2017	2016	2016
	Number	£	Number	£
Authorised shares Ordinary shares of £0.01 each	86,098,228	860,982	81,600,000	816,000

The Company has one class of ordinary shares which carry no right to fixed income.

On 6 December 2016, the Company issued 4,498,228 ordinary shares of £0.01 at its Admission to trading on AIM.

On 24 August 2016 the Company issued, by way of a share premium capitalisation, 8,132,800,000 bonus shares of £0.001 as part of a capital reorganisation. The £0.0001 shares were consolidated into shares of £0.01 each as a result of this process.

The Company has a number of shares reserved for issue under an equity-settled share option scheme and in respect of warrants; further details are disclosed in note 27.

23. Reserves

The following describes the nature and purpose of each reserve within equity:

Reserve	Description and purpose
Share premium:	Amount subscribed for share capital in excess of nominal value
Translation reserve:	Gains/losses arising on retranslating the net assets of overseas operations into GB pounds
Share option reserve:	Reserve account for share option equity based transactions
Warrant reserve:	Reserve account for warrants-related equity based transactions
Retained earnings:	All other net gains and losses and transactions not recognised elsewhere

24. Trade and other payables

	2017 £000	Group 2016 £000	2017 £000	Company 2016 £000
Trade payables Other creditors including other taxes and social security Accruals and deferred income	255 45 727	275 53 905	254 45 659	275 53 903
	1,027	1,233	958	1,231

Trade payables principally comprise amounts outstanding for trade purchases and ongoing costs. The average credit period taken for trade purchases was 30 days (2016: 30 days). No interest costs have been incurred in relation to trade payables. The Group's policy is to ensure that payables are paid within the pre-agreed credit terms and to avoid incurring penalties and/or interest on late payments.

Other creditors include sales taxes, property taxes, social security and employment taxes due to local tax authorities.

Accruals and deferred income principally comprise accrued overhead expenses and deferred project revenue for which certain delivery or performance obligations remain outstanding at the period end.

The Directors consider that the carrying amount of trade and other payables is approximately equal to their fair value.

25. Provisions

Group & Company	Property dilapidations £000	Total £000
At 1 October 2016	44	44
Arising during the year	13	13
At 30 September 2017	57	57

Property dilapidations

The property dilapidations provision is based on the future expected repair costs required to restore the Group's leased buildings to their fair condition at the end of their respective lease term.

26. Deferred tax

Deferred tax relates to the following:

	Statement of financial position		Consolidated income statement	
Group & Company	2017 £000	2016 £000	2017 £000	2016 £000
Accelerated tax depreciation Unrelieved tax losses	(81) 81	(72) 72	(9) 9	(16) 16
Deferred tax expense/(income)			—	_
Net deferred tax asset/(liability)	_	_		

The Group offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

Deferred tax assets have not been recognised in respect of the following items, because it is not probable that future taxable profit will be available against which the Group or Company can benefit therefrom:

Group & Company	Unrelieved tax losses £000	Share-based payments £000	0ther £000	Total £000
At 1 October 2016 Movement in year including impact of tax rate changes	312	515	—	827
and vesting of share options	478	1,223	14	1,715
At 30 September 2017	790	1,738	14	2,542

27. Share based payments

Equity-settled share option scheme

In November 2016, the Company established an Enterprise Management Incentive ("EMI") share option scheme, under which options have been granted to certain employees, and a non-employee option scheme with similar terms, except that options granted under it do not have EMI status. EMI and non-EMI share options were also previously granted under a share option scheme established in October 2008 ("the 2008 Scheme"). The Company does not intend to grant any further options under the 2008 Scheme. All of the schemes are equity-settled share based payment arrangements, whereby the individuals are granted share options of the Company's equity instruments, namely ordinary shares of 1 pence each.

The schemes include non-market-based vesting conditions only, whereby the share options may be exercised from the date of vesting until the 10th anniversary of the date of the grant. In most cases options vest under the following pattern: one-third of options granted vest on the first anniversary of the grant date; one-third on the second anniversary and one-third on the third anniversary. The only exception to this pattern is 84,000 options which were granted in the year ended 30 September 2016 which vested immediately upon grant.

The options outstanding as at 30 September 2017 have exercise prices in the range of £0.34 to £1.58. Following the capital reorganisation on 24 August 2016 as disclosed in note 22, the number of options outstanding was increased by a multiple of three, and the exercise price of options was a third of the original exercise price.

(CONTINUED)

27. Share based payments (continued)

	Number of options	2017 Weighted average exercise price £	Number of options	2016 Weighted average exercise price £
Outstanding at start of period Capital reorganisation	7,636,716	0.51	2,620,472 5,240,944	1.50
	7,636,716		7,861,416	
Granted during the period Forfeited during the period Exercised during the period	575,000 (410,000) —	1.58 (1.06)	720,300 (945,000) —	1.14 0.83
Outstanding at end of period	7,801,716	0.56	7,636,716	0.51
Exercisable at end of period	6,813,516	0.45	6,556,916	0.41
Weighted average remaining contractual life (in years) of options outstanding at the period end		2.93		3.60

	2017 £000	2016 £000
Expense arising from share-based payment transactions	398	402

The fair value of share options has been estimated using the Black-Scholes option pricing model. Volatility has been estimated by reference to historical share price data over a period commensurate with the expected term of the options awarded. The assumptions for the options granted during the current and prior periods were as follows:

	2017 £000	2016 £000
Share price at date of grant	£1.33 to £162	£1.25
Exercise price	£1.58	£1.25
Expected volatility	50% to 62%	78% to 80%
Dividend yield	0%	0%
Contractual life of option	10 years	10 years
Risk free interest rate	1.2% to 1.5%	1.45% to 2.03%

Warrants	2017 Number of warrants	2017 Exercise price £	2016 Number of warrants	2016 Exercise price £
Outstanding at start of period	_	_	_	_
Granted during the period Exchanged during the period	1,721,964 —	1.58 —		
Outstanding at end of period	1,721,964	1.58		_
Exchangeable at end of period	_	—	_	_
Weighted average remaining contractual life (in years) of warrants outstanding at the period end		2.2		_

The warrants became exchangeable if the Company's share price (measured as a 20-day average) exceeded £2.37 (being 150% of the IPO price of £1.58) during the three year period following grant.

The fair value of warrants has been estimated using a Monte Carlo model, using the assumptions set out in the table below. Volatility has been estimated by reference to historical share price data over a period commensurate with the expected term of the warrants.

	2017 £000
Share price at date of grant	£1.58
Exercise price	£1.58
Hurdle price	£2.37
Expected volatility	47%
Dividend yield	0%
Contractual life of warrants	3 years
Risk free interest rate	0.2%

28. Retirement benefit schemes

Defined contribution schemes

The Group contributes to the personal pension schemes of individual employees.

Other than amounts that are deducted from employees' remuneration and accrued pending payment to the individuals' pension schemes, no further obligations fall on the Group as the assets of these arrangements are held and managed by third parties entirely separate from the Group.

The pension charge for the period represents contributions payable to the pension schemes of individual employees and these amounted to £71,000 for the year ended 30 September 2017 (2016: £69,000). Contributions owed to the schemes at 30 September 2017 amounted to £1,620 (2016: £nil).

29. Commitments & contingencies

Operating lease commitments

	2017 £000	Group 2016 £000	2017 £000	Company 2016 £000
Minimum lease payments under operating leases recognised as an expense during the year	110	108	104	108

Future minimum lease payments under non-cancellable operating leases are as follows:

	2017 £000	Group 2016 £000	2017 £000	Company 2016 £000
Within one year In the second to fifth years inclusive After five years	96 358 171	81 366 247	90 357 171	81 366 247
	625	694	618	694

Operating lease payments typically represent rentals payable by the Group for its office properties together with office and laboratory equipment. Rent reviews and break clauses apply to leased property agreements.

30. Financial instruments

Capital risk management

The Group manages its capital to ensure entities within the Group are able to continue as going concerns while maximising the return to stakeholders.

The capital structure of the Group consists of equity attributable to equity holders of the parent, comprising issued capital, reserves and retained earnings as disclosed in the Group and Company statements of changes in equity on pages 30 and 31 and notes 22 and 23.

The Group is not subject to any externally imposed capital requirements. Equity includes all capital and reserves of the Group that are managed as capital.

(CONTINUED)

30. Financial instruments (continued)

Categories of financial instruments

	Note	2017 £000	Group 2016 £000	2017 £000	Company 2016 £000
Financial assets Cash and cash equivalents Trade and other receivables	21 20	10,795 1,029	7,279 965	9,386 1,829	6,730 1,001
		11,824	8,244	11,215	7,731
Financial assets Amortised cost Trade and other payables	24	1,027	1,233	958	1,231
		1,027	1,233	958	1,231

Fair value of financial instruments

Management has assessed that the fair values of cash and short-term deposits, trade receivables, trade payables and other current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments. Accordingly, none of the bases for valuation under the fair value hierarchy set out in IFRS 13 'Fair Value Measurement' have been deployed in arriving at the values shown above.

Financial risk management objectives

The Group's finance function is responsible for all aspects of corporate treasury. It co-ordinates access to financial markets, monitors and manages the financial risks relating to the operations of the Group through internal reports which analyse exposures by degree and magnitude. The risks reviewed include market risk (including currency risk, fair value interest rate risk and price risk), credit risk, liquidity risk and cash flow interest rate risk.

Market risk

The Group's activities expose it primarily to the financial risks of changes in foreign currency exchange rates (see below). The Group currently uses natural hedges to mitigate its foreign currency transactions.

Foreign currency risk management

The Group undertakes transactions denominated in foreign currencies; consequently exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters, utilising natural hedging where appropriate.

The carrying amounts of the Group's and Company's foreign currency denominated monetary assets and monetary liabilities at the relevant period end dates are as follows:

	Liabi	Liabilities		Assets	
Group	2017 £000	2016 £000	2017 £000	2016 £000	
US dollar Singapore dollar Euro Australian dollar Malaysian ringgit	(1) (2) (1) (1)	(2) (28) 	2,008 523 4 135 23	1,194 296 31 134 34	
Outstanding at end of period	(5)	(30)	2,693	1,689	

	Liabi	lities	Assets		
Company	2017 £000	2016 £000	2017 £000	2016 £000	
US dollar	(1)	_	1,037	1,106	
Singapore dollar Euro	_	(28)	4	31	
Australian dollar Malaysian ringgit					
Outstanding at end of period	(1)	(28)	1,041	1,137	

Foreign currency sensitivity analysis

The Group is mainly exposed to the US dollar and the Singapore dollar.

The following table details the Group's sensitivity to a 10% weakening in the pound sterling against the relevant foreign currencies. 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of a reasonably possible movement in foreign exchange rates over the medium term (3-12 months). The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign currency rates.

For a 10% strengthening of the pound sterling against the relevant currency, there would be a comparable impact on the profit and other equity, and the balances below would be negative.

	US dolla	Singapore dollar impact		
Group	2017 £000	2016 £000	2017 £000	2016 £000
Profit/(loss)	201	119	52	29
	US dolla	r impact	Singapore d	ollar impact
	2017	2016	2017	2016

£000

104

£000

111

£000

£000

In Management's opinion, the sensitivity analysis is representative of the inherent foreign exchange risk through the year.

Interest rate risk management

The Group is not currently exposed to interest rate risk because it does not have any external borrowings.

Credit risk management

Company

Profit/(loss)

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group is primarily exposed to credit risk in respect of its cash and cash equivalents and trade receivables.

The Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group makes appropriate enquiries of the counter party and independent third parties to determine credit worthiness. Use of other publicly available financial information and the Group's own trading records is made to rate its banking counterparties and major customers. The Group's exposure and the credit worthiness of its counterparties are continuously monitored and the aggregate value of transactions is spread amongst approved counterparties. Credit exposure is also controlled by counterparty limits that are reviewed and approved by Group management continuously.

The vast majority of the Group's cash and cash equivalents are invested either with systemic UK and global banks or UK banks with a Tier 1 Capital ratio significantly in excess of the current regulatory recommendation. Cash is invested in short-term deposits, breakable term deposits or notice accounts which allow for instant access to funds if necessary.

Trade receivables consist of a small number of customers, spread across various geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable.

The Group enters into commercial biomarker projects with a number of customers, the majority of which are global pharmaceutical and biotechnology companies. Because the contracts in which the Group is involved tend to be invoiced by means of milestone payments covering a substantial portion of the whole project, this may distort the credit exposure profile at certain points during the financial period. Accordingly, for the year ended 30 September 2017 the proportion of revenue attributable to one customer was 56% (2016: 64%), but the Directors are of the view that this does not signify that there is more than a low to moderate risk in this respect, and this is borne out by the Company's history of having had no bad debts throughout the period covered by this report.

The carrying amount recorded for financial assets in the consolidated financial statements is stated net of impairment losses and represents the Group's maximum exposure to credit risk. No guarantees have been given in respect of third parties.

(CONTINUED)

30. Financial instruments (continued)

Liquidity risk management

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities. To counter this risk, the Group operates with a high level of cash and no bank debt. In addition, it benefits from a substantial proportion of revenue paid in advance when entering into biomarker projects with customers.

The following table details the Group's expected maturity for its non-derivative financial assets. The tables below have been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary to understand the Group's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Group	Weighted average effective interest rate %	Less than 1 month £000	1-3 months £000	3 months to 1 year £000	1-5 years £000	5+ years £000	Total £000

N/ · · · · · · · · · · · · ·							
Variable interest rate instruments	0.95%	6,259					6,259

The maturity of non-derivative financial liabilities, comprising trade payables and other creditors, is less than 3 months for each of the two financial period ends.

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the relevant year-ends presented above.

Fair value of financial instruments

Fair value of financial instruments carried at amortised cost.

The Directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the financial statements approximate to their fair values.

....

31. Events after the balance sheet date

As noted in the Directors' report, on 4 December 2017 689,441 warrants held by Wentworth Limited were exercised in exchange for the issue of 689,441 ordinary shares of 1 pence each. The warrant exchange was effected at the nominal price of 1 pence per ordinary share and, in accordance with the terms of the warrant instrument, Wentworth simultaneously waived its subscription rights to the balance of 1,032,523 warrant shares previously held.

On 13 December 2017, the exercise period for options over a total of 4,038,004 ordinary shares was extended from 31 December 2017 to 31 December 2022.

On 20 December 2017 a total of 692,304 options were exercised at an exercise price of 34p per share.

32. Related party transactions

Ultimate controlling party

There is no ultimate controlling party.

Subsidiaries

Balances and transactions between the Parent Company and its subsidiaries, which are related parties, have been eliminated on consolidation and are therefore not disclosed.

Other related parties

During the year ended 30 September 2017, the Company had transactions with related parties as shown in the table below. In the opinion of the Directors, all of these transactions took place on terms equivalent to those that prevail in arm's length transactions.

			Amount paid	l/(received)
Related party	Nature of relationship	Reason for transactions	2017 £000	2016 £000

Transactions involving key management personnel

No advances, credits or guarantees have been entered into with any of the Directors of the Company.

NOTICE OF ANNUAL GENERAL MEETING

OXFORD BIODYNAMICS PLC (incorporated and registered in England and Wales under number 06227084)

THIS DOCUMENT IS IMPORTANT AND REQUIRES YOUR IMMEDIATE ATTENTION

If you are in any doubt about its content or as to what action you should take, you should consult your stockbroker, solicitor, accountant or other independent professional adviser authorised under the Financial Services and Markets Act 2000 if you are in the United Kingdom, or another appropriately authorised independent adviser if you are in a territory outside the United Kingdom.

If you have sold or transferred all your shares in Oxford BioDynamics Plc, please pass this document and the accompanying proxy form to the purchaser or transferee or to the stockbroker or other agent through whom you made the sale or transfer, for transmission to the purchaser or transferee.

Notice is hereby given that the 2018 annual general meeting of Oxford BioDynamics Plc (the "Company") will be held at The FitzHugh Auditorium, Cohen Quadrangle, Exeter College, Walton Street, Oxford, OX1 2HE on 15 March 2018 at 11.00 am, to consider and, if thought fit, to pass the following resolutions:

Ordinary business

- 1 To receive the financial statements and the reports of the Directors and the Auditors for the year ended 30 September 2017. (Resolution 1)
- 2 To elect Paul Stockdale as a Director of the Company. (Resolution 2)
- 3 To re-appoint KPMG LLP as Auditors of the Company. (Resolution 3)
- 4 To authorise the Directors to set the remuneration of the Auditors. (Resolution 4)

Special business

To consider and, if thought fit, to pass the following resolutions, of which resolution 5 will be proposed as an ordinary resolution, and resolutions 6 and 7 will be proposed as special resolutions:

- 5 That the Directors be and are hereby generally and unconditionally authorised for the purposes of section 551 of the Companies Act 2006 (the "Act"), to exercise all the powers of the Company to allot shares and grant rights to subscribe for, or convert any security into, shares:
 - (a) up to an aggregate nominal amount (within the meaning of section 551(3) and (6) of the Act) of £291,308 (being approximately 33.3% of the Company's issued share capital as at close of business on 26 January 2018) such amount to be reduced by the nominal amount allotted or granted under (b) below in excess of such sum; and
 - (b) comprising equity securities (as defined in section 560(1) of the Act) up to an aggregate nominal amount of £583,491 (being approximately 66.7% of the Company's issued share capital as at close of business on 26 January 2018), such amount to be reduced by any allotments or grants made under (a) above, in connection with or pursuant to an offer by way of a rights issue in favour of holders of ordinary shares in proportion (as nearly as practicable) to the respective number of ordinary shares held by them on the record date for such allotment (and holders of any other class of equity securities entitled to participate therein or if the Directors consider it necessary, as permitted by the rights of those securities), but subject to such exclusions or other arrangements as the Directors may consider necessary or appropriate to deal with fractional entitlements, record dates or legal, regulatory or practical difficulties which may arise under the laws of, or the requirements of any regulatory body or stock exchange in any territory or any other matter whatsoever,

these authorities to expire on the earlier of the date falling 15 months after the date of the passing of this resolution and the conclusion of the annual general meeting of the Company in 2019 (save that the Company may before such expiry make any offer or enter into any agreement which would or might require shares to be allotted or rights to be granted, after such expiry and the Directors may allot shares, or grant rights to subscribe for or to convert any security into shares, in pursuance of any such offer or agreement as if the authorisations conferred hereby had not expired). **(Resolution 5)**

- That, subject to the passing of resolution 5 above, the Directors be and are hereby empowered pursuant to section 570(1) of the Companies Act 2006 (the "Act") to allot equity securities (as defined in section 560(1) of the Act) of the Company for cash pursuant to the authorisation conferred by that resolution as if section 561 of the Act did not apply to any such allotment provided that this power shall be limited to the allotment of equity securities for cash:
 - (a) in connection with or pursuant to an offer of or invitation to acquire equity securities (but in the case of the authorisation granted under resolution 5(b), by way of a rights issue only) in favour of holders of ordinary shares in proportion (as nearly as practicable) to the respective number of ordinary shares held by them on the record date for such allotment (and holders of any other class of equity securities entitled to participate therein or if the Directors consider it necessary, as permitted by the rights of those securities) but subject to such exclusions or other arrangements as the Directors may consider necessary or appropriate to deal with fractional entitlements, record dates or legal regulatory or practical difficulties which may arise under the laws of or the requirements of any regulatory body or stock exchange in any territory or any other matter whatsoever; and
 - (b) in the case of the authorisation granted under resolution 5(a) above, and otherwise than pursuant to paragraph (a) of this resolution, up to an aggregate nominal amount of £87,479.97 (being 10% of the Company's issued share capital as at close of business on 26 January 2018) and this power shall expire on the earlier of the date falling 15 months after the date of the passing of this resolution and the conclusion of the annual general meeting of the Company to be held in 2019 (save that the Company may, at any time before the expiry of such power, make any offer or enter into any agreement which would or might require equity securities to be allotted after the expiry of such power and the Directors may allot equity securities in pursuance of any such offer or agreement as if such power conferred hereby had not expired). (Resolution 6)

- 7 That the Company be and it is hereby generally authorised pursuant to section 701 of the Companies Act 2006 (the "Act") to make market purchases (within the meaning of section 693(4) of the Act) of ordinary shares on such terms and in such manner as the Directors may from time to time determine, provided that:
 - (a) the number of such ordinary shares hereby authorised to be purchased by the Company shall not exceed 8,747,997;
 - (b) the price that may be paid by the Company for any of its ordinary shares shall not be less than 1 pence, being the nominal value of each ordinary share, and shall not be greater than the higher of:
 - (i) 105% of the average trading price of the ordinary shares as derived from the middle market quotations for an ordinary share on the London Stock Exchange Daily Official List for the five trading days immediately preceding the date on which such share is contracted to be purchased; and
 - (ii) the higher of the price of the last independent trade and the highest current independent bid on the trading venues where the purchase is carried out, as stipulated by article 5(1) of the EU Buyback and Stabilisation Regulation 2003 (No. 2273/2003); and
 - (c) unless previously revoked, renewed, extended or varied, the authority hereby conferred shall expire at the conclusion of the annual general meeting of the Company to be held in 2019, provided that the Company may effect purchases following the expiry of such authority if such purchases are made pursuant to contracts for purchases of ordinary shares which are entered into by the Company on or prior to the expiry of such authority. (Resolution 7)

Your Board believes that the resolutions to be proposed as ordinary and special business at the annual general meeting are in the best interests of the Company and its shareholders as a whole. Accordingly, your Directors unanimously recommend that shareholders vote in favour of the resolutions, as they intend to do in respect of their own beneficial holdings of shares in the Company.

By order of the Board

Suran Store

Sue Steven Company Secretary 14 February 2018

Registered Office: 26 Beaumont Street, Oxford OX1 2NP Registered in England and Wales No 06227084

NOTICE OF ANNUAL GENERAL MEETING (CONTINUED)

Explanatory notes to the resolutions

The notes on the following pages explain the resolutions proposed at the annual general meeting of Oxford BioDynamics Plc (the "Company"), to be held at The FitzHugh Auditorium, Cohen Quadrangle, Exeter College, Walton Street, Oxford, OX1 2HE on 15 March 2018 at 11.00 am (the "AGM").

Resolutions 1 to 5 are proposed as ordinary resolutions. This means that for each of those resolutions to be passed, more than half of the votes cast must be in favour of the resolution. Resolutions 6 and 7 are proposed as special resolutions. This means that for each of those resolutions to be passed, at least three quarters of the votes cast must be in favour of the resolution.

Resolution 1 – Adoption of Report and Accounts

For each financial year, the Directors are required to present the Directors' Report, the audited accounts and the Auditor's report to shareholders at a general meeting. The financial statements and reports laid before the AGM are for the financial year ended 30 September 2017, and the Company proposes a resolution on its financial statements and reports.

Resolution 2 – Election of Director

All Directors are subject to election by shareholders at the first annual general meeting following their appointment by the Board. The Company's current articles of association, which came into effect on 6 December 2016, state that each Director shall retire and (unless his/her terms of appointment with the Company specify otherwise) is eligible for election or re-election at the annual general meeting held in the third calendar year (or such earlier calendar year as may be specified for this purpose in his/her terms of appointment with the Company) following his/her last appointment, election or re-election at any general meeting of the Company. In practice, this means that every Director stands for re-election at intervals of not more than three years.

Paul Stockdale was appointed as a Director on 15 September 2017 and will retire at the AGM and, being eligible, will offer himself for re-election. Resolution 2 proposes the election of Paul Stockdale. Christian Hoyer Millar, Dr Alexandre Akoulitchev, Stephen Diggle, Alison Kibble and David Williams were each either elected or re-elected at the Company's AGM in 2017.

The biography of Paul Stockdale is set out on page 10 of the Annual Report and Accounts for the year ended 30 September 2017.

Resolutions 3 and 4 - Re-appointment of auditor and auditor's remuneration

Resolutions 3 and 4 propose the re-appointment of KPMG LLP as the Company's Auditor for the year ending 30 September 2018, and the authorisation of the Directors to agree the Auditor's remuneration. The Directors will delegate this authority to the Audit Committee.

Resolution 5 – Authority to allot shares

Your Directors may only allot shares or grant rights over shares if authorised to do so by shareholders. The authorities granted on 15 March 2017 are due to expire at the Company's annual general meeting in 2018 and therefore the authorities require renewal. This resolution, if passed, will continue to give the Directors flexibility to act in the best interests of shareholders, when the opportunity arises, by issuing new shares. Accordingly, resolution 5 will be proposed as an ordinary resolution to grant new authorities to allot shares and grant rights to subscribe for, or convert any security into, shares (a) up to an aggregate nominal amount of £291,308 and (b) in connection with a rights issue up to an aggregate nominal amount (reduced by allotments under part (a) of the resolution) of £583,491.

These amounts represent approximately 33.3% and approximately 66.7% respectively of the total issued ordinary share capital of the Company as at close of business on 26 January 2018, being the last practicable day prior to the publication of this notice. If given, these authorities will expire on the earlier of the date falling 15 months after the date of the passing of this resolution and the conclusion of the annual general meeting of the Company in 2019.

Your Directors have no present intention of issuing shares pursuant to this authority.

As at the date of this notice the Company holds no treasury shares.

Resolution 6 – Disapplication of pre-emption rights

Your Directors also require additional authority from shareholders to allot equity securities for cash and otherwise than to existing shareholders pro rata to their holdings. The authorities granted on 15 March 2017 are due to expire at the conclusion of the Company's annual general meeting in 2018 and therefore the authorities require renewal. Accordingly, resolution 6 will be proposed as a special resolution to grant such an authority. Apart from offers or invitations in proportion to the respective number of shares held, the authority will be limited to the allotment of equity securities for cash up to an aggregate nominal value of £87,479.97 (being 10% of the Company's issued ordinary share capital as at close of business on 26 January 2018, being the last practicable day prior to the publication of this notice). If given, this authority will expire on the earlier of the date falling 15 months after the date of the passing of this resolution and the conclusion of the annual general meeting of the Company in 2019.

Resolution 7 – Authority to purchase shares (market purchases)

This resolution, which will be proposed as a special resolution, renews the authority granted at the annual general meeting held on 15 March 2017 which expires on the date of the forthcoming AGM. The resolution authorises the Company to make market purchases of its own ordinary shares as permitted by the Act. The authority limits the number of shares that could be purchased to a maximum of 8,747,997 (representing no more than 10% of the issued share capital of the Company as at 26 January 2018 (being the latest practicable date prior to the publication of this Notice of AGM)) and sets minimum and maximum prices. If given, this authority will expire on the earlier of the date falling 15 months after the date of the passing of this resolution and the conclusion of the annual general meeting of the Company in 2019.

Under the authority sought by this resolution, the Company may purchase its ordinary shares following the date on which the authority expires if such purchases are made pursuant to contracts entered into by the Company on or prior to the date on which the authority expires.

Your Directors are of the opinion that it would be advantageous for the Company to have the flexibility to purchase its own shares should such action be deemed appropriate by the Board. The Directors have no present intention of exercising the authority to purchase the Company's ordinary shares but will keep the matter under review, taking into account the financial resources of the Company, the Company's share price, future investment opportunities and the overall position of the Company. The authority will be exercised only if the Directors believe that to do so would result in an increase in earnings per share and would be in the interests of shareholders generally. Shares purchased would either be cancelled and the number of shares in issue reduced accordingly or held as treasury shares.

Procedural and Explanatory Notes

Entitlement to attend and vote

1 The right to attend and vote at the AGM is determined by reference to the Company's register of members. Only a member entered in the register of members as at close of business on 13 March 2018 (or, if the AGM is adjourned, in the register of members as at the close of business on the date which is two business days before the time of the adjourned AGM) is entitled to attend and vote at the AGM and a member may vote in respect of the number of ordinary shares registered in the member's name at that time. Changes to the entries in the register of members after that time shall be disregarded in determining the rights of any person to attend and vote at the AGM.

Proxies

- 2 (a) As a member of the Company you are entitled to appoint a proxy to exercise all or any of your rights to attend, speak and vote at the AGM. You can only appoint a proxy using the procedures set out in these notes.
 - (b) Appointment of a proxy does not preclude you from attending the meeting and voting in person. If you have appointed a proxy and attend the meeting in person, your proxy appointment will automatically be terminated.
 - (c) A proxy does not need to be a member of the Company but must attend the meeting to represent you. To appoint as your proxy a person other than the Chairman of the meeting, insert their full name in the box on your proxy form. If you sign and return your proxy form with no name inserted in the box, the Chairman of the meeting will be deemed to be your proxy. Where you appoint as your proxy someone other than the Chairman, you are responsible for ensuring that they attend the meeting and are aware of your voting intentions. If you wish your proxy to make any comments on your behalf, you will need to appoint someone other than the Chairman and give them the relevant instructions directly.
 - (d) You may appoint more than one proxy provided each proxy is appointed to exercise the rights attached to a different share or shares held by you. You may not appoint more than one proxy to exercise rights attached to any one share.
 - (e) If the proxy is being appointed in relation to less than your full voting entitlement, please enter in the box provided the number of shares in relation to which they are authorised to act as your proxy. If left blank your proxy will be deemed to be authorised in respect of your full voting entitlement (or if this proxy form has been issued in respect of a designated account for a shareholder, the full voting entitlement for that designated account). In the event of a conflict between a blank proxy form and a proxy form which states the number of shares to which it applies, the specific proxy form shall be counted first, regardless of whether it was sent or received before or after the blank proxy form, and any remaining shares in respect of which you are the registered holder will be apportioned to the blank proxy form. If you submit more than one completed valid proxy, the proxy received last before the latest time for receipt of proxies will take precedence.
 - (f) To appoint more than one proxy, you may photocopy the proxy form. Please indicate in the box on the form the number of shares in relation to which they are authorised to act as your proxy. Please also indicate with an "X" in the place provided on the proxy form if the proxy instruction is one of multiple instructions being given. All forms must be signed and should be returned together in the same envelope.
 - (g) To direct your proxy how to vote on the resolutions mark the appropriate box on your proxy form with an 'X'. To abstain from voting on a resolution, select the relevant "Vote withheld" box. A vote withheld is not a vote in law, which means that the vote will not be counted in the calculation of votes for or against the resolution. If you mark with an "X" "discretion", or if no voting indication is given, your proxy will vote or abstain from voting as he or she sees fit.
 - (h) To appoint a proxy using this form, your proxy form must be:
 - completed and signed by the appointor or their duly authorised attorney;
 - sent or delivered to the Company's Registrars, Link Asset Services, at: PXS, 34 Beckenham Road, Beckenham BR3 4TU; and
 - received by post or by hand by Link Asset Services no later than 11.00 am on 13 March 2018 (together with any power of attorney or other authority under which it is signed or a notarially certified copy of such power or a copy certified in accordance with the Power of Attorney Act 1971 or in some other manner approved by the Directors).

NOTICE OF ANNUAL GENERAL MEETING (CONTINUED)

Proxies (continued)

Completed proxy forms should NOT be sent to the Company's registered office.

- (i) In the case of a member which is a company, your proxy form must be executed under its common seal or signed on its behalf by a duly authorised officer of the Company or an attorney for the Company stating their capacity (eg Director, secretary).
- (j) Any power of attorney or any other authority under which your proxy form is signed (or a duly certified copy of such power or authority) must be included with your proxy form.
- (k) CREST members who wish to appoint a proxy or proxies by using the CREST electronic appointment service may do so by using the procedures described in the CREST Manual (available via www.euroclear.com/CREST) subject to the provisions of the Company's articles of association. CREST personal members or other CREST sponsored members, and those CREST members who have appointed a voting service provider(s), should refer to their CREST sponsor or voting service provider(s), who will be able to take the appropriate action on their behalf. To be valid, the appropriate CREST message, regardless of whether it constitutes the appointment of a proxy or an amendment to the instructions given to a previously appointed proxy, must be transmitted so as to be received by our agent Link Asset Services, whose CREST participant ID is RA10, by 11.00 am on 13 March 2018.
- (I) In the case of joint holders, where more than one of the joint holders purports to appoint a proxy, only the appointment submitted by the most senior holder will be accepted. Seniority is determined by the order in which the names of the joint holders appear in the Company's register of members in respect of the joint holding (the first named being the most senior).
- (m) If you submit more than one valid proxy appointment, the appointment received last before the latest time for the receipt of proxies will take precedence.
- (n) Save through CREST, we do not have a facility to receive proxy forms electronically. Therefore, you may not use any electronic address referred to in the proxy form or any related document to submit your proxy form.
- (o) Pursuant to Regulation 41 of the Uncertificated Securities Regulations 2001, the Company specifies that only those members entered on the register of members of the Company as at close of business on 13 March 2018 or, in the event that this meeting is adjourned, on the register of members as at close of business on the day two days before the date of any adjourned meeting shall be entitled to attend and vote at the meeting in respect of the number of ordinary shares registered in their names at that time. Changes to the entries on the register of members after close of business on 13 March 2018, or in the event that this meeting is adjourned, in the register of members after close of business on the day two days before the adjourned meeting shall be disregarded in determining the rights of any person to attend or vote at the meeting.

Corporate representatives

3 A shareholder of the Company which is a corporation may authorise a person or persons to act as its representative(s) at the AGM. In accordance with the provisions of the Act, each such representative may exercise (on behalf of the corporation) the same powers as the corporation could exercise if it were an individual shareholder of the Company, though there are restrictions on more than one such representative exercising powers in relation to the same shares.

Nominated persons

- 4 Any person to whom this Notice is sent as a person nominated under section 146 of the Act to enjoy information rights (a Nominated Person) may, under an agreement between him/her and the member by whom he/she was nominated, have a right to be appointed (or to have someone else appointed) as a proxy for the AGM. If a Nominated Person has no such proxy appointment right or does not wish to exercise it, he/she may, under any such agreement, have a right to give instructions to the member as to the exercise of voting rights.
- 5 The statement of the rights of members in relation to the appointment of proxies in paragraph 2 above does not apply to Nominated Persons. The rights described in that paragraph can only be exercised by members of the Company.

Issued share capital and total voting rights

6 As at close of business on 26 January 2018, being the last practicable day prior to the publication of this Notice, the Company's issued share capital comprised 87,479,973 ordinary shares of 1 pence. Each ordinary share carries the right to one vote at a general meeting of the Company and, therefore, the total number of voting rights in the Company as at the date of this Notice is 87,479,973.

Members' requests under section 527 of the Act

7 Under section 527 of the Act members meeting the threshold requirements set out in that section have the right to require the Company to publish a statement on a website setting out any matter relating to: (i) the audit of the Company's Accounts (including the Auditor's Report and the conduct of the audit) that are to be laid before the AGM; or (ii) any circumstance connected with an auditor of the Company ceasing to hold office since the last AGM. The Company may not require the members requesting any such website publication to pay its expenses in complying with sections 527 or 528 of the Act. Where the Company is required to place a statement on a website under section 527 of the Act, it must forward the statement to the Company's Auditor not later than the time when it makes the statement available on the website. The business which may be dealt with at the AGM includes any statement that the Company has been required under section 527 of the Act to publish on a website.

Members' rights to ask questions

8 Any member attending the AGM has the right to ask questions. The Company must cause to be answered any such question relating to the business being dealt with at the AGM but no such answer need be given if: (a) to do so would interfere unduly with the preparation for the AGM or involve the disclosure of confidential information; (b) the answer has already been given on a website in the form of an answer to a question; or (c) it is undesirable in the interests of the Company or the good order of the AGM that the question be answered.

Inspection of documents

9 Copies of the Executive Directors' service contracts and the letters of appointment of the Non-Executive Directors will be available for inspection at the office of the Company during normal business hours until the date of the AGM, and at the place of the AGM from 15 minutes before the AGM until it ends.

Security

10 Security measures will be in place to ensure your safety at the AGM. Please do not bring suitcases, large bags or rucksacks. If you do, we may ask you to leave the item in the cloakroom. Recording equipment, cameras and other items that might interfere with the good order of the meeting will not be permitted. Mobile phones must be turned off or on silent during the meeting. Please also note that those attending the AGM will not be permitted to hand out leaflets in the venue.

Website

11 A copy of this Notice, and other information required by section 311A of the Act, can be found at the Company's website, www.oxfordbiodynamics.com.

Voting results

12 The results of the voting at the AGM will be announced through a regulatory information service and will appear on the Company's website, www.oxfordbiodynamics.com, as soon as reasonably practicable.

DEFINITIONS AND GLOSSARY

DEFINITIONS

The following definitions apply throughout this Annual Report and Accounts, unless the context requires otherwise:

"Admission"

the admission of the Company's ordinary shares to trading on AIM on 6 December 2016

"AIM"

the market of that name operated by the London Stock Exchange

"Innovate UK"

an executive non-departmental public body, sponsored by the UK Government's Department for Business, Energy and Industrial Strategy

"IPO"

Initial Public Offering

"QCA Code"

the QCA Corporate Governance Code for Small and Mid-Sized Quoted Companies, including AIM companies, as amended from time to time

"Placing"

the placing of the Placing Shares with investors at the Placing Price pursuant to the Placing Agreement dated 1 December 2016, further details of which are set out in paragraph 15.6 (Placing Agreement) of Part 7 (Additional Information) of the Admission Document, which can be downloaded from the Company's website at www.oxfordbiodynamics.com

"Placing Price"

the price of 158 pence per Placing Share

"Placing Shares"

new ordinary shares allotted and issued by the Company, and the ordinary shares sold by certain shareholders in conjunction with the Placing

GLOSSARY

Amyotrophic lateral sclerosis ("ALS")

rapidly progressive neurological disease attacking the nerve cells controlling voluntary muscle movement

Anti PD-L1 therapy

a type of immune checkpoint inhibitor targeting programmed death-ligand 1 (PD-L1) for the treatment of cancer

Autoimmune

a pathological immune response against the body's own healthy tissue and cells

Biomarker

short for 'biological marker', a naturally occurring molecule, gene or characteristic which provides a measurable indicator or identification of a particular biological state or condition

Companion diagnostic

a diagnostic test using a device to determine if a therapeutic product will benefit the patient and outweigh the risks of its use

Diagnostics

the process of detection and identification of a disease

EpiSwitch™ the Company's proprietary biomarker technology platform

Immuno-oncology

a type of immunotherapy used to treat cancer

Immunotherapy

a type of treatment to stimulate the body's immune response

Neurodegenerative

damage to the nervous system, particularly in the brain

Oncology

the study and treatment of tumours and cancer

Pathological

involving a disease or illness

Patient cohorts

groups of patients subjected to stratification analysis

Personalised medicine

medical procedure that separates patients into different groups and treats them accordingly, based on their predicted response and prognostic risk of disease

Prognostic

an indicator of the future course of a disease

R&D

research and development

Rheumatoid arthritis

a long-term, progressive condition causing pain, stiffness and swelling in the joints, particularly the hands and feet

Stratification

the process or result of separating a patient cohort into subgroups according to specified criteria, such as age, disease profile or response to therapeutic treatment

Therapeutic

the treatment of disease by the action of remedial agents

Therapeutics

treatments, drugs or therapies used to treat disease
