# Brunswick Corporation Operations Update

METTAWA, Ill, June 22, 2023 (GLOBE NEWSWIRE) -- On June 13, Brunswick Corporation (NYSE: BC) reported an IT security incident that impacted some of its systems and global facilities. The Company activated its response protocols, which included pausing operations in some locations, and engaging leading security experts and law enforcement to assist.

Since that time, thanks to the hard work of Brunswick's IT and business teams, and our many outside partners, Brunswick has made significant progress restoring the functionality of its systems and restarting operations at facilities where production or distribution was paused.

All primary Brunswick global manufacturing and most distribution facilities are now operational, with the remaining production and distribution facilities expected to restart within a few business days. The respective teams are working to ramp production and fulfill backorders across the businesses. Given the proximity of the production and distribution disruptions to the end of the second quarter, the process of catching up lost production and fulfilling backorders will continue through at least the third quarter. Brunswick appreciates the patience and support of its customers during this process.

## Forward-Looking Statements

Certain statements in this communication are forward-looking statements as defined in the

Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on current expectations about Brunswick's business and by their nature address matters that are, to different degrees, uncertain. These forward-looking statements include our statements regarding restarting operations as most facilities and restoring systems.

Forward-looking statements are not guarantees of future performance and involve certain risks and uncertainties that may cause actual results to differ materially from expectations as of the date of this communication. These risks include, but are not limited to, the possibility that we may not be able to restore the remaining affected systems and facilities within the week.
