## Westell Technologies Announces New “Trade-Up” Program

**Upgrade your in-building wireless system with the latest Westell Digital Repeaters, Active DAS Interface Units, and 4G Modems**

AURORA, Ill.--(BUSINESS WIRE)-- [Westell Technologies, Inc.](#) (NASDAQ: WSTL), a leading provider of in-building wireless, intelligent site management, cell site optimization, and outside plant solutions, today announces that, effective immediately, it is offering a manufacturer’s rebate on the purchase of select in-building wireless products. As part of the Company’s first ever “Trade-Up” program, Westell will award a rebate of up to \$500 per qualifying product when a customer returns a comparable product – *even those from competing manufacturers*.

“Our new Westell Trade-Up program is simple and beneficial,” states Rick Good, SVP of In-building Wireless (IBW) for Westell Technologies. “We’ve heard time and again that companies have either settled for sub-par IBW equipment or have outdated equipment that is close to the end of its life. The reason many companies settle for this equipment is because upgrading critical network elements with the latest gear is expensive. Our Trade-Up program allows customers to save money *and* upgrade their systems with new, best-in-class IBW equipment.”

Qualifying products include [Digital Repeaters](#), [Active DAS Interface Unit POIs \(aka UDIT™\)](#), and our new [4G Modem](#). Visit [Westell’s Rebate Center](#) for specific details about our Trade-Up Program.

### About Westell Technologies
