MGP Ingredients Reports Strong First Quarter 2023 Results

*Consolidated sales increased 3% from prior year period
Continued strength across each business segment*

ATCHISON, Kan., May 04, 2023 (GLOBE NEWSWIRE) -- **MGP Ingredients, Inc. (Nasdaq:MGPI)**, a leading provider of distilled spirits, branded spirits, and food ingredient solutions, today reported results for the first quarter ended March 31, 2023.

2023 first quarter consolidated results compared to 2022 first quarter

- Sales increased 3% to \$201.0 million.
- Gross profit decreased 3% to \$69.8 million, representing 34.7% of sales.
- Operating income decreased 17% to \$41.6 million.
- Net income decreased 17% to \$31.0 million.
- Adjusted EBITDA decreased 15% to \$47.1 million.
- Basic earnings per share ("EPS") decreased to \$1.40 per share from \$1.69 per share.
- Diluted EPS decreased to \$1.39 per share from \$1.69 per share.

"Our year is off to another strong start, as this quarter's gross profit and adjusted EBITDA performance represents the second best quarter in Company history, second only to the record first quarter of 2022," said David Colo, president and CEO of MGP Ingredients. "Sales of brown goods grew 10% from the prior year period to record levels, driven by strong new distillate customer commitments, higher pricing across all brown goods, and stronger than expected customer demand for spot purchases. Within our Branded Spirits segment, revenue grew 2% and we recently realigned our national distribution capabilities with Republic National Distributing Company ("RNDC") toward the end of the quarter. We believe this realignment with RNDC, as well as continued investment in our premium plus family of spirits brands, continues to position us well for incremental growth and margin expansion opportunities going forward. We are also pleased with the continued strength of our Ingredient Solutions business, which continues to benefit from broader consumer trends that include the shift toward plant-based diets as reflected by the segment's gross profit and margin performance this quarter."

In the first quarter 2023, sales for the Distilling Solutions segment increased 2% to \$113.2 million, reflecting a 2% increase in sales of premium beverage alcohol, due to higher brown goods sales. Non-GAAP Financial Measures

In addition to reporting financial information in accordance with U.S. GAAP, the Company provides certain non-GAAP financial measures that are not in accordance with, or alternatives for, GAAP. In addition to the comparable GAAP measures, the Company has disclosed adjusted EBITDA, as well as guidance for adjusted EBITDA and adjusted basic EPS. The presentation of these non-GAAP financial measures should be reviewed in conjunction with net income computed in accordance with U.S. GAAP and should not be

considered a substitute for the GAAP measure. We believe that the non-GAAP measures provide useful information to investors regarding the Company's performance and overall results of operations. In addition, management uses these non-GAAP measures in conjunction with GAAP measures when evaluating the Company's operating results compared to prior periods on a consistent basis, assessing financial trends and for forecasting purposes. Non-GAAP financial measures may not provide information that is directly comparable to other companies, even if similar terms are used to identify such measures. The attached schedule provides a full reconciliation of historical adjusted EBITDA to net income, its most directly comparable U.S. GAAP financial measure. Full year 2023 guidance measures of adjusted EBITDA and adjusted basic EPS are provided on a non-GAAP basis without a reconciliation to the most directly comparable GAAP measures because the Company is unable to predict with a reasonable degree of certainty certain items contained in the GAAP measures without unreasonable efforts. Such items include, but are not limited to, acquisition related expenses, restructuring and related expenses, and other items not reflective of MGP's ongoing operations.

Conversion price	\$ 96.23620	\$ 96.23620

Average share price	\$ 97.73393	\$ 80.54661
Conversion premium in shares (d) (e)	32,047	—

(a) Number of bonds outstanding is calculated by taking the principal amount of the bonds divided by the par value.

(b) Average share price is calculated by taking the average of the daily closing share price for the period. If the average share price is less than the conversion price of \$96.23620 per share, the impact to EPS is anti-dilutive and therefore the shares were excluded from the diluted EPS calculation.

(c) Impact of conversion is calculated by taking the number of bonds outstanding multiplied by the initial conversion rate multiplied by the average share price. If the average share price is less than the conversion price then the impact of conversion is zero.

(d) The impacts of the Convertible Senior Notes were included in the diluted weighted average common shares outstanding if the impact was dilutive. The Convertible Senior Notes would only have a dilutive impact if the average market price per share during the quarter and year to date period exceeds the conversion price of \$96.23620 per share. For the quarter ended March 31, 2023, the inclusion of the shares had a dilutive impact and were included in the diluted EPS calculation. There was no dilutive impact for the quarter ended March 31, 2022.

(e) Conversion premium in shares is calculated by taking the conversion premium divided by the average share price. If the average share price is less than the conversion price, then the conversion premium in shares is zero.
