FORWARD-LOOKING STATEMENTS

Certain items in this press release may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including, but not limited to, the average life of an investment, the expected returns, or expected yield on an investment, statements relating to our liquidity, future losses and impairment charges, our ability to acquire assets with attractive returns and the delinquent and loss rates on our subprime portfolios. These statements are based on management's current expectations and beliefs and are subject to a number of trends and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements, many of which are beyond our control. Newcastle can give no assurance that its expectations will be attained. Factors that could cause actual results to differ materially from Newcastle's expectations include, but are not limited to, the risk that market conditions cause downgrades of a significant number of our securities or the recording of additional impairment charges or reductions in shareholders' equity; the risk that we can find additional suitably priced investments; the risk that investments made or committed to be made cannot be financed on the basis and for the term at which we expect; the relationship between yields on assets which are paid off and yields on assets in which such monies can be reinvested; actual recapture rates with respect to any Excess MSR investment; and the relative spreads between the yield on the assets we invest in and the cost and availability of debt and equity financing. Accordingly, you should not place undue reliance on any forward-looking statements contained in this press release. For a discussion of some of the risks and important factors that could affect such forward-looking statements, see the sections entitled "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operation" in the Company's Annual Report on Form 10-K or Quarterly Report on Form 10-Q, which is available on the Company's website (www.newcastleinv.com). In addition, new risks and uncertainties emerge from time to time, and it is not possible for the

Company to predict or assess the impact of every factor that may cause its actual results to differ from those contained in any forward-looking statements. Such forward-looking statements speak only as of the date of this press release. Newcastle expressly disclaims any obligation to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in the Company's expectations with regard thereto or change in events, conditions or circumstances on which any statement is based.

CAUTIONARY NOTE REGARDING EXPECTED RETURNS AND EXPECTED YIELDS PRESENTED IN THIS PRESS RELEASE

Expected returns and expected yields are estimates of the annualized effective rate of return that we presently expect to be earned over the expected average life of an investment (i.e., IRR), after giving effect, in the case of returns, to existing leverage, and calculated on a weighted average basis. Expected returns and expected yields reflect our estimates of an investment's coupon, amortization of premium or discount, and costs and fees, and they contemplate our assumptions regarding prepayments, defaults and loan losses, among other things. In the case of Excess MSRs, these assumptions include, but are not limited to, the recapture rate. Income recognized by the Company in future periods may be significantly less than the income that would have been recognized if an expected return or expected yield were actually realized, and the estimates we use to calculate expected returns and expected yields could differ materially from actual results.

Statements about expected returns and expected yields in this press release are forward-looking statements. You should carefully read the cautionary statement above under the caption "Forward-looking Statements," which directly applies to our discussion of expected returns and expected yields.

Core Earnings

Core earnings is used by management to gauge the current performance of Newcastle without taking into account of gains and losses, which, although they represent a part of our recurring operations, are subject to significant variability and are only a potential indicator of future economic performance. Management views this measure as Newcastle's "core" current earnings, while gains and losses (including impairment) are simply a potential indicator of future earnings. It also excludes the effect of depreciation and amortization charges, which, in the judgment of management, are not indicative of operating performance.

Management believes that this measure provides investors with useful information regarding Newcastle's "core" current earnings, and it enables investors to evaluate Newcastle's current performance using the same measure that management uses to operate the business. Core earnings does not represent cash generated from operating activities in accordance with GAAP and therefore should not be considered an alternative to net income as an indicator of the Company's operating performance or as an alternative to cash flow as a measure of its liquidity and is not necessarily indicative of cash available to fund cash needs. The Company's calculation of core earnings may be different from the calculation used by other companies and, therefore, comparability may be limited.
