CORE EARNINGS

Newcastle has the following primary variables that impact its operating performance: (i) the current yield earned on its investments that are not included in non-recourse financing structures (i.e., unlevered investments, including investments in equity method investees and investments subject to recourse debt), (ii) the net yield it earns from its non-recourse financing structures, (iii) the interest expense and dividends incurred under its recourse debt and preferred stock, (iv) the net operating income on its real estate, media and golf investments, (v) its operating expenses and (vi) its realized and unrealized gains or losses, net of related provision for income taxes, including any impairment, on its investments, derivatives and debt obligations. Core earnings is a non-GAAP measure of the operating performance of Newcastle excluding the sixth variable listed above. It also excludes depreciation and amortization charges, including the accretion of the membership deposit liability and the impact of the application of acquisition accounting, acquisition and spin-off related expenses and restructuring expenses. Core earnings is used by management to gauge the current performance of Newcastle without taking into account gains and losses, net of related provision for income taxes, which, although they represent a part of our recurring operations, are subject to significant variability and are only a potential indicator of future economic performance. It is the judgment of management that depreciation and amortization charges are not indicative of operating performance and that acquisition and spin-off related expenses are not part of our core operations. Management believes that the exclusion from core earnings of the items specified above allows investors and analysts to readily identify the operating performance of the assets that form the core of our activity, assists in comparing the core operating results between periods, and enables investors to

evaluate Newcastle's current performance using the same measure that management uses to operate the business, which is among the factors considered when determining the amount of distributions to our shareholders.

Core earnings does not represent cash generated from operating activities in accordance with GAAP and therefore should not be considered an alternative to net income as an indicator of our operating performance or as an alternative to cash flow as a measure of our liquidity, and is not necessarily indicative of cash available to fund cash needs. For a further description of the differences between cash flows provided by operations and net income, see " – Liquidity and Capital Resources" in the Company's Quarterly Report on Form 10-Q and Annual Report on Form 10-K, which are available on the Company's website, www.newcastleinv.com. Our calculation of core earnings may be different from the calculation used by other companies and, therefore, comparability may be limited.

(A) Depreciation and amortization charges for the three months ended September 30, 2015 includes \$7.1 million of depreciation and amortization, \$1.2 million of amortization of favorable or unfavorable leasehold intangibles and \$1.5 million of accretion on the golf membership deposit liability. Depreciation and amortization charges for the three months ended June 30, 2015 includes \$7.1 million of depreciation and amortization, \$1.2 million of amortization of favorable or unfavorable leasehold intangibles and \$1.5 million of accretion on the golf membership deposit liability. The accretion of membership deposit liability was recorded to interest expense and the amortization of favorable and unfavorable leasehold intangibles was recorded to operating expenses - golf.

ADJUSTED FUNDS FROM OPERATIONS

The Company defines Adjusted Funds from Operations ("AFFO") as net income available for common stockholders plus depreciation and amortization including the accretion of the membership liability and the amortization of favorable or unfavorable leasehold intangibles. The Company believes AFFO provides useful information to investors regarding the performance of the Company, because it provides a measure of operating performance without regard to depreciation and amortization, which reduce the value of real estate assets over time even though actual real estate values may fluctuate with market conditions. AFFO does not represent cash generated from operating activities in accordance with GAAP and

therefore should not be considered an alternative to net income (loss) as an indicator of our operating performance or as an alternative to cash flow as a measure of our liquidity, and it is not necessarily indicative of cash available to fund cash needs. Our calculation of AFFO may be different from the calculation used by other companies and, therefore, comparability may be limited. The Company's definition of AFFO differs from the definition of FFO established by the National Association of Real Estate Investment Trusts ("NAREIT"), which defines FFO as net income (or loss) (computed in accordance with GAAP) excluding losses or gains from sales of depreciable property, impairment of depreciable real estate, real estate-related depreciation and amortization and the portion of such items related to unconsolidated affiliates.
