Brazil Potash Announces Launch of Brazilian Depositary Receipts (BDRs) on B3 Exchange

- *BDRs will provide Brazilian investors direct access to invest in the largest domestic potash development project*
- *Strategic step to expand investor base in Brazil, aligning with National Fertilizer Plan's goal of reducing import dependence*
- *Trading on B3 complements existing NYSE American listing (GRO)*

MANAUS, Brazil, May 27, 2025 (GLOBE NEWSWIRE) -- Brazil Potash Corp. ("Brazil Potash" or the "Company") (NYSE-American: GRO), a mineral exploration and development company with a critical mineral potash mining project, the Autazes Project, today announced the successful launch of its Brazilian Depositary Receipts (BDRs) on the B3 S.A. – Brasil, Bolsa, Balcão ("B3"), Brazil's main stock exchange. The BDRs have been approved for listing on B3 and will begin trading on May 26, 2025 under the ticker symbol GROP31.

The BDR program will allow Brazilian investors to directly participate in the ownership of Brazil Potash, which is developing the strategic Autazes Potash Project in Amazonas state. This domestic investment opportunity aligns with Brazil's National Fertilizer Plan, which aims to reduce the country's dependence on fertilizer imports from 85% to 45% by 2050.

"We're proud to offer this investment opportunity to the Brazilian market, where the impact of our project will be directly felt," said Matt Simpson, Chief Executive Officer of Brazil Potash. "Our company was created to address a critical vulnerability in Brazil's agricultural supply chain. Now, through the BDR program, Brazilian investors can participate in building domestic potash capacity that will support the country's position as the world's largest net exporter of agricultural products."

The BDRs will be backed by Brazil Potash's common shares, which will continue to trade on the NYSE American exchange under the ticker symbol "GRO." Each BDR will represent 1:1 of a common share of the Company. This dual listing approach enhances the Company's visibility in both North American and Brazilian capital markets, improving liquidity and broadening the investor base.

Banco Bradesco S.A. will serve as the depositary institution for the BDR program. The BDRs are being issued as Sponsored Level I BDRs, governed by CVM Instruction 332, CVM Instruction 480, and the B3 Issuers Regulation and Manual.

About Brazil Potash

Brazil Potash (NYSE-American: GRO) (www.brazilpotash.com) is developing the Autazes Project to supply sustainable fertilizers to one of the world's largest agricultural exporters. Brazil is critical for global food security as the country has amongst the highest amounts of fresh water, arable land, and an ideal climate for year-round crop growth, but it is vulnerable as it imported over 95% of its potash fertilizer in 2021, despite having what is anticipated to be one of the world's largest undeveloped potash basins in its own backyard. The potash produced will be transported primarily using low-cost river barges on an inland river system in partnership with Amaggi (www.amaggi.com.br), one of Brazil's largest farmers and logistical operators of agricultural products. With an initial planned annual potash production of up to 2.4 million tons per year, Brazil Potash's management believes it could potentially supply approximately 20% of the current potash demand in Brazil. Management anticipates 100% of Brazil Potash's production will be sold domestically to reduce Brazil's reliance on potash imports while concurrently mitigating approximately 1.4 million tons per year of GHG emissions.

Forward-Looking Statements Disclaimer
