Brazil Potash Announces Organizational Change at Potássio do Brasil

MANAUS, Brazil, June 05, 2025 (GLOBE NEWSWIRE) -- Brazil Potash Corp. ("Brazil Potash" or the "Company") (NYSE-American: GRO), a mineral exploration and development company with a critical mineral potash mining project, the Autazes Project (the "Project"), today announced that Adriano Espeschit has resigned from his position as President of Potássio do Brasil Ltda., the Company's wholly-owned Brazilian subsidiary, effective in 30 days as per his Agreement, to pursue other opportunities.

The Company thanks Mr. Espeschit for his contributions to advance the Autazes Potash Project including most notably obtaining key licenses for Project construction in addition to achieving over 90% of the Mura indigenous vote in support of Project construction and wishes him well in his future endeavors. A successor will be appointed in due course. The Company's operations are anticipated to continue without interruption as it advances the Project.

About Brazil Potash

Brazil Potash (NYSE-American: GRO) (www.brazilpotash.com) is developing the Autazes Project to supply sustainable fertilizers to one of the world's largest agricultural exporters. Brazil is critical for global food security as the country has amongst the highest amounts of fresh water, arable land, and an ideal climate for year-round crop growth, but it is vulnerable as it imported over 95% of its potash fertilizer in 2021, despite having what is anticipated to be one of the world's largest undeveloped potash basins in its own backyard. The potash produced will be transported primarily using low-cost river barges on an inland river system in partnership with Amaggi (www.amaggi.com.br), one of Brazil's largest farmers and logistical operators of agricultural products. With an initial planned annual potash production of up to 2.4 million tons per year, Brazil Potash's management believes it could potentially supply approximately 20% of the current potash demand in Brazil. Management anticipates 100% of Brazil Potash's production will be sold domestically to reduce Brazil's reliance on potash imports while concurrently mitigating approximately 1.4 million tons per year of GHG emissions.
