# Dynatrace Receives the Highest Scores Across 4 of 6 Use Cases in the 2022 Gartner® Critical Capabilities for APM and Observability Report

*Report evaluates solutions from 19 vendors and details essential product capabilities to solve the full range of use cases for APM and observability in modern hybrid and multicloud environments*

WALTHAM, Mass.--(BUSINESS WIRE)-- Dynatrace (NYSE: [DT](#)) announced today that it received the highest score in 4 of 6 use cases for the Dynatrace® Software Intelligence Platform in the *2022 Gartner Critical Capabilities for Application Performance Monitoring (APM) and Observability* report. Gartner evaluated 19 vendors. The Dynatrace platform received the highest overall scores in the DevOps/AppDev, SRE/Platform Operations, IT Operations, and Digital Experience Monitoring use cases. This report accompanies the *2022 Gartner Magic Quadrant™ for APM and Observability*, which named Dynatrace a Leader and positioned it furthest overall for Completeness of Vision. Complimentary copies of the [2022 Gartner Critical Capabilities for APM and Observability](#) and the [2022 Gartner Magic Quadrant for APM and Observability](#) are available on the Dynatrace website.

“The Gartner Magic Quadrant evaluates vendors, and we were thrilled to be named a Leader with the furthest position for Completeness of Vision. Gartner recommends that organizations review the Magic Quadrant and the companion Critical Capabilities together to gain a holistic view of the vendors in the APM and observability market,” said Steve Tack, SVP of Product Management at Dynatrace. “It is gratifying to see Dynatrace ranked #1 out of 19 vendors in four use cases recognized. We pride ourselves on innovation, and we are thankful for our R&D teams for delivering solutions that people need and consistently anticipating our customers’ expanding requirements.”
