Cabaletta Bio®

Cabaletta Bio to Participate in Upcoming Investor Conferences in November

PHILADELPHIA, Nov. 09, 2021 (GLOBE NEWSWIRE) -- Cabaletta Bio, Inc. (Nasdaq: CABA), a clinical-stage biotechnology company focused on the discovery and development of engineered T cell therapies for patients with B cell-mediated autoimmune diseases, today announced that the Company will participate in two upcoming investor conferences in November:

- **Guggenheim Securities 3rd Annual Neuro/Immunology Conference:** Steven Nichtberger, M.D., President and Chief Executive Officer, will participate in a fireside chat on Tuesday, November 16, 2021 at 8:15 a.m. ET. Members of management will also be available for one-on-one meetings.
- **Evercore ISI 4th Annual HealthCONx Conference:** Steven Nichtberger, M.D., President and Chief Executive Officer, will participate in a fireside chat on Tuesday, November 30, 2021 at 12:35 p.m. ET. Members of management will also be available for one-on-one meetings.

Both presentations will be available on the News and Events section of the company's website at www.cabalettabio.com. Replays will be available on the website for 90 days.

About Cabaletta Bio

Cabaletta Bio is a clinical-stage biotechnology company focused on the discovery and development of engineered T cell therapies, and exploring their potential to provide a deep and durable, perhaps curative, treatment, for patients with B cell-mediated autoimmune diseases. The Cabaletta Approach to selective B cell Ablation (CABA™) platform, in combination with Cabaletta's proprietary technology, utilizes Chimeric Auto Antibody Receptor (CAAR) T cells that are designed to selectively bind and eliminate only specific autoantibody-producing B cells while sparing normal antibody-producing B cells, which are essential for human health. The Company's lead product candidate, DSG3-CAART, is being evaluated in the DesCAARTes™ Phase 1 clinical trial as a potential treatment for patients with mucosal pemphigus vulgaris, a prototypical B cell-mediated autoimmune disease. The FDA granted Fast Track Designation for DSG3-CAART in May 2020. For more information about the DesCAARTes™ Phase 1 clinical trial, please visit our website ([DesCAARTes™ Phase 1 Trial](http://www.cabalettabio.com)). The Company's lead preclinical product candidate, MuSK-CAART, is in IND-enabling studies and is designed as a potential treatment for patients with MuSK-associated myasthenia gravis. For more information, visit www.cabalettabio.com.
