

Company Overview

PreCheck Health Services Inc. is a Florida corporation which distributes the PC8B, a medical screening device. The PC8B medical device is a powerful screening tool in managing patient's health which is FDA-cleared and patented. It serves as a Medical Device Data System making use of multiple technologies including photo plethysmography, volume plethysmography, ankle brachial indices, oxygen sensor, and Galvanic Skin Response. The mathematical analysis of the collected body signals provides bio-markers of cardio metabolic risk, autonomic neuropathy, vascular dysfunction and more. The device specifically assesses sudomotor function, cardiac autonomic function, and endothelial function and measures the ankle brachial indices. In addition, the device calculates a patented cardiometabolic risk score based on these assessments and measurements, body composition, vital signs, and fitness markers. Depending on the risk score for each factor, the physician will be able to recommend a treatment plan for the patient.
