## ITEM 7.01. REGULATION FD DISCLOSURE.

Effective July 1, 2016, Bank of America Corporation (the "Corporation") changed its accounting method for the amortization of premiums and accretion of discounts related to certain debt securities carried at fair value and held-to-maturity under FASB Accounting Standards Codification (ASC) 310-20, Nonrefundable fees and other costs (formerly known as "SFAS 91"), from the prepayment method (also referred to as the retrospective method) to the contractual method.

Under the prepayment method, the Corporation's amortization of premiums and accretion of discounts related to certain debt securities carried at fair value and held-to-maturity was based on the estimated principal prepayment assumptions on individual debt securities each reporting period. Under this method, prepayment experience, which is largely driven by interest rates, is continually evaluated to determine the estimated lives of the securities. When a change is made to the estimated lives of the securities, the related premium or discount is adjusted with a corresponding charge or benefit to interest income as if the current estimated lives had been applied since the acquisition of the securities. The application of the prepayment method results in a cumulative catch-up each period, recorded in interest income, based on changes in estimated prepayment assumptions. This method introduces substantial volatility to net interest income and earnings as interest rates move up or down.

Under the contractual method, premiums and discounts on debt securities are amortized and accreted, respectively, at a constant effective yield. The contractually required payment terms of each individual debt security are followed and prepayments of principal are not anticipated to shorten the term of the debt securities. Unlike the prepayment method, a cumulative catch-up is not required for each reporting period in applying the contractual method. As principal prepayments occur, the contractual method requires the acceleration of a pro-rata portion of the unamortized premium or discount be recorded in interest income such that the effective yield of the debt security remains constant throughout the life of the debt security.

The difference between the Corporation's use of the prepayment method and the contractual method used by its peers has resulted in a lack of comparability between the Corporation and those peers with respect to reported net interest income, a primary financial statement element for banks. To address this inconsistency, the Corporation has historically included certain non-GAAP disclosures in its earnings presentation materials to assist users of the Corporation's financial information in comparing its reported net interest income results with those of its peers. The contractual method of accounting will eliminate the need for these non-GAAP disclosures in future earnings presentation materials.

Under the applicable bank regulatory rules, the Corporation is not required to and, accordingly, will not restate previously-filed capital ratios. The cumulative impact of the change in accounting method would have resulted in an insignificant pro forma change of the Corporation's capital ratios.

Financial information for all prior periods presented herein have been updated to reflect this change in accounting method.

The information contained in this Form 8-K is being furnished to assist investors in understanding how the Corporation's results would have been presented in previously filed reports had such results been reported to reflect the change in accounting method discussed above.

Revised Supplemental Information to reflect the change in accounting method is attached hereto as Exhibit 99.1. This Revised Supplemental Information is being furnished pursuant to Item 7.01, and shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, nor shall the Revised Supplemental Information be deemed incorporated by reference into any filings under the Securities Act of 1933, as amended.

## Description of Accounting Change

Effective July 1, 2016, Bank of America Corporation (the "Corporation") changed its accounting method for the amortization of premiums and accretion of discounts related to certain debt securities carried at fair value and held-to-maturity under FASB Accounting Standards Codification (ASC) 310-20, Nonrefundable fees and other costs (formerly known as "SFAS 91"), from the prepayment method (also referred to as the retrospective method) to the contractual method.

Under the prepayment method, the Corporation's amortization of premiums and accretion of discounts related to certain debt securities carried at fair value and held-to-maturity was based on the estimated principal prepayment assumptions on individual debt securities each reporting period. Under this method, prepayment experience, which is largely driven by interest rates, is continually evaluated to determine the estimated lives of the securities. When a change is made to the estimated lives of the securities, the related premium or discount is adjusted with a corresponding charge or benefit to interest income as if the current estimated lives had been applied since the acquisition of the securities. The application of the prepayment method results in a cumulative catch-up each period, recorded in interest income, based on changes in estimated prepayment assumptions. This method introduces substantial volatility to net interest income and earnings as interest rates move up or down.

Under the contractual method, premiums and discounts on debt securities are amortized and accreted, respectively, at a constant effective yield. The contractually required payment terms of each individual debt security are followed and prepayments of principal are not anticipated to shorten the term of the debt securities. Unlike the prepayment method, a cumulative catch-up is not required for each reporting period in applying the contractual method. As principal prepayments occur, the contractual method requires the acceleration of a pro-rata portion of the unamortized premium or discount be recorded in interest income such that the effective yield of the debt security remains constant throughout the life of the debt security.

The difference between the Corporation's use of the prepayment method and the contractual method used by its peers has resulted in a lack of comparability between the Corporation and those peers with respect to reported net interest income, a primary financial statement element for banks. To address this inconsistency, the Corporation has historically included certain non-GAAP disclosures in its earnings presentation materials to assist users of the Corporation's financial information in comparing its reported net interest income results with those of its peers. The contractual method of accounting will eliminate the need for these non-GAAP disclosures in future earnings presentation materials.

Under the applicable bank regulatory rules, the Corporation is not required to and, accordingly, will not restate previously-filed capital ratios. The cumulative impact of the change in accounting method would have resulted in an insignificant pro forma change of the Corporation's capital ratios.

Financial information for all prior periods presented herein have been updated to reflect this change in accounting method.

(1) Nonperforming loans are included in the respective average loan balances. Income on these nonperforming loans is generally recognized on a cost recovery basis. Purchased credit-impaired
loans were recorded at fair value upon acquisition and accrete interest income over the estimated life of the loan.
(2) The impact of interest rate risk management derivatives on interest income is presented below. Interest income includes the impact of interest rate risk management contracts, which increased
(decreased) interest income on:
Federal funds sold and securities borrowed or purchased under agreements to resell
Debt securities
U.S. commercial loans and leases
Net hedge expense on assets

${ }^{(1)}$ FTE basis is a non-GAAP financial measure. FTE basis is a performance measure used by management in operating the business that management believes provides investors with a more accurate picture of the interest margin for comparative purposes. The Corporation believes that this presentation allows for comparison of amounts from both taxable and tax-exempt sources and is consistent with industry practices. (See Exhibit A: Non-GAAP Reconciliations - Reconciliations to GAAP Financial Measures on pages 29-30.)

All Other consists of ALM activities, equity investments, the international consumer card business, non-core mortgage loans and servicing activities, liquidating businesses, residual expense allocations and other. ALM activities encompass certain residential mortgages, debt securities, interest rate and foreign currency risk management activities, the impact of certain allocation methodologies and accounting hedge ineffectiveness. The results of certain ALM activities are allocated to our business segments. Equity investments include our merchant services joint venture as well as Global Principal Investments which is comprised of a portfolio of equity, real estate and other alternative investments.
${ }^{(2)}$ Includes elimination of segments' excess asset allocations to match liabilities (i.e., deposits) and allocated shareholders' equity of $\$ 463.4$ billion and $\$ 445.5$ billion for the years ended December 31,2015 and 2014; $\$ 499.5$ billion, $\$ 493.5$ billion, $\$ 474.1$ billion, $\$ 458.5$ billion, $\$ 456.2$ billion and $\$ 464.8$ billion for the second and first quarters of 2016, and the fourth, third, second and first quarters of 2015, respectively.
${ }^{(3)}$ Includes elimination of segments' excess asset allocations to match liabilities (i.e., deposits) and allocated shareholders' equity of $\$ 492.3$ billion, $\$ 510.0$ billion, $\$ 489.0$ billion, $\$ 461.9$ billion, $\$ 453.2$ billion, $\$ 475.1$ billion and $\$ 443.5$ billion at June 30, 2016, March 31, 2016, December 31, 2015, September 30, 2015, June 30, 2015, March 31, 2015 and December 31, 2014 , respectively.

## Exhibit A: Non-GAAP Reconciliations

## Bank of America Corporation and Subsidiaries

## Reconciliations to GAAP Financial Measures

(Dollars in millions)

The Corporation evaluates its business based on a fully taxable-equivalent basis, a non-GAAP financial measure. Total revenue, net of interest expense, includes net interest income on a fully taxable-equivalent basis and noninterest income. The Corporation believes that this presentation allows for comparison of amounts from both taxable and tax-exempt sources and is consistent with industry practices. The Corporation presents related ratios and analyses (i.e., efficiency ratios and net interest yield) on a fully taxable-equivalent basis. To derive the fully taxable-equivalent basis, net interest income is adjusted to reflect tax-exempt income on an equivalent before-tax basis with a corresponding increase in income tax expense. For purposes of this calculation, the Corporation uses the federal statutory tax rate of 35 percent. The efficiency ratio measures the costs expended to generate a dollar of revenue, and net interest yield measures the basis points the Corporation earns over the cost of funds.

The Corporation also evaluates its business based on the following ratios that utilize tangible equity, a non-GAAP financial measure. Tangible equity represents an adjusted shareholders' equity or common shareholders' equity amount which has been reduced by goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities. Return on average tangible common shareholders' equity measures the Corporation's earnings contribution as a percentage of adjusted average common shareholders' equity. The tangible common equity ratio represents adjusted ending common shareholders' equity divided by total assets less goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities. Return on average tangible shareholders' equity measures the Corporation's earnings contribution as a percentage of adjusted average total shareholders' equity. The tangible equity ratio represents adjusted ending shareholders' equity divided by total assets less goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities. Tangible book value per common share represents adjusted ending common shareholders' equity divided by ending common shares outstanding. These measures are used to evaluate the Corporation's use of equity. In addition, profitability, relationship and investment models all use return on average tangible shareholders' equity as key measures to support our overall growth goals.

See the table below and on page 30 for reconciliations of these non-GAAP financial measures to financial measures defined by GAAP for the years ended December 31, 2015 and 2014, and the three months ended June 30, 2016, March 31, 2016, December 31, 2015, September 30, 2015, June 30, 2015, and March 31, 2015. The Corporation believes the use of these non-GAAP financial measures provides additional clarity in assessing the results of the Corporation. Other companies may define or calculate supplemental financial data differently.

[^0]:    ${ }^{(1)}$ Tangible equity ratios and tangible book value per share of common stock are non-GAAP financial measures. We believe the use of ratios that utilize tangible equity provides additional useful information because they present measures of those assets that can generate income. Tangible book value per share provides additional useful information about the level of tangible assets in relation to outstanding shares of common stock. (See Exhibit A: Non-GAAP Reconciliations - Reconciliations to GAAP Financial Measures on pages 29-30.)

[^1]:    Nonperforming loans are included in the respective average loan balances. Income on these nonperforming loans is generally recognized on a cost recovery basis. Purchased credit-impaired loans were recorded at fair value upon acquisition and accrete interest income over the estimated life of the loan.
    ${ }^{(2)}$ The impact of interest rate risk management derivatives on interest income is presented below. Interest income includes the impact of interest rate risk management contracts, which increased (decreased) interest income on:

[^2]:     (decreased) interest expense on:

[^3]:    Classified in other assets on the Consolidated Balance Sheet.

[^4]:    ${ }^{(1)}$ These securities are primarily used to satisfy certain international regulatory liquidity requirements.
