VAALCO Announces Conversion of IFC Credit Facility to Term Loan

HOUSTON, July 06, 2016 (GLOBE NEWSWIRE) -- VAALCO Energy, Inc. (NYSE:EGY) today announced that it has executed an amended and restated loan agreement with the International Finance Corporation (IFC), the lender under the Company's credit facility, to convert the existing \$15 million balance under the revolving facility to a term loan. The new agreement provides for quarterly principal and interest payments through June 30, 2019 at a rate of LIBOR plus 5.75%. The loan is secured by VAALCO's offshore Gabon assets and related inventory.

The Company has the option to request to draw up to an additional \$5 million from the IFC between now and December 31, 2016, with any such drawn amounts to be amortized through June 30, 2018. Quarterly principal payments on the entire term loan, including the \$15 million converted amount, will begin after any additional funds are drawn, or VAALCO makes a determination it has no need for the additional funding; interest is paid quarterly throughout the entire term of the loan. All covenants under the agreement remain substantially the same except that the net debt to EBITDAX limitation has been raised from three times EBITDAX to five times EBITDAX through the end of 2016, and then reverts back to three times effective for the quarter ending March 31, 2017. There are no semi-annual redeterminations required under the new fixed term agreement.

Steve Guidry, the Company's Chief Executive Officer, commented: "We are very pleased with our new arrangement with the IFC which provides us increased certainty and financial flexibility. One of the goals in our ongoing strategic review process was to evaluate alternative financing options available to us. This mutually beneficial arrangement with the IFC serves as our first step in meeting that objective."
