Propanc Health Group Corporation Presentation Now Available for On-Demand Viewing

Company invites individual and institutional investors as well as advisors to log-on to VirtualInvestorConferences.com to view presentation

MELBOURNE, Australia, Sept. 14, 2016 /PRNewswire/ -- Propanc Health Group Corporation (OTCQB: PPCH) ("Propanc" or the "Company"), an emerging healthcare company focusing on development of new and proprietary treatments for cancer patients suffering from solid tumors such as pancreatic, ovarian and colorectal cancers, today announced that the September 8 presentation from James Nathanielsz, Chief Executive Officer, is now available for on-demand viewing at VirtualInvestorConferences.com.

LINK: <http://tinyurl.com/0908post>

Propanc Health Group Corporation presentation will be available 24/7 for 90 days. Investors and advisors may download shareholder materials from the "virtual trade booth" for the next three weeks.

Recent Company Activity:

- Propanc recently executed a contract manufacturing agreement with AmatsiQBiologicals, based in Gent, Belgium. The agreement covers the development and GMP (Good Manufacturing Practice) production of certain enzymes for development purposes, including but not limited to, first-in-man studies for the Company's lead product, PRP
- Propanc received investment to initiate GLP safety toxicology study for PRP, the Company's lead product

To be added to Propanc's distribution list, please email PPCH@kcsa.com with 'Propanc' in the subject line.

About Propanc

Propanc is developing new cancer treatments for patients suffering from pancreatic, ovarian and colorectal cancers. The Company has developed a formulation of anti-cancer compounds, which exert a number of effects designed to control or prevent tumors from recurring and spreading throughout the body. The products involve or employ pancreatic proenzymes, which are inactive precursors of enzymes.

In the near term, the Company intends to target patients with limited remaining therapeutic options for the treatment of solid tumors. In the future, it intends to develop its lead product to treat (i) early stage cancer, (ii) pre-cancerous diseases and (iii) as a preventative measure for patients at risk of developing cancer based on genetic screening.
