

# AirgainConnect® Fleet™ Achieves T-Mobile T-Priority Certification to Deliver Mission-Critical Connectivity for First Responders

SAN DIEGO--(BUSINESS WIRE)-- Airgain, Inc. (NASDAQ: AIRG), a leading provider of wireless connectivity solutions, today announced that its flagship all-in-one 5G vehicle gateway, AirgainConnect® Fleet (or "AC-Fleet") has achieved T-Mobile T-Priority certification. This designation ensures that first responders using T-Mobile's nationwide 5G network receive reliable, prioritized connectivity during emergencies, enabling mission-critical communications when it matters most.

T-Priority includes T-Mobile's network slicing service that gives first responders priority connectivity during emergencies, maintaining access to mission-critical applications even when networks are congested. By combining AC-Fleet's rugged, all-in-one design with T-Priority certification, public safety agencies gain a proven solution that helps ensure communications get through when every second counts.

"First responders need confidence that their communications will get through every time," said Brian Makarowski, Vice President of Product Management and Product Marketing at Airgain. "With T-Priority certification, AC-Fleet delivers uninterrupted connectivity on T-Mobile's network, helping officers, firefighters, and EMS teams stay mission-ready."

## Built for Mission-Critical Fleets

AC-Fleet is the industry's most compact "all-in-one," roof-mounted 5G vehicle gateway integrating a 5G modem, Wi-Fi 6 router, GPS/GNSS, and high-performance antennas in a discreet, 2-inch low-profile housing. Unlike traditional multi-component vehicle routers, AC-Fleet eliminates signal loss from long antenna cables, simplifies installation, reduces maintenance costs, and improves reliability.

Key features include:

- **Multi-network flexibility:** Support for up to 4 eSIM profiles with automatic failover between carriers.
- **Rugged reliability:** IP67/IP69K rated for dust, water, and high-pressure washdowns; tested to MIL-STD-810G standards.
- **Simplified management:** Local web UI or remote configuration via AC-Cloud for fleet-wide monitoring and updates.
- **Mission-ready design:** Compact form factor does not interfere with light bars or vehicle equipment.

With T-Priority certification, AC-Fleet further strengthens its value for law enforcement, fire, EMS, and government fleets that rely on secure, always-on connectivity for CAD/AVL, body-worn cameras, live video streaming, and telemedicine. In the U.S., hundreds of thousands of first responder vehicles are moving from legacy 4G to 5G solutions that lower cost of ownership and improve performance. With T-Priority certification, AC-Fleet becomes part of a select group of products approved to operate on T-Mobile's dedicated 5G first responder network slice.

This milestone advances Airgain's position to capture share in a large and growing US public safety vehicle connectivity market, with additional opportunities across including utilities, transportation, and government fleets.

### **Commitment to First Responders**

With T-Mobile T-Priority certification, AC-Fleet joins a select group of solutions purpose-built for mission-critical connectivity. This milestone reflects Airgain's commitment to simplifying wireless connectivity and equipping agencies with integrated, scalable solutions they can depend on—today and into the future.
