About VERB

[VERB Technology Company, Inc.](#) (NASDAQ: VERB) is a Software-as-a-Service, or SaaS, applications platform developer. Our platform is comprised of a suite of sales enablement business software products marketed on a subscription basis. Our applications, available in both mobile and desktop versions, are offered as a fully integrated suite, as well as on a standalone basis, and include verbCRM, our Customer Relationship Management application; verbLEARN, our Learning Management System application; and verbLIVE, our Interactive Livestream eCommerce and Video Webinar application.

Our suite of applications can be distinguished from other sales enablement applications because our applications utilize our proprietary interactive video technology as the primary means of communication between sales and marketing professionals and their customers and prospects. Moreover, the proprietary data collection and analytics capabilities of our applications inform our users in real time, on their device, when and for how long the prospects watched the video, how many times they watched it, and what they clicked-on, prompting the user to focus his or her time and efforts on hot leads or interested prospects rather than on those that have not seen the video or otherwise expressed interest in the content. Users can create their hot lead lists by using familiar, intuitive 'swipe left/swipe right' on-screen navigation. Our clients report that these capabilities provide for a much more efficient and effective sales process, resulting in increased sales conversion rates. We developed the proprietary patent-pending interactive video technology, as well as several other patent-issued and patent-pending technologies that serve as the unique foundation for all of our platform applications.

With offices in California and Utah, we provide subscription-based application services to approximately 100 enterprise clients for use in over 60 countries, in over 48 languages, which collectively account for a user base generated through more than 1.4 million downloads of our verbCRM application. Our technology is also being integrated into popular ERP, CRM, and marketing platforms offered by third-party developers, including Salesforce and Microsoft, among others.
