

Company Overview

Monopar Therapeutics is a clinical-stage biotechnology company developing novel radiopharmaceuticals for oncology and a new treatment for Wilson Disease, a rare genetic disorder. Its pipeline includes radiopharmaceuticals targeting advanced solid tumors and late-stage ALXN1840, a treatment for Wilson Disease. The radiopharma programs targeting advanced cancers include clinical-stage MNPR-101-Zr for imaging, and for therapy, clinical-stage MNPR-101-Lu and late-preclinical stage MNPR-101-Ac. Monopar builds its drug development pipeline through in-house efforts and licensing of late preclinical and clinical-stage therapeutics, leveraging its scientific and clinical expertise to reduce risk and accelerate development.
