Perma-Fix Partners with Veolia Nuclear Solutions to Expand Treatment Capabilities

Marks launch of expansion initiative at Perma-Fix Northwest Facility

ATLANTA, GA -- (Marketwired) -- 01/29/18 -- **Perma-Fix Environmental Services, Inc. (the "Company")** (NASDAQ: PESI) today announced a Cooperation Agreement with Veolia Nuclear Solutions. Under the agreement, Veolia Nuclear Solutions will provide its patented GeoMelt® system, cooperatively installed and operated by Perma-Fix at its Perma-Fix Northwest (PFNW) facility in Richland, Washington. Perma-Fix and Veolia Nuclear Solutions plan to perform treatability studies to demonstrate the system's capability to safely treat metallic, non-bulk sodium contaminated waste, which is generated from the sodium coolant used in certain types of nuclear reactors.

The treatability studies are designed to provide vital technical information for future permit modification through the Washington Department of Ecology and Department of Health. The current plan is to complete construction in the third quarter of 2018 and commence waste testing in late 2018.

"Veolia Nuclear Solutions is excited about this partnership with Perma-Fix, which will allow us to demonstrate the capabilities of our technologies for treating these difficult waste streams," said Ryan Dodd, director of the technology group for Veolia Nuclear Solutions Federal Services.

Mark Duff, Chief Executive Officer, stated, "This agreement marks the launch of an expansion initiative at our PFWN facility to broaden our market base by treating complex waste streams through new technologies and partnerships within our industry. We are especially delighted to partner with Veolia Nuclear Solutions, which brings extensive expertise and a wide range of capabilities in the nuclear waste industry. Expanding our PFWN facility to accept and treat these wastes will add a capability not readily available in our industry. This cooperation agreement further illustrates the unique nature of our facilities, permits and capabilities."

About Veolia

Veolia group is the global leader in optimized resource management. With over 163,000 employees worldwide, the Group designs and provides water, waste and energy management solutions that contribute to the sustainable development of communities and industries. Through its three complementary business activities, Veolia helps to develop access to resources, preserve available resources, and to replenish them. In 2016, the

Veolia group supplied 100 million people with drinking water and 61 million people with wastewater service, produced 54 million megawatt hours of energy and converted 30 million metric tons of waste into new materials and energy. Veolia Environnement (listed on Paris Euronext: VIE) recorded consolidated revenue of EUR24.39 billion in 2016. www.veolia.com

About Veolia Nuclear Solutions

Veolia's Nuclear Solutions, which unites the best-in-class operations of Veolia's Kurion, Alaron and Astaralis businesses, is a leading world-class player in nuclear facility clean-up and treatment of radioactive waste. It provides the most comprehensive range of technologies, expertise and services to develop the activity of facility restoration, decommissioning and treatment of low-and intermediate-level radioactive waste. www.nuclearsolutions.veolia.com

About Perma-Fix Environmental Services

Perma-Fix Environmental Services, Inc. is a nuclear services company and leading provider of nuclear and mixed waste management services. The Company's nuclear waste services include management and treatment of radioactive and mixed waste for hospitals, research labs and institutions, federal agencies, including the Department of Energy ("DOE"), the Department of Defense ("DOD"), and the commercial nuclear industry. The Company's nuclear services group provides project management, waste management, environmental restoration, decontamination and decommissioning, and radiological protection, safety and industrial hygiene capability to our clients. The Company operates three nuclear waste treatment facilities and provides nuclear services at DOE, DOD, and commercial facilities, nationwide.
