Adjusted EBITDA⁽¹⁾ was negative \$651 thousand for the second quarter of 2022 compared to \$567 thousand for the second quarter of 2021. Adjusted EBITDA⁽¹⁾ was negative \$448

thousand for the first half of 2022 compared to \$587 thousand for the first half of 2021. (Adjusted EBITDA is defined as net income or loss attributable to Tecogen, adjusted for interest, income taxes, depreciation and amortization, stock-based compensation expense, unrealized gain or loss on equity securities, goodwill impairment charges and other non-cash non-recurring charges or gains including abandonment of intangible assets and the extinguishment of debt. See the table following the Condensed Consolidated Statements of Operations for a reconciliation from net income (loss) to Adjusted EBITDA, as well as important disclosures about the company's use of Adjusted EBITDA).

"We saw a substantial increase in revenues for the first half of the year compared to 2021. However we also saw a significant increase in cost of goods due to the inflationary environment we presently find ourselves in," commented Benjamin Locke, Tecogen's Chief Executive Officer. "We have instituted price increases that we expect to positively impact our revenues and margins in H2 2022. We are further encouraged by the 30% investment tax credit included in the pending Inflation Reduction Act which will significantly help the economics of both our cogeneration and chiller systems as we continue to focus on clean cooling in our key market segments including controlled environment agriculture (CEA). We expect to have more announcements going forward on how our new business unit focused on CEA can create additional value to our shareholders."

(1) Non-GAAP Financial Measures

In addition to reporting net income, a U.S. generally accepted accounting principle ("GAAP") measure, this news release contains information about Adjusted EBITDA (net income (loss) attributable to Tecogen Inc adjusted for interest, income taxes, depreciation and amortization, stock-based compensation expense, unrealized gain or loss on investment securities, goodwill impairment charges and other non-cash non-recurring charges including abandonment of certain intangible assets and extinguishment of debt), which is a non-GAAP measure. The Company believes Adjusted EBITDA allows investors to view its performance in a manner similar to the methods used by management and provides additional insight into its operating results. Adjusted EBITDA is not calculated through the application of GAAP. Accordingly, it should not be considered as a substitute for the GAAP measure of net income and, therefore, should not be used in isolation of, but in conjunction with, the GAAP measure. The use of any non-GAAP measure may produce results that vary from the GAAP measure and may not be comparable to a similarly defined non-GAAP measure used by other companies.
