Disclaimers

Main Street Capital Corporation (MAIN) cautions that statements in this presentation that are forward-looking, and provide other than historical information, involve risks and uncertainties that may impact our future results of operations. The forward-looking statements in this presentation are based on current conditions as of February, 28 2020, and include, but are not limited to, statements regarding our goals, beliefs, strategies, future operating results and cash flows, operating expenses, investment originations and performance, available capital, payment and the tax attributes of future dividends and shareholder returns. Although our management believes that the expectations reflected in any forward-looking statements are reasonable, we can give no assurance that those expectations will prove to have been correct. Those statements are made based on various underlying assumptions and are subject to numerous uncertainties and risks, including, without limitation: our continued effectiveness in raising, investing and managing capital; adverse changes in the economy generally or in the industries in which our portfolio companies operate; changes in laws and regulations that may adversely impact our operations or the operations of one or more of our portfolio companies; the operating and financial performance of our portfolio companies; retention of key investment personnel; competitive factors; and such other factors described under the captions “Cautionary Statement Concerning Forward-Looking Statements” and “Risk Factors” included in our filings with the Securities and Exchange Commission (www.sec.gov). We undertake no obligation to update the information contained herein to reflect subsequently occurring events or circumstances, except as required by applicable securities laws and regulations.

This presentation is neither an offer to sell nor a solicitation of an offer to buy MAIN’s securities. An offering is made only by an applicable prospectus. This presentation must be read in conjunction with a prospectus in order to fully understand all of the implications and risks of the offering of securities to which the prospectus relates. A copy of such a prospectus must be made available to you in connection with any offering.

Distributable net investment income is net investment income, as determined in accordance with U.S. generally accepted accounting principles, or U.S. GAAP, excluding the impact of share-based compensation expense which is non-cash in nature. MAIN believes presenting distributable net investment income and the related per share amount is useful and appropriate supplemental disclosure of information for analyzing its financial performance since share-based compensation does not require settlement in cash. However, distributable net investment income is a non-U.S. GAAP measure and should not be considered as a replacement for net investment income and other earnings measures presented in accordance with U.S. GAAP. Instead, distributable net investment income should be reviewed only in connection with such U.S. GAAP measures in analyzing MAIN’s financial performance.

Corporate Overview and Investment Strategy

4th Quarter – 2019

MAIN is a Principal Investor in Private Debt and Equity

Hybrid debt and equity investment strategy, internally managed operating structure and focus on Lower Middle Market differentiates MAIN from other investment firms

Internally-managed Business Development Company (BDC)

- IPO in 2007
- Over $4.2 billion in capital under management(1)
  - Over $3.1 billion internally at MAIN(1)
  - Over $1.1 billion as a sub-adviser to a third party(1)

Primarily invests in the under-served Lower Middle Market (LMM)

- Targets companies with revenue between $10 million - $150 million; EBITDA between $3 million - $20 million
- Provides single source solutions including a combination of first lien, senior secured debt and equity financing

Debt investments in Middle Market companies

- Issuances of first lien, senior secured and/or rated debt investments
- Larger companies than LMM investment strategy

Debt investments originated in collaboration with other funds

- First lien, senior secured debt investments in privately held companies originated through strategic relationships with other investment funds
- Similar in size, structure and terms to LMM and Middle Market investments

Attractive asset management advisory business

Significant management ownership / investment in MAIN

Headquartered in Houston, Texas

(1) Capital under management includes undrawn portion of debt capital as of December 31, 2019

MAIN is a Principal Investor in Private Debt and Equity

MAIN's unique investment strategy, efficient operating structure and conservative capitalization are designed to provide sustainable, long-term growth in recurring monthly dividends and long-term capital appreciation to our shareholders

Long-term focus on delivering our shareholders sustainable growth in net asset value and recurring dividends per share

Consistent cash dividend yield – dividends paid monthly

- MAIN has never decreased its monthly dividend rate
- Began paying periodic supplemental dividends in January 2013 and moved to semi-annual supplemental dividends in July 2013

Owns three Small Business Investment Company (SBIC) Funds

- Main Street Mezzanine Fund (2002 vintage), Main Street Capital II (2006 vintage) and Main Street Capital III (2016 vintage)
- Provides access to 10-year, low cost, fixed rate government-backed leverage

Strong capitalization and liquidity position – stable, long-term debt and significant available liquidity to take advantage of opportunities

- Favorable opportunities in capital markets through investment grade rating of BBB/Stable from Standard & Poor's Rating Services
- Total SBIC debenture regulatory financing capacity of $350.0 million[1]

(1) MAIN received a $25.0 million commitment from the SBA in order to issue new SBIC debentures in the future and opportunistically prepaid $34.0 million of existing SBIC debentures during the twelve months ended December 31, 2019. As a result, the current effective maximum amount of SBIC debenture financing capacity under its three existing licenses is $347.0 million

MAIN is a Principal Investor in Private Debt and Equity

Focus on LMM equity investments and efficient operating structure differentiates MAIN and provides opportunity for significant total returns for our shareholders

Equity investments in LMM portfolio provide both the opportunity to grow net asset value (NAV) per share and generate recurring dividend income and periodic realized gains to support MAIN's dividend growth

- NAV growth of $11.06 per share (or 86%) since 2007
- Cumulative net realized gains from LMM portfolio investments of $137.2 million ($50.8 million net for the total investment portfolio) since the Initial Public Offering
- Approximately $3.19 per share in cumulative, pre-tax net unrealized appreciation on LMM portfolio at December 31, 2019
- Realized gains provide taxable income in excess of net investment income and help fund MAIN's supplemental dividends

Internally managed operating structure provides significant operating leverage

- Favorable ratio of total operating expenses, excluding interest expense, to average total assets of approximately 1.4%(1)
- Greater portion of gross portfolio returns are delivered to our shareholders
- Significant positive impact to Net Investment Income
- Alignment of interests between MAIN management and our shareholders

(1) Based upon the year ended December 31, 2019

MAIN Strategy Produces Differentiated Returns

Enhanced Value Proposition - Three Ways to Win are Better Than One

1. Sustain and Grow Total Dividends
   - Efficient operating structure provides operating leverage to grow distributable net investment income, and dividends paid, as investment portfolio and total investment income grow
   - Paid or declared $28.37 per share in total dividends since October 2007 IPO at $15.00 per share ($24.33 per share in regular dividends and $4.04 per share in supplemental dividends)
   - 86% increase in monthly dividends from $0.33 per share paid in Q4 2007 to declared dividends of $0.615 per share for Q2 2020
   - Never decreased regular monthly dividends (including through 2008/2009 recession)
   - Supplemental dividends first declared in Q4 2012 primarily due to realized gains from LMM equity component of investment strategy
   - Currently transitioning semi-annual supplemental dividends into monthly dividends gradually over time
   - Multi-faceted investment strategy supports growth of total dividends over various cycles and markets

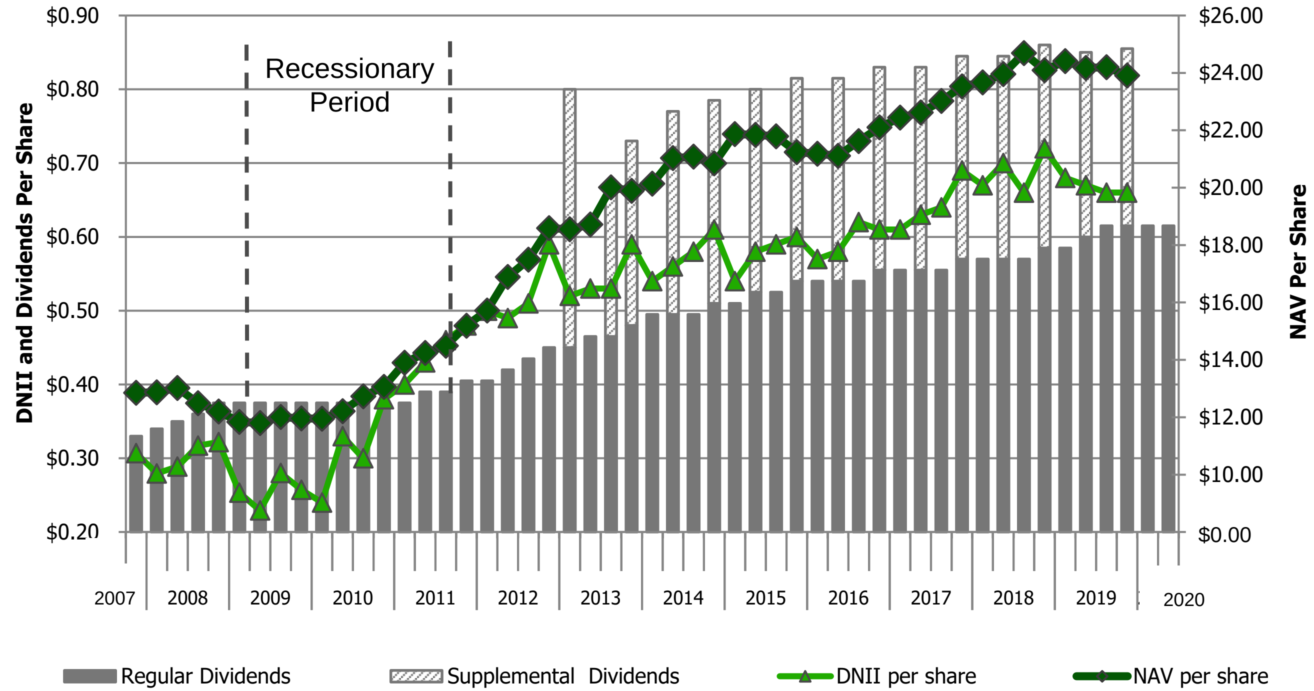
2. Meaningfully Grow Net Asset Value (“NAV”) Per Share
   - $12.85 at December 31, 2007 to $23.91 at December 31, 2019 – 86% growth; CAGR of 5.3%
   - Represents incremental economic return to investors beyond dividends
   - MAIN’s debt-focused peers (which comprises most BDCs) cannot generate NAV per share growth through the cycles
   - Unrealized appreciation is a good proxy for future dividend growth without the need for additional capital through growing portfolio dividend income and harvested realized gains from equity investments
   - Ability to grow NAV per share provides opportunity for MAIN stock share price appreciation and additional shareholder returns

3. Supplement Growth in Distributable Net Investment Income with Periodic Realized Gains
   - LMM equity component of investment strategy provides opportunity for meaningful realized gains (analogous to PIK income on debt investments from cash flow perspective, but more tax efficient and without cap on upside)
   - Realized gains validate the quality of MAIN’s unrealized appreciation
   - Realized gains can be paid to shareholders as dividends or retained for future reinvestment due to MAIN’s unique tax structure

Quarterly Historical Dividends, Net Asset Value ("NAV") and Distributable Net Investment Income ("DNII") Per Share Growth

MAIN's unique focus on equity investments in the Lower Middle Market provides the opportunity for significant NAV per share growth

MAIN's efficient operating structure provides significant operating leverage, greater dividends and greater overall returns for our shareholders



- Includes recurring monthly and semi-annual supplemental dividends paid and declared as of February 27, 2020.
- Annual return on equity averaging approximately 12.3% from 2010 through the fourth quarter of 2019

Lower Middle Market (LMM) Investment Strategy

LMM investment strategy differentiates MAIN from its competitors and provides attractive risk-adjusted returns

Investment Objectives

- High cash yield from secured debt investments (10.9% weighted-average cash coupon as of December 31, 2019); plus
- Dividend income and periodic capital gains from equity investments

Investments are structured for (i) protection of capital, (ii) high recurring income and (iii) meaningful capital gain opportunity

Focus on self-sponsored, "one stop" financing opportunities

- Partner with business owners and entrepreneurs
- Recapitalization, buyout, growth and acquisition capital
- Extensive network of grass roots referral sources
- Strong and growing "Main Street" brand recognition / reputation

Provide customized financing solutions

Investments have low correlation to the broader debt and equity markets and attractive risk-adjusted returns

LMM Investment Opportunity

MAIN targets LMM investments in established, profitable companies

Characteristics of LMM provide beneficial risk-reward investment opportunities

Large and critical portion of U.S. economy
- 175,000+ domestic LMM businesses[(1)]

LMM is under-served from a capital perspective and less competitive

Inefficient asset class generates pricing inefficiencies
- Typical entry enterprise values between 4.5X – 6.5X EBITDA
- Typical entry leverage multiples between 2.0X – 4.0X EBITDA to MAIN debt investment

Partner relationship with the management teams of our portfolio companies vs a "commoditized vendor of capital"

(1) Source: U.S. Census 2012 – U.S. Data Table by Enterprise Receipt Size; 2012 County Business Patterns and 2012 Economic Census; includes Number of Firms with Enterprise Receipt Size between $10,000,000 and $99,999,999

Private Loan Investment Strategy

Private Loan portfolio investments are primarily debt investments in privately held companies which have been originated through strategic relationships with other investment funds on a collaborative basis, and are often referred to in the debt markets as "club deals"

Investment Objectives

- Access proprietary investments with attractive risk-adjusted return characteristics
- Generate cash yield to support MAIN monthly dividend

Investment Characteristics

- Investments in companies that are consistent with the size of companies in our LMM and Middle Market portfolios
- Proprietary investments originated through strategic relationships with other investment funds on a collaborative basis
- Current Private Loan portfolio companies have weighted-average EBITDA of approximately $57.8 million(1)

Investments in secured debt investments

- First lien, senior secured debt investments
- Floating rate debt investments

8% – 12% targeted gross yields

- Weighted-average effective yield(2) of 9.5%
- Net returns positively impacted by lower overhead requirements and modest use of leverage
- Floating rate debt investments provide matching with MAIN's floating rate credit facility

(1) This calculation excludes three Private Loan portfolio companies as EBITDA is not a meaningful metric for these portfolio companies

(2) Weighted-average effective yield includes amortization of deferred debt origination fees and accretion of original issue discount, but excludes fees payable upon repayment of the debt instruments and any debt investments on non-accrual status

Middle Market Debt Investment Strategy

MAIN maintains a portfolio of debt investments in Middle Market companies

Investment Objective
- Generate cash yield to support MAIN monthly dividend

Investments in secured and/or rated debt investments
- First lien, senior secured debt investments
- Floating rate debt investments

Larger companies than the LMM investment strategy
- Current Middle Market portfolio companies have weighted-average EBITDA of approximately $85.0 million[(1)]

Large and critical portion of U.S. economy
- Nearly 200,000 domestic Middle Market businesses[(2)]

More relative liquidity than LMM investments

6% – 10% targeted gross yields
- Weighted-average effective yield[(3)] of 8.6%
- Net returns positively impacted by lower overhead requirements and modest use of leverage
- Floating rate debt investments provide matching with MAIN's floating rate credit facility

(1) This calculation excludes two Middle Market portfolio companies as EBITDA is not a meaningful metric for these portfolio companies

(2) Source: National Center for The Middle Market; includes number of U.S. domestic businesses with revenues between $10 million and $1 billion

(3) Weighted-average effective yield includes amortization of deferred debt origination fees and accretion of original issue discount, but excludes fees payable upon repayment of the debt instruments and any debt investments on non-accrual status

Asset Management Business

MAIN's asset management business represents additional income diversification and the opportunity for greater shareholder returns

MAIN's internally managed operating structure provides MAIN's shareholders the benefits of this asset management business

In May 2012, MAIN[(1)] entered into an investment sub-advisory agreement with the investment adviser to HMS Income Fund, Inc., a non-listed BDC

- MAIN[(1)] provides asset management services, including sourcing, diligence and post-investment monitoring
- MAIN[(1)] receives 50% of the investment adviser's base management fee and incentive fees
  - MAIN[(1)] base management fee – 1% of total assets
  - MAIN[(1)] incentive fees – 10% of net investment income above a hurdle and 10% of net realized capital gains
  - MAIN earned $2.0 million of incentive fees in the twelve months ended December 31, 2019

Benefits to MAIN

- No significant increases to MAIN's operating costs to provide services (utilize existing infrastructure and leverage fixed costs)
- No invested capital – monetizing the value of MAIN franchise
- Significant positive impact on MAIN's financial results
  - $2.8 million contribution to net investment income in the fourth quarter of 2019[(2)]
  - $11.7 million contribution to net investment income in the twelve months ended December 31, 2019[(2)]
  - $74.5 million of cumulative unrealized appreciation as of December 31, 2019

(1) Through MAIN's wholly owned unconsolidated subsidiary, MSC Adviser I, LLC

(2) Contribution to Net Investment Income includes (a) dividend income received by MAIN from MSC Adviser I, LLC and (b) operating expenses allocated from MAIN to MSC Adviser I, LLC

MAIN Regulatory Framework

Highly regulated structure provides significant advantages and protections to our shareholders, including investment transparency, tax efficiency and beneficial leverage

Operates as a Business Development Company

- Regulated by Securities and Exchange Commission - 1940 Act
- Publicly-traded, private investment company

Regulated Investment Company (RIC) tax structure

- Eliminates corporate level income tax
- Efficient tax structure providing high yield to investors
- Passes through capital gains to investors

Small Business Investment Company (SBIC) subsidiaries

- Regulated by the U.S. Small Business Administration (SBA)
- Access to low cost, fixed rate, long-term leverage
- Total SBIC debenture regulatory financing capacity of $350.0 million[1]
- Total outstanding leverage of $311.8 million through our three wholly owned SBIC Funds[1]
- MAIN is a previous SBIC of the Year Award recipient

(1) MAIN received a $25.0 million commitment from the SBA in order to issue new SBIC debentures in the future and opportunistically prepaid $34.0 million of existing SBIC debentures during the twelve months ended December 31, 2019. As a result, the current effective maximum amount of SBIC debenture financing capacity under its three existing licenses is $347.0 million

MAIN Corporate Structure – Internally Managed

"Internally managed" structure means no external management fees or expenses are paid, providing operating leverage to MAIN's business; MAIN targets total operating and administrative costs at or less than 2% of assets

Main Street Capital Corporation (BDC/RIC)
Assets: ~$2,157 million

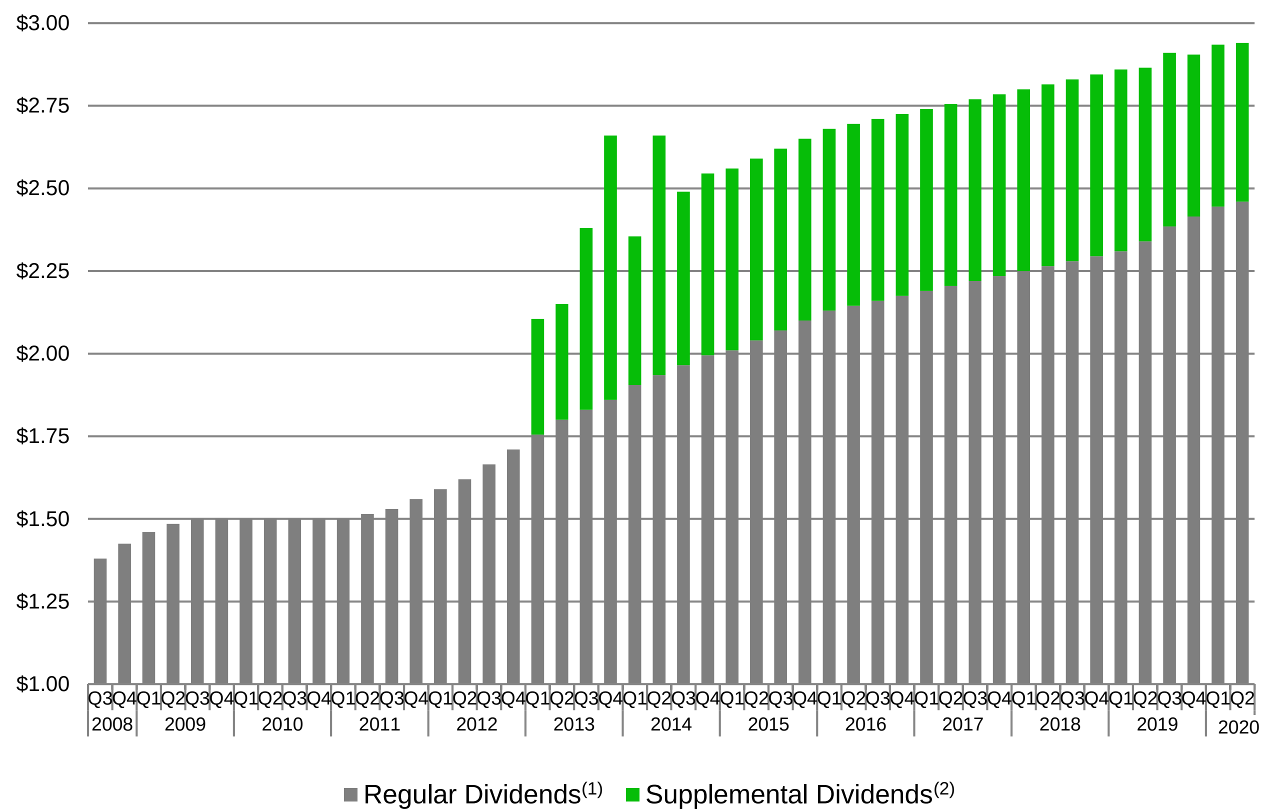
Post-IPO TTM Dividends Per Share – Sustainable Growth

Cumulative dividends paid or declared from October 2007 IPO (at $15.00 per share) through Q2 2020 equal $28.37 per share(1)

Recurring monthly dividend has never been decreased and has shown meaningful (86%) growth since IPO

Based upon the current annualized monthly dividends for the first quarter of 2020 and the annualized semi-annual supplemental dividend declared for December 2019, the annual effective yield on MAIN's stock is 7.3%(3), or 6.1%(3) if the supplemental dividends are excluded

TTM Dividends Per Share



(1) Based upon dividends which have been paid or declared as of February 27, 2020

(2) Includes supplemental dividends which have been paid or declared as of February 27, 2020

(3) As of February 26, 2020; based upon the closing market price of $40.12 per share, the annualized most recently declared monthly dividends and the annualized most recent semi-annual supplemental dividend paid or declared

Transition of Supplemental Dividends into Monthly Dividends

MAIN has concluded that it is in position to begin the conversion of its supplemental dividends into monthly dividends over multiple years

MAIN intends for the transition to allow MAIN to simplify its dividend policy

Background and History

- MAIN declared its first supplemental dividend in Q4 2012
- MAIN was primarily investing in LMM debt and equity prior to 2012
- MAIN generated substantial realized gains from its LMM equity investments and was required to distribute these gains in the form of monthly dividends or supplemental dividends to maintain its RIC tax status
- In 2012 MAIN chose supplemental dividends to better match the periodic nature of the realized gains
- MAIN's business model and investment portfolio has evolved since 2012, and MAIN concluded it was time to begin the conversion to monthly dividends only beginning in 2019
  - Increased size and diversity of MAIN's investment portfolio, including the growth of the MM and PL debt portfolios
  - Growth and diversity of the sources of MAIN's investment income
  - Increasing dividend income from LMM portfolio equity investments and long-term desired holding period of these equity investments

Transition Plans

- MAIN currently intends to gradually convert its supplemental dividends into its monthly dividends over multiple years until the supplemental dividends are completely absorbed into the monthly dividends
- Goal is to have a dividend policy that is easier to understand and that allows third parties to accurately reflect MAIN's total dividend yield
- Transition should enhance the opportunity for MAIN to retain a portion of its realized gains through its various taxable entities for future reinvestment and additional investment income growth
- Factors that may impact our level of total dividends include, but are not limited to, market interest rates and related volatility, level of investment originations and repayments, overall performance of our investment portfolio and the overall performance of the specific industries and markets that we invest in and the overall U.S. economy.

(2) SBIC Debentures are not included as "senior debt" for purposes of the BDC 200% asset coverage requirements pursuant to exemptive relief received by MAIN; Debt to NAV Ratio is calculated based upon the par value of debt
(3) Non-SBIC Debt to NAV Ratio is calculated based upon the par value of debt
(4) Net debt in this ratio includes par value of debt less cash and cash equivalents
(5) DNII + interest expense / interest expense on a trailing twelve month basis

Stable, Long-Term Leverage – Significant Unused Capacity

MAIN maintains a conservative capital structure, with limited overall leverage and low cost, long-term debt

Capital structure is designed to match expected duration and fixed/floating rate nature of investment portfolio assets

Facility	Interest Rate	Maturity	Principal Drawn
$705.0 million Credit Facility [1]	L+1.875% floating (3.7%[2])	September 2023 (fully revolving until maturity)	$300.0 million
Notes Payable	4.5% fixed	Redeemable at MAIN's option at any time, subject to certain make-whole provisions; Matures December 1, 2022	$185.0 million
Notes Payable	5.2% fixed	Redeemable at MAIN's option at any time, subject to certain make-whole provisions; Matures May 1, 2024	$325.0 million
SBIC Debentures	3.6% fixed (weighted average)	Various dates between 2020 - 2028 (weighted average duration = 5.1 years)	$311.8 million

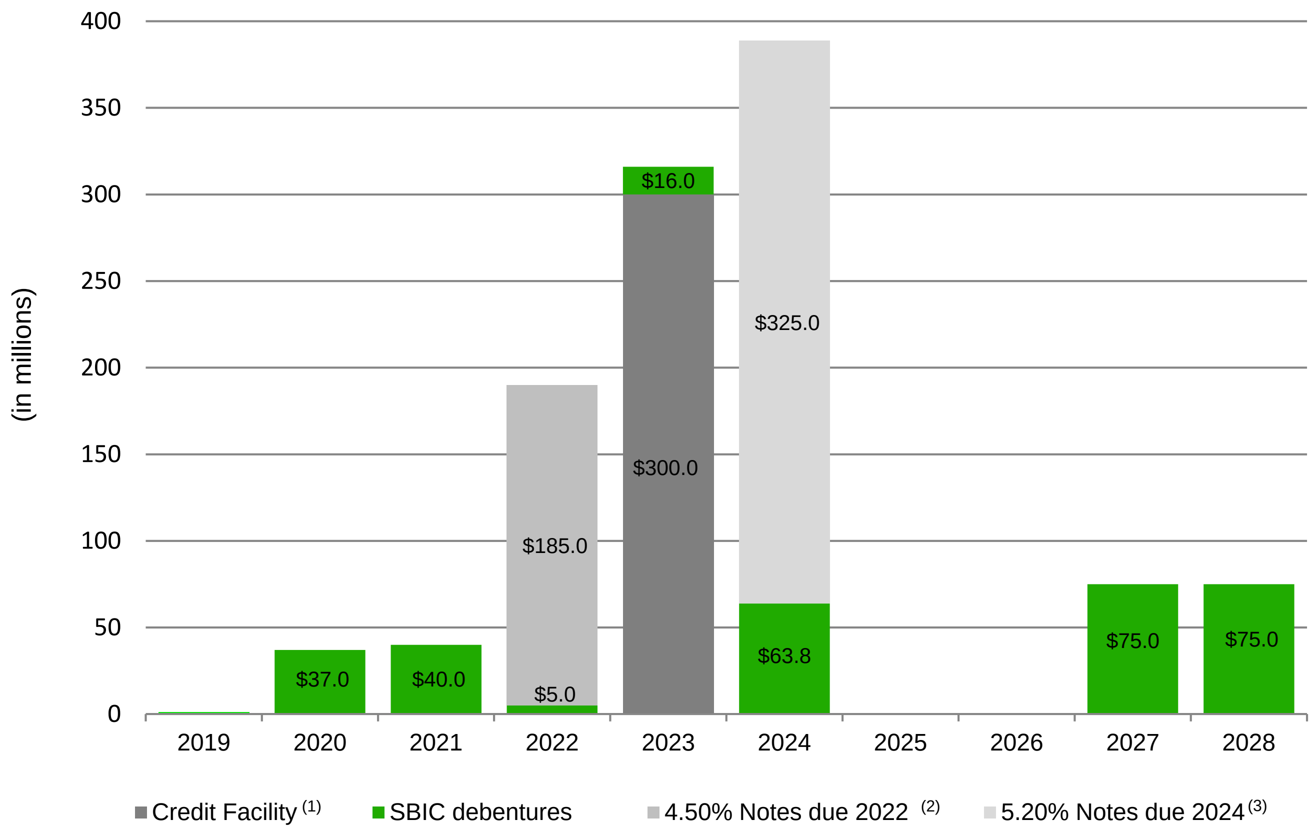
(1) As of December 31, 2019, MAIN’s credit facility had $705.0 million in total commitments from 17 relationship banks, with an accordion feature which could increase total commitments up to $800.0 million

(2) Revolver rate reflects the rate based on LIBOR as of December 31, 2019 and effective as of the contractual reset date as of January 1, 2020

Long-term Maturity of Debt Obligations

MAIN's conservative capital structure provides long-term access to attractively-priced and structured debt facilities

- Allows for investments in assets with long-term holding periods / illiquid positions and greater yields and overall returns
- Provides downside protection and liquidity through economic cycles
- Allows MAIN to be opportunistic during periods of economic uncertainty



(1) Based upon outstanding balance as of December 31, 2019; total commitments at December 31, 2019 were $705.0 million
(2) Issued in November 2017; redeemable at MAIN's option at any time, subject to certain make-whole provisions
(3) Issued in April 2019 with a follow-on issuance in December 2019; redeemable at MAIN's option at any time, subject to certain make-whole provisions

Interest Rate Impact and Sensitivity

While MAIN financial results are subject to significant impact from changes in interest rates, upside is greater than downside due to majority fixed rate debt obligations and majority floating rate debt investments with minimum interest rate floors

- 73% of MAIN's outstanding debt obligations have fixed interest rates[4], limiting the increase in interest expense
- 74% of MAIN's debt investments bear interest at floating rates[4], the majority of which contain contractual minimum index rates, or "interest rate floors" (weighted-average floor of approximately 110 basis points)[5]
- Provides MAIN the opportunity to achieve significant increases in net investment income if interest rates rise

The following table illustrates the approximate annual changes in the components of MAIN's net investment income due to hypothetical increases (decreases) in interest rates[1][2] (dollars in thousands):

Basis Point Increase (Decrease) in Interest Rate	Increase (Decrease) in Interest Income	(Increase) Decrease in Interest Expense[3]	Increase (Decrease) in Net Investment Income	Increase (Decrease) in Net Investment Income per Share[6]

(1) Assumes no changes in the portfolio investments, outstanding revolving credit facility borrowings or other debt obligations existing as of December 31, 2019

(2) Assumes that all LIBOR and prime rates would change effectively immediately on the first day of the period. However, the actual contractual LIBOR rate reset dates would vary throughout each month generally on either a monthly or quarterly basis across both the investments and our revolving credit facility

(3) The hypothetical (increase) decrease in interest expense would be impacted by the changes in the amount of debt outstanding under our revolving credit facility, with interest expense (increasing) decreasing as the debt outstanding under our revolving credit facility increases (decreases)

(4) As of December 31, 2019

(5) Weighted-average interest rate floor calculated based on debt principal balances as of December 31, 2019

(6) Per share amount is calculated using shares outstanding as of December 31, 2019
