Columbia Sportswear Company Reports First Quarter 2021 Financial Results and Raises Full Year 2021 Financial Outlook

First Quarter 2021 Highlights

- Net sales increased 10 percent to \$625.6 million, compared to first quarter 2020.
- Operating income of \$70.5 million, or 11.3 percent of net sales, compared to first quarter 2020 operating loss of \$2.0 million, or (0.3) percent of net sales.
- Diluted earnings per share of \$0.84, compared to break even diluted earnings per share in first quarter 2020.
- Exited the quarter with \$874.6 million in cash and short-term investments and no borrowings.
- The Company repurchased \$11.2 million of common stock during the quarter.
- On April 23, 2021, the Board of Directors approved a regular quarterly dividend of \$0.26 per share.

Full Year 2021 Financial Outlook

The following forward-looking statements reflect our expectations as of April 29, 2021 and are subject to significant risks and business uncertainties, including those factors described under "Forward-Looking Statements" below. Additional disclosures and financial outlook details can be found in the Full Year 2021 Financial Outlook section below and the CFO Commentary and Financial Review presentation.

- Net sales of \$3.04 to \$3.08 billion, representing net sales growth of 21.5 to 23.0 percent compared to 2020.
- Operating income of \$347 to \$369 million, representing operating margin of 11.4 to 12.0 percent.
- Diluted earnings per share of \$4.05 to \$4.30.

PORTLAND, Ore.--(BUSINESS WIRE)-- Columbia Sportswear Company (NASDAQ: COLM, the "Company"), a leading innovator in outdoor, active and everyday lifestyle apparel, footwear, accessories and equipment products, today announced first quarter 2021 financial results for the period ended March 31, 2021.

Chairman, President and Chief Executive Officer Tim Boyle commented, "I'm pleased to report the pace of fundamental recovery exceeded our expectations in the first quarter, resulting in a return to net sales growth and financial results that were stronger than we anticipated. Business momentum was led by our direct-to-consumer e-commerce business which grew 35 percent year-over-year, reaching 20 percent of our total net sales mix. In our wholesale business, we experienced a strong finish to the Fall 2020 sales season as well as excellent early season sell-through of our Spring 2021 assortment. Consumer demand is

high and retail inventories are lean, resulting in a favorable full price selling environment. I'd like to thank our operations and distribution center teams that did an amazing job mitigating industry-wide supply chain disruptions and enabling us to deliver these results today.

"Based on first quarter results and visibility provided by early Spring 2021 sell-through, our Fall 2021 order book and business fundamentals, we are increasing our full year financial outlook. I'm encouraged by the strong start to the year, but mindful that we must continue to carefully navigate operational challenges and quickly adapt to changing business conditions and ongoing pandemic related disruptions.

"Our fortress balance sheet remains strong, with cash and short-term investments totaling \$875 million with no bank borrowings at quarter end. We are committed to driving sustainable and profitable long-term growth and investing in our strategic priorities to:

- drive brand awareness and sales growth through increased, focused demand creation investments;
- enhance consumer experience and digital capabilities in all our channels and geographies;
- expand and improve global direct-to-consumer operations with supporting processes and systems; and
- invest in our people and optimize our organization across our portfolio of brands."

CFO's Commentary and Financial Review Presentation Available Online

For a detailed review of the Company's first quarter 2021 financial results and additional updates relating to the COVID-19 pandemic, please refer to the CFO Commentary and Financial Review presentation furnished to the Securities and Exchange Commission (the "SEC") on a Current Report on Form 8-K and published on the Investor Relations section of the Company's website at <http://investor.columbia.com/results.cfm> at approximately 4:15 p.m. ET today. Analysts and investors are encouraged to review this commentary prior to participating in our conference call.

COVID-19 Update

The Company's top priority throughout this pandemic remains to protect the health and safety of our employees, their families, our customers and our communities. While there were isolated temporary store closures resulting from local regulations or safety concerns, the majority of the Company's owned stores remained open throughout first quarter 2021. Overall brick & mortar store traffic trends vary by region but remain below prior year levels. First quarter 2021 results include the impact of port congestion and logistics constraints that resulted in later timing of Spring 2021 inventory receipts and deliveries. Please refer to the CFO Commentary and Financial Review presentation for a detailed review of COVID-19 pandemic related issues and our responses.

First Quarter 2021 Financial Results

(All comparisons are between first quarter 2021 and first quarter 2020, unless otherwise noted.)

Net sales increased 10 percent to \$625.6 million from \$568.2 million for the comparable

period in 2020. Business momentum was led by direct-to-consumer ("DTC") e-commerce net sales growth as well as better than planned sequential improvement in DTC brick & mortar trends.

Gross margin expanded 360 basis points to 51.4 percent of net sales from 47.8 percent of net sales for the comparable period in 2020. Gross margin expansion was primarily driven by decreased reserve provisions related to less excess inventory, lower DTC promotional levels and favorable channel and region sales mix.

SG&A expenses decreased 8 percent to \$254.4 million, or 40.7 percent of net sales, from \$276.8 million, or 48.7 percent of net sales, for the comparable period in 2020. The decrease in SG&A expenses primarily reflects a reduction in bad debt expense driven by a healthier wholesale customer base, partially offset by higher incentive and personnel expenses. The reduction in bad debt expense was driven by incremental COVID-related bad debt reserve provisions in first quarter 2020, compared to a reduction of bad debt reserves in first quarter 2021.

Operating income of \$70.5 million, or 11.3 percent of net sales, compared to an operating loss of \$2.0 million, or (0.3) percent of net sales, for the comparable period in 2020.

Net income of \$55.9 million, or \$0.84 per diluted share, compared to net income of \$0.2 million, or break even diluted earnings per share, for the comparable period in 2020.

Balance Sheet as of March 31, 2021

Cash, cash equivalents and short-term investments totaled \$874.6 million, compared to \$706.9 million at March 31, 2020.

The Company had no borrowings, compared to short-term borrowings of \$174.4 million at March 31, 2020.

Inventories decreased 9 percent to \$525.7 million, compared to \$577.1 million at March 31, 2020. The reduction in inventory was primarily driven by lower Spring 2021 inventory purchases, a reduction of excess inventory and delayed receipts of Spring 2021 inventory. Inventory at quarter-end primarily consisted of current and future season product. Aged inventories represent a manageable portion of our total inventory mix.

Cash Flow for the Three Months Ended March 31, 2021

Net cash flow from operating activities was \$110.9 million, compared to net cash flow from operating activities of \$12.8 million for the same period in 2020.

Capital expenditures totaled \$3.9 million, compared to \$9.5 million for the same period in 2020.

Share Repurchases for the Three Months Ended March 31, 2021

In first quarter 2021, the Company repurchased 108,987 shares of common stock for an aggregate of \$11.2 million, or an average price per share of \$102.98.

At March 31, 2021, \$471.0 million remained available under our current stock repurchase

authorization, which does not obligate the Company to acquire any specific number of shares or to acquire shares over any specified period of time.

Quarterly Cash Dividend

The Board of Directors approved a regular quarterly cash dividend of \$0.26 per share, payable on May 27, 2021 to shareholders of record on May 13, 2021.

Full Year 2021 Financial Outlook

(Additional financial outlook details can be found in the CFO Commentary and Financial Review presentation.)

The Company's 2021 Financial Outlook is forward-looking in nature, and the following forward-looking statements reflect our expectations as of April 29, 2021 and are subject to significant risks and business uncertainties, including those factors described under "Forward-Looking Statements" below. These risks and uncertainties limit our ability to accurately forecast results. This outlook reflects our estimates as of April 29, 2021 regarding the impact on our operations of the COVID-19 pandemic, economic conditions, supply chain and logistics capacity constraints, and changes in consumer behavior and confidence, as well as geopolitical tensions. This outlook assumes a sequential recovery in brick & mortar retail traffic and sales throughout 2021. However, it is not possible to determine the ultimate impact on our operations for 2021, or whether other currently unanticipated direct or indirect consequences of the pandemic are reasonably likely to materially affect our operations. Projections are predicated on normal seasonal weather globally.

Net sales are expected to increase 21.5 to 23.0 percent (prior 18 to 20 percent) to \$3.04 to \$3.08 billion (prior \$2.95 to \$3.00 billion) from \$2.50 billion in 2020.

Gross margin is expected to improve 110 to 130 basis points to 50.0 to 50.2 percent of net sales (prior approximately 50 percent) from 48.9 percent of net sales in 2020.

SG&A expenses are expected to increase at a slower rate than net sales growth. SG&A expenses as a percent of net sales is expected to be 38.7 to 39.1 percent (prior 39.2 to 39.7 percent), compared to SG&A expenses as a percent of net sales of 43.9 percent in 2020. Demand creation as a percent of net sales is anticipated to be 6.0 percent in 2021, compared to 5.7 percent in 2020.

Operating income is expected to be \$347 to \$369 million (prior \$320 to \$346 million), resulting in operating margin of 11.4 to 12.0 percent (prior 10.8 to 11.5 percent) compared to operating margin of 5.5 percent in 2020.

Effective income tax rate is expected to be approximately 22 percent. The effective income tax rate may be affected by unanticipated impacts from changes in international, federal or state tax policies, changes in the Company's geographic mix of pre-tax income, other discrete events, as well as differences from our estimate of the tax benefits associated with employee equity awards and our estimate of the tax impact of various tax initiatives.

Net income is expected to be \$271 to \$288 million (prior \$250 to \$270 million), resulting in diluted earnings per share of \$4.05 to \$4.30 (prior \$3.75 to \$4.05).

Foreign Currency

Foreign currency translation is anticipated to increase 2021 net sales growth by approximately 130 basis points.

Foreign currency is expected to have essentially no impact on earnings as favorable foreign currency translation impacts are anticipated to be offset by foreign currency transactional effects from hedging of production.

Balance Sheet and Cash Flows

Operating cash flow is expected to be \$250 to \$270 million (prior \$300 to \$320 million). The lower operating cash flow forecast for 2021 is primarily driven by changes to projected year-end inventory. This change in outlook is based on the expectation of receiving Spring 2022 inventory earlier than previously projected.

Capital expenditures are planned to be \$60 to \$80 million.

First Half 2021 Commentary

Our annual net sales are weighted more heavily toward the Fall/Winter season, while operating expenses are more equally distributed throughout the year, resulting in a highly seasonal net sales and profitability pattern weighted toward the second half of the year.

Based on first quarter 2021 results, advance wholesale orders for the Spring 2021 season and plans for growth in our global DTC businesses as we anniversary prior year temporary store closures, we believe mid to high-20 percent first half year-over-year net sales growth is achievable (prior high-teens percent to low-20 percent). In second quarter 2021, year-over-year net sales growth by channel will be impacted by the anniversary of prior year temporary brick & mortar store closures as well as elevated DTC e-commerce net sales penetration levels as demand shifted online when consumers were unable shop in store.

Please note the second quarter is typically our lowest volume sales quarter and small changes in the timing of product shipments and expenses can have a material impact on reported results. Historically, second quarter profitability has been challenging given our fixed cost structure, resulting in the Company reporting a second quarter earnings loss in most years.

Conference Call

The Company will hold its first quarter 2021 conference call at 5:00 p.m. ET today. Dial (877) 407-9205 to participate. The call will also be webcast live on the Investor Relations section of the Company's website at <http://investor.columbia.com>.

Second Quarter 2021 Reporting Date

Columbia Sportswear Company plans to report second quarter 2021 financial results on Monday, August 2, 2021 at approximately 4:00 p.m. ET.

Supplemental Financial Information

Since Columbia Sportswear Company is a global company, the comparability of its operating results reported in United States dollars is affected by foreign currency exchange rate fluctuations because the underlying currencies in which it transacts change in value over time compared to the United States dollar. To supplement financial information reported in accordance with GAAP, the Company discloses constant-currency net sales information, which is a non-GAAP financial measure, to provide a framework to assess how the business performed excluding the effects of changes in the exchange rates used to translate net sales generated in foreign currencies into United States dollars. The Company calculates constant-currency net sales by translating net sales in foreign currencies for the current period into United States dollars at the average exchange rates that were in effect during the comparable period of the prior year. Management believes that this non-GAAP financial measure reflects an additional and useful way of viewing an aspect of our operations that, when viewed in conjunction with our GAAP results, provides a more comprehensive understanding of our business and operations. In particular, investors may find the non-GAAP financial measure useful by reviewing our net sales results without the volatility in foreign currency exchange rates. This non-GAAP financial measure also facilitates management's internal comparisons to our historical net sales results and comparisons to competitors' net sales results.

The non-GAAP financial measures should be viewed in addition to, and not in lieu of or superior to, our financial measures calculated in accordance with GAAP. The Company provides a reconciliation of non-GAAP measures to the most directly comparable financial measure calculated in accordance with GAAP. See the "Reconciliation of GAAP to Non-GAAP Financial Measures" table included herein. The non-GAAP financial measures presented may not be comparable to similarly titled measures reported by other companies.

Forward-Looking Statements

This document contains forward-looking statements within the meaning of the federal securities laws, including statements regarding the Company's expectations, anticipations or beliefs about full year 2021 net sales, gross margin, SG&A expense, demand creation spend, operating income, effective income tax rate, net income, diluted earnings per share, foreign currency translation, inventory, cash flows, and capital expenditures, as well as growth of its global DTC businesses, and first half 2021 net sales growth. Forward-looking statements often use words such as "will," "anticipate," "estimate," "expect," "should," "may" and other words and terms of similar meaning or reference future dates. The Company's expectations, beliefs and projections are expressed in good faith and are believed to have a reasonable basis; however, each forward-looking statement involves a number of risks and uncertainties, including those set forth in this document, those described in the Company's Annual Report on Form 10-K and Quarterly Reports on Form 10-Q under the heading "Risk Factors," and those that have been or may be described in other reports filed by the Company, including reports on Form 8-K. Potential risks and uncertainties include those relating to the impact of the COVID-19 pandemic on our operations, which is highly dependent on numerous factors that we may not be able to predict or control, including: the duration and scope of the COVID-19 pandemic, including any recurrence due to variants; actions that may be taken to contain the pandemic or to treat its impact, including lock-downs and the speed of the vaccination roll-out; economic slowdowns that have and may continue to result from the pandemic; workforce staffing and productivity; our ability to continue operations in affected areas; supply chain and logistics capacity constraints; and

consumer demand and spending patterns, as well as the effects on suppliers, creditors, and wholesale customers, all of which are uncertain. The Company cautions that forward-looking statements are inherently less reliable than historical information. The Company does not undertake any duty to update any of the forward-looking statements after the date of this document to conform them to actual results or to reflect changes in events, circumstances or its expectations. New factors emerge from time to time and it is not possible for the Company to predict or assess the effects of all such factors or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement.

About Columbia Sportswear Company

Columbia Sportswear Company connects active people with their passions through its portfolio of well-known brands, making it a global leader in outdoor, active and everyday lifestyle apparel, footwear, accessories, and equipment products. Founded in 1938 in Portland, Oregon, the Company's brands are sold in approximately 90 countries. (1) Constant-currency net sales information is a non-GAAP financial measure that excludes the effect of changes in foreign currency exchange rates against the United States dollar between comparable reporting periods. The Company calculates constant-currency net sales by translating net sales in foreign currencies for the current period into United States dollars at the average exchange rates that were in effect during the comparable period of the prior year.
