# **Actinium Announces Closing of Public Offering of Common Stock and Warrants to Purchase Common Stock**

*Actinium raised total gross proceeds of \$16.125 million*

NEW YORK, Aug. 02, 2017 (GLOBE NEWSWIRE) -- Actinium Pharmaceuticals, Inc. (NYSE American:ATNM) ("Actinium" or "the Company"), a biopharmaceutical company developing innovative targeted therapies for cancers lacking effective treatment options, announced today the closing of its previously announced underwritten public offering of 21,500,000 shares of its common stock and warrants to purchase an aggregate of 18,275,000 shares of the Company's common stock at an offering price to the public of \$0.75 per share and related warrant. The warrants have an exercise price of \$1.05 per share and have a term of exercise of five years.

Oppenheimer & Co. Inc. acted as sole book-running manager for the offering. Maxim Group LLC and JonesTrading Institutional Services LLC acted as co-managers for the offering.

The gross proceeds to Actinium from this offering were \$16,125,000, before deducting underwriting discounts and commissions and other offering expenses payable by Actinium. The Company intends to use the net proceeds from the offering to fund clinical development of lomab-B, Actimab-A, Actimab-M, its alpha particle technology platform, and for general corporate purposes.

The offering is being conducted pursuant to a shelf registration statement that was previously filed with, and declared effective by the U.S. Securities and Exchange Commission ("SEC"). A prospectus supplement and accompanying base prospectus relating to the offering has been filed with the SEC and is available free of charge on the SEC's website at <http://www.sec.gov>.

This press release shall not constitute an offer to sell or the solicitation of an offer to buy any of the securities described herein, nor shall there be any sale of these securities in any state or jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of such state or jurisdiction. Copies of the final prospectus supplement and accompanying base prospectus relating to the offering may be obtained from Oppenheimer & Co. Inc., Attention: Syndicate Prospectus Department, 85 Broad Street, 26<sup>th</sup> Floor, New York, New York 10004, by telephone at 212-667-8563, or by e-mail at [EquityProspectus@opco.com](mailto:EquityProspectus@opco.com).

**About Actinium Pharmaceuticals, Inc.**

Actinium Pharmaceuticals, Inc. is a biopharmaceutical company developing innovative targeted therapies for patients with cancers lacking effective treatment options. Actinium's proprietary platform utilizes monoclonal antibodies to deliver radioisotopes directly to cells of interest in order to kill those cells safely and effectively. The Company's lead product candidate lomab-B is designed to be used, upon approval, in preparing patients for a hematopoietic stem cell transplant, commonly referred to as bone marrow transplant. A bone marrow transplant is often the only potential cure for patients with blood-borne cancers but the current standard preparation for a transplant requires chemotherapy and/or total body irradiation that result in significant toxicities. Actinium believes lomab-B will enable a faster and less toxic preparation of patients seeking a bone marrow transplant, leading to increased transplant success and survival rates. The Company is currently conducting a single pivotal 150-patient, multicenter Phase 3 clinical study of lomab-B in patients with relapsed or refractory acute myeloid leukemia (AML) age 55 and older. The Company's second product candidate, Actimab-A, is currently in a multicenter open-label, 53-patient Phase 2 trial for patients newly diagnosed with AML age 60 and over. Actimab-A is being developed to induce remissions in elderly patients with AML who lack effective treatment options and often cannot tolerate the toxicities of standard frontline therapies. Actinium is also utilizing its alpha-particle immunotherapy (APIT) technology platform to generate new drug candidates based on antibodies linked to the element Actinium-225 that are directed at various cancers that are blood-borne or form solid tumors. Actinium Pharmaceuticals is based in New York, NY.
