NetSol Technologies Reports Fiscal 2014 First Quarter Results

– Company Adding up to 150 Employees to Support Growth Strategy, Global Launch of NFS Ascent and Backlog–

– Conference Call Scheduled Today at 11 a.m. ET (8 a.m. PT)–

CALABASAS, Calif., Nov. 8, 2013 (GLOBE NEWSWIRE) -- NetSol Technologies, Inc. (Nasdaq:NTWK), a worldwide provider of global IT and enterprise application solutions, today reported financial results for its fiscal 2014 first quarter ended September 30, 2013.

Fiscal 2014 First Quarter Financial Results

Total first quarter revenue amounted to \$9.1 million, compared with \$11.1 million in the same period last fiscal year, reflecting lower license revenue attributable to timing on the closing of certain new business transactions, as well as the company's transition to its next-generation financing and leasing solution, NFS Ascent™.

License revenue for the fiscal 2014 first quarter was \$2.3 million, versus \$3.2 million in the same period last year. Maintenance revenue for the fiscal 2014 first quarter increased to \$2.4 million from \$2.0 million last fiscal year, reflecting the completion of NFS™ implementations. Services revenue decreased to \$4.4 million from \$5.8 million for the first quarter of fiscal 2013, reflecting fewer license sales in the quarter.

"Results this quarter reflected a slowing of license sales for the first-generation of NFS, as new clients embrace our new, next-generation NFS Ascent platform. In the enterprise software segment, companies typically experience a phase of contraction in the sales of prior products, while next-generation platforms start to gain traction," said Najeeb Ghauri, CEO. "We are excited to have officially introduced our next-generation solution, NFS Ascent, which we believe will be a game-changer for NetSol, and is the result of more than four years of development. NFS Ascent represents the most advanced solution available in the marketplace, allowing us to leapfrog the competition. Early response from customers has been outstanding, and we are very confident in our market opportunity moving forward, with discussions well underway with potential new global customers, including in North America and Europe.

"Our current sales backlog includes a significant amount of services revenue based upon the first-generation platform. Accordingly, to protect our clients' investments, NetSol will continue to service and support our first-generation NFS solution for many years to come. We expect

that licensee revenue for the first-generation NFS platform to continue to contract over the next two quarters, offset as adoption of NFS Ascent increases, reaching an inflection point in the second half of the current fiscal year," added Ghauri.

Total operating expenses for the fiscal 2014 first quarter amounted to \$4.9 million, versus \$3.8 million in the fiscal 2013 first quarter, reflecting the ramp-up of sales and marketing activities. Operating expenses for the preceding fourth quarter of fiscal 2013 were \$4.7 million.

Operating loss for the first quarter of fiscal 2014 was \$1.5 million, compared with operating income of \$1.5 million last year.

Net loss was \$1.1 million for the fiscal first quarter, equal to \$0.12 per share, compared with net income of \$929,000, or \$0.12 per diluted share, in the comparable period of the prior fiscal year. This includes a deduction of net income by \$634,000 for non-controlling interest, compared with \$332,000 in the comparative period. Weighted average number of diluted shares outstanding for the period was 9.0 million shares.

At September 30, 2013, cash and cash equivalents amounted to \$6.8 million, reflecting NetSol's investment in additional infrastructure to support its expansion strategy.

"The quarter's financial results are not indicative of the underlying strength of our company or the reputation we have earned with prestigious global companies," Ghauri said. "The large number of staff we are adding across the globe demonstrates our confidence in where we believe the business is headed and our opportunity with NFS Ascent. NetSol is well capitalized, with great people and world-class customers as we embark on this milestone transition," he added.

2014 First Quarter Highlights:

- Received new orders for NetSol Financial Suite (NFS) solution from two new customers, representing more than \$4 million in combined license, maintenance and service billings, which included an agreement with a major China-based auto manufacturer;
- Signed 40 more LeasePak seats to a North America-based customer;
- Added five new customers for Vrooz's Purchase Manager module; released a new supplier purchase order pickup module with Vrooz Purchase Manager; and, introduced a new Vrooz Buy Route functionality in beta to a global customer;
- Commenced a LeaseSoft upgrade and portal project for a leading North American and UK leasing company specializing in broker-introduced entrepreneurial finance; began LeaseSoft implementation for a leading non-bank lender in Ireland; and completed delivery of a Web services-based branch integration project for one the UK's leading sub-prime lenders;
- Developed a business process outsource service to address the broker market for NetSol Technologies Europe and its jointly-owned subsidiary, Virtual Lease Services. In collaboration with funders, the service will form part of the funding approval sanction;
- Signed three new agreements in Saudi Arabia through Atheeb NetSol, its joint venture company, in the areas of network security, ISO/standard implementation of cyber security and consulting for a local group of hospitals, governmental security department and construction group.

Basic EBITDA	<u><u>\$ 0.05</u></u>	<u><u>\$ 0.33</u></u>
Diluted EBITDA	<u><u>\$ 0.05</u></u>	<u><u>\$ 0.33</u></u>

Although the net EBITDA income is a non-GAAP measure of performance, we are providing it because we believe it to be an important supplemental measure of our performance that is commonly used by securities analysts, investors, and other interested parties in the evaluation of companies in our industry. It should not be considered as an alternative to net income, operating income or any other financial measures calculated and presented, nor as an alternative to cash flow from operating activities as a measure of our liquidity. It may not be indicative of the Company's historical operating results nor is it intended to be predictive of potential future results.
