Pershing Resources is a development stage precious metals producer, focused on projects located in North America. The Company is based in Reno, Nevada and, owns a development facility near Kingman, Arizona.

Our strategy is built on three basic components; the acquisition of U.S. domestic properties near mines with historical precious metals production, the development of high tonnage projects on commercially viable grades of precious metals with proximity to historical occurrences and, the application of leading edge technologies to develop efficient and environmentally favorable extraction and recovery processes. This three-tier strategy supports our short and long-term goals of positive cash flow, profitability and growing shareholder value through expansion. The Company's current assets are comprised of three properties with projects currently in development. The largest being [the Marco Project](#) located near Lovelock, Nevada was acquired in 2004.
