## 3DIcon to Present Paper at SPIE's Security & Defence 2010 International Symposium

TULSA, Okla., Aug. 6, 2010 (GLOBE NEWSWIRE) -- 3DIcon Corporation (OTCBB:TDCP), a developer of volumetric, three-dimension projection and display technologies, today announced that it will present a paper entitled "A Technique for Flicker Reduction in a Volumetric Three-dimensional Display with a Static Image Space" to the SPIE Security & Defence 2010 International Symposium to be held in Toulouse, France, September 20-23. The conference is called Europe's largest and most prestigious security and defense event.

"We are honored to be selected to make this presentation," said Martin Keating, 3DIcon's founder and CEO. "It will give us the opportunity to explain and discuss the improvements we have made to our flagship technology, CSpace(R)."

CSpace(R) is designed to provide true, full-color, high-resolution, volumetric 360-degree, three-dimensional images without any viewing aids such as special glasses. It is the first proven technology of its kind that has no mechanical moving parts.

"We continue to make significant progress in our pursuit of potential partners in furtherance of our goal of the commercialization of CSpace in a variety of applications," Keating added. "As we have said before, 3D display systems developed using CSpace will have the potential to enhance significantly such applications as medical imaging, surgical planning, full-body scans, aircraft manufacturing and maintenance, military command and control, baggage and cargo scanning, and entertainment."

### About 3DIcon Corporation

3DIcon Corporation (the "Company") is a developer of groundbreaking 3D projection and display technologies that are designed to produce full color, 360-degree volumetric images, the "Next Step" in 3D display technologies. The Company has completed a working prototype of its flagship technology, [CSpace](#)(R), a breakthrough in 3D imaging. The Company has also launched its first software product, [Pixel Precision](#)(R), which targets the R&D market for developers using Texas Instruments' DLP(R) line of products. SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION ACT OF 1995

With the exception of historical information, the matters discussed in this news release are forward-looking statements that involve a number of risks and uncertainties. The actual

future results of 3DIcon could differ significantly from those statements. Factors that could cause actual results to differ materially include risks and uncertainties such as the inability to finance the company's operations, inability to hire and retain qualified personnel, and changes in the general economic climate. In some cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "expect," "plan," "anticipate," "believe," "estimate," "predict," "potential" or "continue," the negative of such terms, or other comparable terminology. These statements are only predictions. Although we believe that the expectations reflected in the forward-looking statements are reasonable, such statements should not be regarded as a representation by 3DIcon, or any other person, that such forward-looking statements will be achieved. We undertake no duty to update any of the forward-looking statements, whether as a result of new information, future events or otherwise. In light of the foregoing, readers are cautioned not to place undue reliance on such forward-looking statements.
