

# Ondas Networks Receives Canadian Government Authorization for 900 MHz Advanced Train Control System (ATCS) Radios

***Products to be sold and marketed by Siemens under the Airlink brand to both Canadian Freight and Transit Customers***

**WALTHAM, MA / ACCESSWIRE / September 14, 2022** / [Ondas Holdings Inc.](#)

(NASDAQ:ONDS) ("Ondas" or the "Company"), a leading provider of private wireless, drone and automated data solutions through its wholly owned subsidiaries, Ondas Networks Inc. ("Ondas Networks") and American Robotics, Inc. ("American Robotics" or "AR"), announced today that Ondas Networks has received authorization from the Canadian government to sell its 900 MHz Advanced Train Control System platform. The ATCS platform, which had previously been introduced to the U.S. market, is now available for deployment throughout the Canadian rail system. The products will be sold and marketed by Siemens Mobility under their Airlink brand name to both Canadian freight and transit rail customers.

Siemens Mobility has been providing solutions to Canada's transportation industry for more than 40 years and, in 2021, acquired RailTerm, a leading provider of rail services to Canadian rail and transit agencies. The authorization is another major milestone in the broadening adoption of the jointly developed 900 MHz products by Ondas and Siemens to address the communication needs of the North American rail market. Ondas will provide marketing and customer support to Siemens in the Canadian rail market.

## **About Ondas Holdings Inc.**

Ondas Holdings Inc. ("Ondas") is a leading provider of private wireless data and drone solutions through its wholly owned subsidiaries Ondas Networks Inc. ("Ondas Networks") and American Robotics, Inc. ("American Robotics" or "AR"). Ondas Networks is a developer of proprietary, software-based wireless broadband technology for large established and emerging industrial markets. Ondas Networks' standards-based (802.16s), multi-patented, software-defined radio FullMAX platform enables Mission-Critical IoT (MC-IoT) applications by overcoming the bandwidth limitations of today's legacy private licensed wireless networks. Ondas Networks' customer end markets include railroads, utilities, oil and gas, transportation, aviation (including drone operators) and government entities whose demands span a wide range of mission critical applications. American Robotics designs, develops, and markets industrial drone solutions for rugged, real-world environments. AR's Scout System™ is a highly automated, AI-powered drone system capable of continuous, remote operation and is marketed as a "drone-in-a-box" turnkey data solution service under a Robot-as-a-Service (RAAS) business model. The Scout System™ is the first drone system approved by the FAA for automated operation beyond-visual-line-of-sight (BVLOS) without a human operator on-site. Ondas Networks and American Robotics together provide users in rail, agriculture, utilities and critical infrastructure markets with improved connectivity and

data collection capabilities.
