## Management Commentary

"The third quarter was underscored by our continued commitment to profitability, as reflected by the 14% increase in adjusted EBITDA despite modest revenue growth," said Aaron Coleman, CEO of U.S. Auto Parts.

"Similar to last quarter, our lower-margin online marketplace channel has continued to outpace our e-commerce channel. We are addressing this channel dynamic by making the necessary investments to improve our e-commerce product landing pages, product discovery, checkout, mobile conversion and site speed, as well as optimizing the post-purchase consumer experience. As we look ahead to 2018, we will continue to focus on prudent cost management at the operating level, and expect the results of our e-commerce initiatives to further improve conversion, which can enable us to accelerate traffic acquisition going forward."

## Third Quarter 2017 Financial Results

Net sales in the third quarter of 2017 increased to \$73.8 million compared to \$73.5 million in the year-ago quarter. The increase was largely driven by a 41% increase in online marketplace sales to \$26.8 million, partially offset by a 17% decrease in e-commerce sales.

Gross profit in the third quarter of 2017 was \$21.9 million compared to \$22.4 million in the year-ago quarter. As a percentage of net sales, gross profit was 29.6% compared to 30.5%. The anticipated decrease in gross margin was primarily driven by lower-margin channel mix and higher freight costs. The company continues to expect gross margin to range between 29-30% going forward.

Total operating expenses in the third quarter were reduced to \$20.5 million compared to \$21.7 million in the third quarter of last year. As a percentage of net sales, operating expenses decreased 180 basis points to 27.8% compared to 29.6% in the year-ago quarter as a result of lower call center and marketing expenses.

Net income in the third quarter increased to \$0.9 million, or \$0.02 per diluted share, compared to \$0.4 million or \$0.01 per diluted share in the year-ago period.

Adjusted EBITDA in the third quarter of 2017 increased 14% to \$3.6 million compared to \$3.1 million in the year-ago quarter, driven by the aforementioned increase in online marketplace sales and prudent cost management.

At September 30, 2017, cash and cash equivalents totaled \$6.7 million compared to \$2.7 million at December 31, 2016. The company also continued to carry no revolver debt at September 30, 2017.

## Non-GAAP Financial Measures

Regulation G, and other provisions of the Securities Exchange Act of 1934, as amended, define and prescribe the

conditions for use of certain non-GAAP financial information. We provide "Adjusted EBITDA," which is a non-GAAP financial measure. Adjusted EBITDA consists of net income before (a) interest expense, net; (b) income tax provision; (c) depreciation and amortization expense; (d) amortization of intangible assets; and (e) share-based compensation expense.

The Company believes that this non-GAAP financial measure provides important supplemental information to management and investors. This non-GAAP financial measures reflect an additional way of viewing aspects of the Company's operations that, when viewed with the GAAP results and the accompanying reconciliation to corresponding GAAP financial measures, provides a more complete understanding of factors and trends affecting the Company's business and results of operations.

Management uses Adjusted EBITDA as one measure of the Company's operating performance because it assists in comparing the Company's operating performance on a consistent basis by removing the impact of stock compensation expense, as well as items that are not expected to be recurring. Internally, this non-GAAP measure is also used by management for planning purposes, including the preparation of internal budgets; for allocating resources to enhance financial performance; and for evaluating the effectiveness of operational strategies. The Company also believes that analysts and investors use Adjusted EBITDA as a supplemental measure to evaluate the ongoing operations of companies in our industry.

This non-GAAP financial measure is used in addition to and in conjunction with results presented in accordance with GAAP and should not be relied upon to the exclusion of GAAP financial measures. Management strongly encourages investors to review the Company's consolidated financial statements in their entirety and to not rely on any single financial measure. Because non-GAAP financial measures are not standardized, it may not be possible to compare these financial measures with other companies' non-GAAP financial measures having the same or similar names. In addition, the Company expects to continue to incur expenses similar to the non-GAAP adjustments described above, and exclusion of these items from the Company's non-GAAP measures should not be construed as an inference that these costs are unusual, infrequent or non-recurring.
