Airgain Announces Release of ULTRAMAX™ MIMO 9-in-1 Antenna

Antenna is first of its kind to include six dual-band Wi-Fi ports inside a single enclosure

SCOTTSDALE, Ariz.--(BUSINESS WIRE)-- Airgain, Inc. (NASDAQ: AIRG), a leading provider of advanced antenna technologies used to enable high performance wireless networking, announced today the release of its ULTRAMAX MIMO 9-in-1 antenna. This antenna is the first in a series of antennas designed to support state-of-the-art communications technology in fleet routers, including the Cradlepoint IBR1700. The new ULTRAMAX MIMO 9-in-1 antenna will help improve public safety and fleet solutions with enhanced Wi-Fi capability, and is the first of its kind to include 6x6 MIMO Wi-Fi, Dual LTE, and multi-GNSS technology antennas in a single enclosure. This antenna provides the ultimate in Wi-Fi support – with integrated 6x6 Wi-Fi antennas, providing support for full HD streaming video and other high bandwidth applications.

The new ULTRAMAX MIMO 9-in-1 antenna is equipped with 9 ports, supporting tri-band Wi-Fi, LTE/MIMO (including Band 14 for FirstNet™), and GNSS. With a single compact footprint, the antenna promotes ease of installation, avoiding multiple mounting and cable entry points associated with existing solutions. The new antenna includes high rejection GNSS technology with coverage for multiple satellite systems including GPS, GLONASS, Galileo, and BeiDou (BDS) satellite systems.

“Technology advances in routers, including enhanced Wi-Fi and expanded MIMO LTE, require enabling antenna technology to deliver an optimized end user experience,” said Reed Pangborn, Vice President of Channel Sales for North America. “We designed a new antenna to support the fleet management applications required in today’s evolving mobile environment. The ULTRAMAX MIMO 9-in-1 antenna demonstrates our commitment to providing leading antenna solutions for our mobility customers covering a wide range of vehicles, including police, fire, ambulance, and other fleet assets.”

The ULTRAMAX MIMO 9-in-1 antenna is the only single unit antenna that complements Cradlepoint’s IBR1700 and supports all six of its Wi-Fi ports. Airgain will unveil the new antenna at the Cradlepoint Global Partner Summit in Scottsdale, AZ, April 11-12, 2018. The new ULTRAMAX MIMO 9-in-1 antenna will be available to order starting June through our trusted channel partners or call direct at 1-855-AIRGAIN.

About Airgain, Inc.

Airgain (NASDAQ: AIRG) is a leading provider of advanced antenna technologies used to enable high performance wireless networking across a broad range of devices and markets, including connected home, enterprise, automotive, and Internet of Things (IoT). Combining design-led thinking with testing and development, Airgain works in partnership with the entire

ecosystem, including carriers, chipset suppliers, OEMs, and ODMs. Airgain's antennas are deployed in carrier, fleet, enterprise, residential, private, government, and public safety wireless networks and systems, including set-top boxes, access points, routers, modems, gateways, media adapters, portables, digital televisions, sensors, fleet, and asset tracking devices. Airgain is headquartered in San Diego, California, and maintains design and test centers in the U.S., U.K., and China. Forward-Looking Statements

Airgain cautions you that statements in this press release that are not a description of historical facts are forward-looking statements. These statements are based on the company's current beliefs and expectations. These forward-looking statements include statements regarding the ability of Airgain's ULTRAMAX MIMO 9-in-1 antenna to deliver an optimized end user experience, the ability of the ULTRAMAX MIMO 9-in-1 antenna to improve public safety and fleet solutions with enhanced Wi-Fi capability and our ability to provide leading antenna solutions for our mobility customers. The inclusion of forward-looking statements should not be regarded as a representation by Airgain that any of our plans will be achieved. Actual results may differ from those set forth in this press release due to the risk and uncertainties inherent in our business, including, without limitation: the market for our antenna products is developing and may not develop as we expect; risks associated with the performance of Airgain's embedded antenna technology; and other risks described in our prior press releases and in our filings with the Securities and Exchange Commission (SEC), including under the heading "Risk Factors" in our Annual Report on Form 10-K and any subsequent filings with the SEC. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof, and we undertake no obligation to revise or update this press release to reflect events or circumstances after the date hereof. All forward-looking statements are qualified in their entirety by this cautionary statement, which is made under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.
