BlackSky Newest Gen-3 Delivers First Very High-Resolution Imagery at Warfighting Speed, 12 Hours Following Launch

Recently collected Gen-3 unit two images have demonstrated the timely operational value of space-based dynamic monitoring in support of strategic and tactical defense and intelligence missions

HERNDON, Va.--(BUSINESS WIRE)-- BlackSky Technology Inc. (NYSE: [BKSJ](#)) has delivered the first very high-resolution images from the company's second [Gen-3](#) satellite just 12 hours following its successful launch last Monday.

This press release features multimedia. View the full release here: <https://www.businesswire.com/news/home/20250610529246/en/>

An early morning Gen-3, unit two, very high-resolution image captured over Golmud Air Base, Qinghai Province, China demonstrates the timely operational value of high-cadence, space-based dynamic monitoring capabilities in support of strategic and tactical defense and intelligence missions. The image is centered on a large military vehicle depot and various athletic facilities set among administrative buildings. Toward the north the image indicates active facility construction and on the main runway apron to the south are parked 13 Y-9 transport and KJ-500 airborne early warning and control aircraft. The BlackSky image was collected at 7:45 a.m. China Standard Time on June 9, 2025.

“In today’s national security environment, BlackSky’s customers require space-based intelligence that moves at warfighter speed,” said Brian O’Toole, BlackSky CEO. “BlackSky’s newest Gen-3 satellite has delivered low-latency, very high-resolution imagery on its first day in orbit demonstrating the maturity of our AI-enabled architecture and demonstrates the agile, mission-ready resilience of our commercial capabilities today.”

Early morning Gen-3, unit two, imagery collected yesterday at 7:45 a.m. China Standard Time over Golmud Air Base, Qinghai Province, China has demonstrated the timely operational value of high-cadence, space-based dynamic monitoring capabilities in support of strategic and tactical

surveillance, reconnaissance and tracking defense and intelligence missions. Gen-3 gives decision makers the ability to discern vital aircraft movements, ground vehicle positioning and critical facility operations that can provide valuable real-time context to multisource intelligence efforts.

“BlackSky is committed to giving customers an unparalleled operational advantage at disruptive speed, scale and economics. Our real-time dynamic monitoring capabilities offer a strong complement to national space assets, especially in support of time-dominant strategic and tactical operations,” said O’Toole.

As part of BlackSky’s high-cadence, time-diverse constellation, each new Gen-3 satellite is expected to accelerate the development of new customer applications in automated real-time and predictive battlefield monitoring.

Gen-3 customers have subscription-based access to high-cadence, time diverse 35-centimeter very high-resolution imagery with AI-enabled automated detection analytics that identify and classify a wide library of vehicles, aircraft, vessels and other objects of military interest. As BlackSky’s constellation evolves with the regular addition of Gen-3 satellites, BlackSky will continue to optimize for increased constellation capacity and flexibility giving customers confidence in reliable access to services.

About BlackSky

BlackSky is a real-time, space-based intelligence company that delivers on-demand, high frequency imagery, analytics, and high-frequency monitoring of the most critical and strategic locations, economic assets, and events in the world. BlackSky owns and operates one of the industry’s most advanced, purpose-built commercial, real-time intelligence systems that combines the power of the BlackSky Spectra® tasking and analytics software platform and our proprietary low earth orbit satellite constellation.

With BlackSky, customers can see, understand and anticipate changes for a decisive strategic advantage at the tactical edge, and act not just fast, but first. BlackSky is trusted by some of the most demanding U.S. and international government agencies, commercial businesses, and organizations around the world. BlackSky is headquartered in Herndon, VA, and is publicly traded on the New York Stock Exchange as BKSJ. To learn more, visit www.blacksky.com and follow us on [X](#).

Forward-Looking Statements

Certain statements in this press release may contain forward-looking statements within the meaning of the federal securities laws with respect to BlackSky. These forward-looking statements generally are identified by the words “believe,” “project,” “expect,” “anticipate,” “estimate,” “intend,” “strategy,” “future,” “opportunity,” “plan,” “may,” “should,” “will,” “would,” “will be,” “will continue,” “will likely result,” and similar expressions. Forward-looking statements are predictions, projections, and other statements about future events that are based on current expectations and assumptions and, as a result, are subject to risks and uncertainties. Many factors could cause actual future events to differ materially from the forward-looking statements in this document. If any of these risks materialize or underlying assumptions prove incorrect, actual results could differ materially from the results implied by these forward-looking statements. In addition, forward-looking statements reflect our

expectations, plans, or forecasts of future events and views as of the date of this communication. We anticipate that subsequent events and developments will cause their assessments to change. Accordingly, forward-looking statements should not be relied upon as representing our views as of any subsequent date, and we do not undertake any obligation to update forward-looking statements to reflect events or circumstances after the date they were made, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws. Additional risks and uncertainties are identified and discussed in BlackSky's disclosure materials filed from time to time with the SEC which are available at the SEC's website at <http://www.sec.gov> or on BlackSky's Investor Relations website at <https://ir.blacksky.com>.
