- **Net Investment Income:** Increased 21.2% over last quarter to \$11.7 million, or \$0.31 per share, driven primarily by higher interest income.

- **Equity Issuance:** Issued 1,415,117 shares of common stock through our at-the-market program at a weighted-average price of \$9.59 per share, or 103% of net asset

value, generating net proceeds of \$13.3 million.

- **Credit Facility:** Extended the revolving period end date to October 2025 and extended the final maturity date to October 2027.

Third Fiscal Quarter 2023 Results:

Total investment income increased by \$2.3 million, or 11.0%, for the quarter ended June 30, 2023, compared to the prior quarter ended March 31, 2023, primarily due to a \$2.2 million increase in interest income. The increase in interest income was driven by increases in both the weighted average yield and weighted average principal balance of our interest-bearing investments.

Total expenses increased by \$0.2 million, quarter over quarter, primarily due to a \$0.6 million increase in interest expense quarter over quarter, driven mainly by an increase in the weighted average interest rate on our credit facility, and a \$0.5 million increase in incentive fees, driven mainly by an increase in the average portfolio yields. These increases were partially offset by a \$1.0 million decrease in the net base management fee, driven mainly by an increase in portfolio company fee credits from new deal originations and advisory fees.

Net investment income for the quarter ended June 30, 2023 was \$11.7 million, an increase of 21.2%, as compared to the prior quarter, or \$0.31 per share, and covered distributions paid of \$0.24 by 129%.

The net increase in net assets resulting from operations was \$11.9 million, or \$0.32 per share, for the quarter ended June 30, 2023, compared to \$12.0 million, or \$0.33 per share, for the quarter ended March 31, 2023. The current quarter increase was primarily driven by the increase in net investment income and \$3.0 million of net realized gain recognized during the quarter, partially offset by \$2.7 million of net unrealized depreciation recognized during the quarter.
