CytoDyn Closes \$17.5 Million Financing to Fund Continued Development of Leronlimab

VANCOUVER, Washington, March 05, 2026 (GLOBE NEWSWIRE) -- **CytoDyn Inc. (OTCQB: CYDY)** ("CytoDyn" or the "Company"), a clinical-stage oncology company advancing leronlimab, a first-in-class humanized monoclonal antibody targeting the CCR5 receptor with therapeutic potential across multiple indications, including triple-negative breast cancer (TNBC) and metastatic colorectal cancer (mCRC), today announced that it has closed on a financing of \$17.5 million in gross proceeds, with Paulson Investment Company acting as placement agent.

The demand from both new and current investors highlights confidence in CytoDyn's clinical progress and its versatile development strategy in immuno-oncology, exploring a number of potential roles for leronlimab – the Company's first-in-class humanized monoclonal antibody that targets the CCR5 receptor.

"The successful completion of this financing in a challenging capital markets environment reflects meaningful investor support for our clinical strategy," said Robert E. Hoffman, CFO of CytoDyn. "The financing strengthens our balance sheet and is expected to fund current operations into 2027, supporting continued advancement of our clinical programs and strategic priorities. We appreciate the support of both new and existing investors, which underscores confidence in the continued development of leronlimab and its potential role in oncology, as we remain focused on disciplined execution and long-term value creation."

Net proceeds from the financing will primarily support the advancement of CytoDyn's clinical development programs, including ongoing and planned trials, regulatory engagement, and data analysis. Additional funds may be allocated toward manufacturing readiness, regulatory and compliance infrastructure, and general working capital.

For more information on the Company's recent fundraising activities, including key terms and conditions of some of the agreements, please see CytoDyn's filings with the Securities and Exchange Commission, including its Current Report on Form 8-K filed on March 5, 2026.

About CytoDyn

CytoDyn is a clinical-stage oncology company dedicated to advancing leronlimab, a first-in-class humanized monoclonal antibody that targets the CCR5 receptor, a key regulator of immune function implicated in cancer, infectious diseases, and autoimmune disorders. Guided by a mission to improve patients' quality of life through therapeutic innovation, CytoDyn is committed to integrity, responsibility, and service as it works to bring transformative treatments to patients worldwide.
