Oil & Gas Industry 101

In the oil and gas industry, companies are typically measured by their reserves. Reserves are the primary assets on oil and gas companies' balance sheet. Oil reserves are primarily a measure of geological risk, defined by the probability of oil existing and being producible under current economic conditions using current technology. The three categories of reserves generally used are proven, probable, and possible reserves¹.

- Proven reserves are defined as "reasonably certain" to be producible using current technology at current prices, with current commercial terms and government consent. Some industry specialists refer to this as P90, or having a 90% certainty of being produced.
- Probable reserves are defined as oil and gas "reasonably probable" of being produced using current or likely technology at current prices, with current commercial terms and government consent. Some industry specialists refer to this as P50, or having a 50% certainty of being produced.
- Possible reserves are defined as "having a chance of being developed under favorable circumstances". Some industry specialists refer to this as P10, or having a 10% certainty of being produced.

Despite these industry guidelines, there are still many thorny issues with respect to how reserves are calculated and booked on the balance sheet. Much of the complexity involved in calculating and disclosing proved reserves results from the overlap between engineering, legal, and accounting considerations. In general, companies may include as proven reserves only those estimated quantities of hydrocarbons that they have demonstrated by actual production or conclusive formation tests to be economically and legally producible under existing economic and operating conditions. Therefore, the amount of reserves a

company can report as "proved" depends in large part on economic producibility of the hydrocarbons, which in turn is influenced by technology and the price of oil and gas. If these criteria cannot be met to the SEC's satisfaction, reserves are not deemed to be "proved" and cannot be included in the SEC filings, which could have a huge impact on a company's balance sheet and create a significant disparity between a company's publicly reported reserves and internal estimates.

According to industry experts¹, SEC reserves are based on a set of U.S. focused definitions made from 1978 to 1982. They rely on deterministic methods to assess "proven reserves" recoverable "with reasonable certainty," but the SEC refuses to specify at what confidence level. Further, the SEC definitions do not reflect what modern imaging technology and subsurface modeling can now show. As a result, the gap between the SEC's concept of proved reserves, and what in practice, may be economically recoverable, is enlarged by new technologies.

The SEC's exclusive focus on a single deterministic "proven" reserves estimate ignores the real range of underlying resource potential and promotes incomplete consideration of the geological, engineering, commercial and price risks. These risks have a major impact on possible outcomes of reserves, production, capital and operating costs, project feasibility, timing, margins and value for oil and gas projects. Additionally, different rules exist in the United States, the United Kingdom, Norway, Australia, Canada, China and Russia, some with very different philosophies, sets of definitions and reserve-reporting requirements.

Another problem is that reserves are not necessarily the best measure of the financial strength of an oil and gas company, for a variety of reasons. Not all barrels are equal; different areas and resources, from sweet light to tar sands and coal-bed methane (CBM), have very

Oil & Gas Industry 101 - Continued

different costs and timing to market. In many fields, the reported or “booked” proven figure is well below (and not necessarily a good guide to) the internally expected ultimately recoverable reserves in the early stages of development and even production, and the major economic decision to develop the field is not based on the booked figure. Economic decisions are driven by internal best estimates – usually probabilistic ranges, with stage gates of further investment in seismic and drilling to reduce the uncertainty in the range.

What is more important to management and investors is the outlook for the future. For example, management should provide better breakdowns of not just booked reserves, but also the expected recoverable resources, expected production profiles and costs, risks, net cash-flow margins and the value created for the investment made. Oil and gas companies should disclose the number of prospects they plan to drill in high profile basins or perhaps some gross estimates of the undrilled potential available in these areas. Clearly, proved reserves alone are a poor indicator of company or shareholder value.

Progress to date has been slow. Consistent definitions have been developed over the last several years, and there is clearly a move toward a global standard in reserve estimates as in many other global activities and technical disciplines. If a strong, workable, global standard were applied by most key resource holders and regulators, access to better information and more energy resource transparency would be available for all concerned.

Here are a few of the companies in our oil and oil services universe:

ESPH

Ecosphere Technologies, Inc. (OTCBB:ESPH.OB) is a diversified clean technology and services company currently focused on treating “produced water” which is a \$40 billion problem for the oil and gas industry. Ecosphere's mission is to identify, create and produce clean technologies that solve a significant industry challenge, improve the quality of life and the environment, and are economically viable. Ecosphere has an extensive portfolio of patented clean technologies that can be purchased and licensed for use in large-scale and sustainable applications across industries, nations and ecosystems.

KNEC

Knight Energy Corp. (OTCBB:KNEC.OB) was formed in March 2006 for the purpose of operating and developing energy related businesses and assets. Shortly thereafter, Knight acquired an independent oil and gas services company, Charles Hill Drilling, Inc., which owned a 100% working interest in a 160-acre oil and gas lease in Stephens County, Texas, a drilling rig and other oil and gas equipment. The Company has leased an additional 400 acres that run contiguous to its 160-acre lease, and it has the right of first refusal on approximately 3,100 more acres in the same area.

LUCE

Lucas Energy, Inc. (OTCBB:LUCE.OB) is an independent crude oil and gas company building a diversified portfolio of valuable oil and gas assets in the United States. The company is focused on identifying underperforming oil and gas assets, which are revitalized through a meticulous process of evaluation, application of modern well technology, and stringent management controls.

NOGS

Northern Oil and Gas, Inc. (OTCBB:NOGS.OB) is an exploration and production company focused on drilling exploratory and developmental wells in the Rocky Mountain regions of the United States. The Company's primary target is the Middle Bakken formation in the Williston Basin. Northern Oil's secondary target is conventional, 3-D driven, oil and gas exploration and development throughout the Rocky Mountain Region. The Company currently controls approximately 45,000 net mineral acres in the Williston Basin and 10,000 net mineral acres in the Appalachia Basin.

Paul Silver

Director of Research, WSR

Micro-cap Portfolio

The micro-capital portfolio is a collection of WSR's best ideas and is intended to help speculative investors increase their investment performance. Positions in the portfolio include early stage companies and other micro-capital companies that appear to be significantly under-valued or technically attractive. Early stage companies are typically WSR clients and (in our opinion) have the potential for a three hundred percent return over the next three to five years. Other companies included in the portfolio are generally trading at a significant discount to their peers, breaking out of long-term bases, are turn-around plays, or have recently announced a significant event. Changes to the portfolio are emailed to WSR's subscribers via its *Daily Notes* publication and are updated each month in *The Emerging Growth News*.

Note: Past performance does not guarantee future success, and an investment in the model theoretical portfolio might lose money. Dividends and commissions are not included in performance calculations. The model theoretical performance noted above includes performance history of the model micro-capital portfolio. The theoretical performance contains many high-risk speculative stocks, which tend to be more volatile and more illiquid than larger more established companies. The theoretical performance of the model does not represent actual trading and does not reflect material economic, psychological and market factors that might have impacted the results if actual money had been invested. While no companies pay a fee to be included in our micro-capital portfolio, certain companies, which are published as featured companies on our website, pay a due diligence fee for participation in the Wall Street Resources' financial publication and distribution program. In compliance with rule 17b of the Securities and Exchange Commission, detailed information regarding compensation from such companies is included on the last page of such reports, is explained in the disclaimer located at <http://wallstreetresources.net/disclaimer.html>, and is located on the last page of this newsletter. Tax consequences must be carefully considered. We, our affiliates, and any officer, director or stockholder or any member of their families may have a position in and may from time to time purchase or sell any securities included in our micro-capital portfolio. Wall Street Resources, Inc. is a financial publisher and not a broker/dealer or registered investment advisor, and thus all trades and actual trading, decisions are made solely by the individual investor, not by Wall Street Resources, Inc. Wall Street Resources, Inc. and/or the employees of Wall Street Resources, Inc. will not be held responsible for any losses that might occur from the use of the information provided in our model portfolio that might be acted upon by an investor. Changes in our theoretical portfolio and current quote prices are made as of the last trading day of each month and based upon the closed price.

OCTOBER'S COMPANIES OF INTEREST:

Wall Street Resources' "Companies of Interest" section of its *Daily Notes* publication provides emerging growth company investors with fresh ideas. While we have only briefly reviewed these companies, something caught our attention and in our opinion the company warrants further inspection. View our 2006 "Companies of Interest" Track Record at http://wallstreetresources.net/pdf/p/2006_Companies_of_Interest.pdf

Peerless Systems Corporation (PRLS:NASDAQ) 10/11/07 \$2.24

The company engages in the licensing, development, and sale of imaging and networking technologies and components to the digital document markets primarily in the United States and Japan. It is trading at 20.93 times trailing earnings, 10.67 times forward earnings, 1.36 times sales, 2.25 times book, 4.25 current ratio, \$0.91 per share in cash, \$38.73 million market cap., \$22.91 million enterprise value.

Phazar Corporation (ANTP:NASDAQ) 10/12/07 \$7.57

The company engages in the design, manufacture, and marketing of antenna systems, wireless mesh network solutions, towers, support structures, masts, and communication accessories worldwide. Sales were up 69% and the company posted a profit versus a loss over the same period last year (as reported in the most recent quarter), trading at 3.34 times sales, 2.43 times book, 14.99 current ratio, \$1.78 per share in cash, earned \$0.08 per share in last quarter, \$17.55 million market cap., \$13.43 million enterprise value.

Edac Technologies Corp. (EDAC:NASDAQ) 10/22/07 \$7.90

The company provides design and manufacturing services for tooling, fixtures, molds, jet engine components, and machine spindles, sales were up 53% and earnings were up 325% over the same period last year (as reported in the most recent quarter), trading at 15.61 times trailing earnings, .83 times sales, 2.93 times book, 1.9 current ratio, \$36.44 million market cap., \$44.94 million enterprise value.

Commerce Energy Corp. (EGR:AMEX) 10/25/07 \$2.22

The company provides retail electricity and natural gas in the United States. It also provides consulting, technology, and transaction data management services to utilities, electricity generators, natural gas pipelines, wholesale energy merchants, energy technology providers, and financial institutions. Sales were up 106% and earnings were up 50% over the same period last year (as reported in the most recent quarter), trading at 12.98 times trailing earnings, .22 times sales, .96 times book, 2.01 current ratio, \$.70 per share in cash, \$67.45 million market cap., \$46.32 million enterprise value.

ZOOM Technologies, Inc. (ZOOM:NASDAQ) 10/30/07 \$.79

The company engages in the design, production, and sale of broadband and dial-up modems, as well as other communication-related products worldwide. It is trading at .42 times sales, .71 times book, 5.28 current ratio, \$0.62 per share in cash, \$7.38 million market cap., \$1.58 million enterprise value.

WSR CORPORATE SPONSORS:

Wall Street Resources is a professional research and consulting firm connecting under-followed emerging growth companies with sophisticated investors looking for emerging growth company investment ideas. Leveraging over a decade of experience analyzing micro-to-small capital companies, the principals of WSR are dedicated to providing aggressive investors with unique opportunities, while helping emerging growth companies communicate with the investment community. The following companies are WSR's current clients which support its financial publications:

Featured Companies:**Advanced Growing Systems, Inc.****OTC:AGWS**

Advanced Growing Systems, Inc., founded in 2006, is the parent company of Organic Growing Systems, Inc. (a scientifically advanced Organic fertilizer manufacturer) and Advanced Nurseries, Inc. (a wholesale group of Commercial Nurseries located in the Southeastern US). AGWS is dedicated to providing its shareholders significant value and is directly involved in the \$48 Billion fertilizer market and the \$66 Billion Green Industry. AGSI was founded by a skilled group of industry professionals each with over 20 years of direct experience in the "Green" industry.

[Click here to obtain additional information...](#)

Axium Technologies, Inc.**OTC:AXGI**

Axium Technologies, Inc. ("AXGI" or the "Company"), a leading provider of surveillance security systems software and hardware, recently announced the completion of a licensing agreement with Nadatel Co., Ltd. for its Maximum Software and the software-based Network Video Recorder products. Nadatel Co., Ltd. is one of the leading manufacturers of Digital Video Recorder and IP addressable cameras/servers in South Korea. Nadatel has been supplying its products to some of the largest electronic retailers in the world under OEM agreements.

The agreement calls for Axium to create versions of its Maximum Software and Network Video products that specifically operate with Nadatel's Digital Video Recorders and IP addressable servers/cameras. The agreement runs for two years with terms included for automatic renewal. The initial delivery of products is scheduled for the fourth quarter of 2007. When the integration work is completed, Axium will retain the industrial and intellectual property rights for the products. Under full production, this agreement is expected to deliver a minimum of \$750,000 in annual revenue, while achieving gross margins in excess of 90%.

Axium's primary products include MAXIMUM Surveillance Software, which is the key solution providing interoperability for numerous digitalized security and surveillance products from diverse manufacturers. The Company's Digital Video Recorders (DVRs) and Network Video Products (NVPs) are targeted at the Security and Surveillance segment of the gaming industry. The Company's newest product "Tagger Trap" is a state of the art graffiti detection product, which detects and alarms local police of graffiti activity. The estimated cost of graffiti clean up in North America is projected at \$1.0 billion annually. Millions of dollars have been budgeted in the past year by large metro police departments to detect and apprehend graffiti taggers. [Click here to obtain additional information...](#)

BlueFire Ethanol, Inc.**OTCBB:BFRE**

BlueFire Ethanol, Inc. announced that The U.S. Department of Energy has invited it to participate in its loan guarantee program, which will provide federal loan guarantees for clean energy projects and is expected to spur further investment in these advanced energy technologies. As one of 143 project applicants who previously submitted pre-applications to the loan guarantee program, BlueFire Ethanol, along with 15 others, was recognized for its proposed third California-based project to build a commercial-scale cellulosic ethanol plant using an array of low-cost feedstocks including landfill waste.

BlueFire intends to build a multinational company that leads the world in producing biobased transportation fuels. Its business will encompass development activities leading to the construction and long-term operation of production facilities while maintaining technological advantage and ownership of the process technology and all its improvements. Ethanol will be produced from biorefinery facilities opportunistically constructed on or near landfills, waste collection and waste separation sites. Each facility will deploy the proprietary technology, which uses all cellulosic waste materials traditionally disposed of in landfills as feedstock. [Click here to obtain additional information...](#)

Ecosphere Technologies, Inc.

OTCBB:ESPH

Ecosphere Technologies, a diversified clean technology and services company, recently announced that it closed the previously announced sale of its patented robotic coating removal process for the marine industry to a private equity firm for \$8 million. The private equity firm formed a new company to market the patented clean technology for the marine industry.

This sale is further validation of the Company's business model and mission to identify and create clean technologies that solve a significant industry challenge, improve the quality of the environment, and are economically viable. Ecosphere incubates clean technologies, from filing patents and manufacturing prototypes to full commercialization. Once a technology is proven, Ecosphere aggressively pursues an industry-leading strategic partner to drive the technology into the cleantech marketplace.

Ecosphere Technologies, Inc., through its subsidiaries, develops and commercializes water and renewable energy technologies in the United States. It produces mobile filtration systems that are affixed to shipping containers or integrated into rugged off road vehicles to respond to natural or manmade disasters, as well as for industrial and military applications. The company also offers a line of patented robotic vehicles that remove paint and other coatings from ships using ultra high pressure water, reducing the discharge of contaminated residue or grit into the air and ocean.

In addition, Ecosphere Technologies develops Ecos Lifelink, a micro utility that provides clean water, power, Internet, and telecommunication services to remote areas using solar and wind energy. Further, it is developing Ecos Com Cube, which provides cellular telephone, VOIP, and Internet connection services to residents of remote and off-grid areas of developing countries using renewable energy generated by the solar panels and wind turbines. The company was founded in 1998. It was formerly known as UltraStrip Systems, Inc. and changed its name to Ecosphere Technologies, Inc. in 2006. Ecosphere Technologies is based in Stuart, Florida. Edentify, Inc.

OTCBB:EDFY

Edentify Inc. recently announced that it has partnered with Total Payroll Management (TPM), an employee leasing firm that provides payroll services. The agreement marks Edentify's second human resources agreement in three months.

As part of the agreement, TPM will incorporate Edentify's IDAlert™ identity fraud monitoring software into TPM's clients' employee benefit packages, thereby granting hundreds of companies nationwide an opportunity to offer Edentify's product to their employees. Edentify's partner, National ID Recovery (NIDR) will also add its Kaizen ID recovery remediation service to TPM's clients' employee benefit packages. IDAlert will continuously monitor client employees' identities for manipulation and theft. The technology immediately notifies TPM's clients when identities are compromised, helping clients mitigate damage. NIDR then helps victims easily restore their identity and lost finances with its Kaizen ID recovery kit.

Edentify, Inc. was formed in August 2004 with the objective of becoming the leading organization in the field of developing and deploying data analysis technology solutions for preventing identity theft and fraud. It is currently a later development-stage company and expects shortly to begin a period of growth. Edentify will seek to fulfill its goals by analyzing the means by which identity crimes are perpetrated and through the development of new technologies and procedures to assist corporations, the government, and consumers in the fight against identity fraud and related crime.

Edentify owns the intellectual property rights to two strategic approaches towards the detection and prevention of

identity fraud. One is a patented information-based approach that analyzes identity data information for individuals in large databases, and is capable of detecting and scoring incidences of identity manipulation and potential theft (Identity Quotient Index(TM)). Edentify will continue to market this technology to the financial services industry, as well as to large healthcare organizations and local, state, and federal government agencies.

eFoodSafety.com, Inc.

OTCBB:EFSF

eFoodSafety.com, Inc. recently confirmed that during the initial phase of testing Cinnechol(TM) for the treatment of elevated cholesterol, an expanded study showed a very strong and totally unexpected benefit of reducing blood pressure among study participants showing symptoms of hypertension. Within this group taking Cinnechol(TM), blood pressure levels had dropped to normal levels within a short period of time even though the individuals had not expected or taken any other action to accomplish this goal.

eFoodSafety.com, Inc. is dedicated to improving health conditions around the world through its innovative technologies. The Company's Knock-Out Technologies subsidiary has developed an environmentally safe sporicidal product formulated entirely of food-grade components that eradicates anthrax and a germicidal product, Citroxin that kills six major bacteria: E-coli, Listeria, Pseudomonas, Salmonella, Staphylococcus, and Streptococcus, Avian Influenza, and Black Mold. The sporicidal product has completed its final efficacy laboratory study requisite for EPA registration. The Company's MedElite subsidiary distributes clinically proven products to physicians who then prescribe the products for their patients.

It recently became the owner of the Talsyn(TM)-CI/bid Scar Cream, that has been clinically proven to facilitate and improve the appearance, redness and strength of scars, as well as seven other products in the Talsyn(TM) line. The Company is also owner of Cinnergen(TM), a clinically-studied, non-prescription liquid whole food nutritional supplement that promotes healthy glucose metabolism and Cinnechol(TM), a new multi-faceted nutritional supplement specifically designed to naturally reduce total cholesterol levels without causing any side effects. The Company has entered into a joint venture agreement with CK41 Direct, Inc. to launch the PurEffect(TM) anti-acne skin care system.

GelStat Corporation

OTC:GSAC

GelStat Corporation a consumer healthcare company focused on the development of over-the-counter (OTC) products for treatment of pain and inflammation recently announced that it received a \$200,000 purchase order from Icarus Medical Industries Co. for GelStat Migraine. The purchase order is contingent on approval from the Ministry of Health in Kuwait and is the first three expected orders to roll out the product throughout the Middle East.

GelStat has a suite of effective healthcare products that address many consumer markets. Collectively, GelStat's portfolio of products are in markets that produce over \$10 billion dollars in annual sales. GelStat Migraine is a sublingually (under the tongue) administered OTC medication for acute relief from the pain and associated symptoms of migraine.

GelStat™Arthritis is the second available product and utilizes GelStat's patent pending formulation. It is provided as a daily use, sublingual dissolving tablet. The Company also has developed GelStat Sleep and GelStat Sinus.

HS3 Technologies, Inc.**OTCBB:HSTH**

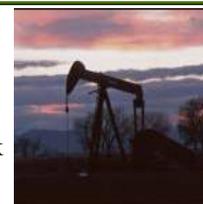

HS3 Technologies, Inc. recently announced that the Company has signed a new contract with a Florida resort hotel. This second contract is for the upgrade and installation of new RFID door locks throughout the hotel. HS3 Technologies anticipates generating up to \$500,000 in hardware related revenue. This new contract is in addition to the most recent security upgrade project of \$600,000 with this customer. These two contracts, in addition to the \$250,000 per year it expects to generate in recurring video monitoring revenue, will represent a multi-million dollar revenue opportunity with its real estate development customer.

HS3 Technologies, Inc. is a national provider of innovative security solutions, headquartered in Denver, Colorado. HS3 provides technologies and services through a national authorized dealer and distribution program. Utilizing independent sales professionals, national distribution and local dealers, HS3 offers custom security solutions for commercial, residential, government and military applications. These state-of-the-art products include digital video recording technology (DVR), biometric access control (door locks), personal biometric identification units, CCTV, video monitoring centers, cellular networks, wireless mesh networks units and wireless internet-linked satellite surveillance systems. HS3 Technologies is bringing together technologies, services and people to fulfill the increasing global security needs of today and tomorrow. [Click here to obtain additional information...](#)

Knight Energy Corporation**OTC:KNEC**

Knight Energy ("Knight" or "the Company") is a mid-continent domestic oil and gas company focused on opportunistic lease acquisition, drilling rig ownership and operation, and aggressive capital fund raising for drilling programs. Knight's common shares are currently trading on the Pink Sheets under the ticker "KNEC". Formed in March 2006, the Company has secured leases for more than 3,500 acres on the "Barnett Shale," in Texas, and 1,000 acres in the high-profile area known as the "Salt Creek Prospect" in Oklahoma. An independent third-party engineer reserve analysis of the first three wells indicates "Total Proven and Probable Reserves" of approximately \$7.6 million in cash flow over a 10-year period.

The Company's largest holding is Charles Hill Drilling, Inc. ("CHD"), a wholly owned subsidiary based in Texas. Through CHD, Knight is engaged in drilling activities in Stephens County, Texas. Additionally, CHD owns and manages its own drilling rig and employs three drill operating crews. This is a critical component in the production process as it ensures the Company's ability to drill additional wells on the current leased property as well as other potential properties that Knight is reviewing for consideration. In addition to this equipment, which is capable of drilling one to two wells per month, Knight is in the process of evaluating other opportunities to acquire additional rigs.

The Company's 2007 estimated proved reserves show 569,500,000 cubic feet of natural gas, and 117,000 BBLS of oil with a PV-10 of \$6,187,000, an increase of 2,431% as compared to the 2006 report. The \$6,187,000 is net of royalties, drilling costs, operating expenses, and state taxes and is discounted at 10% per year ("PV-10").

Northern Oil & Gas, Inc.

OTCBB:NOGS

Northern Oil & Gas, Inc. a Nevada corporation focused on drilling exploratory and developmental wells in the Rocky Mountain regions of the United States recently announced that Brigham Exploration Company, one of its drilling partners, announced substantial growth in its acreage position east of the Nesson Anticline in North Dakota, to roughly 30,000 net acres. Over 22,000 net acres are located in Mountrail County, North Dakota in a large area with recent high rate horizontal Bakken completions, and approximately 7,000 net acres are located in prospective extensional areas that have not experienced horizontal Bakken drilling. As a result of this activity, Brigham's total net acreage position in the Williston Basin has grown to approximately 174,000 net acres.

The primary target of Northern Oil is the Middle Bakken formation in the Williston Basin. Northern Oil's secondary target is conventional, 3D driven, oil and gas exploration and development throughout the Rocky Mountain Region. The new acreage located in the Appalachia Basin will give the Company an opportunity to participate in the early stage development of a prolific North American natural gas play. With companies such as Talisman Energy, Chesapeake Energy and Range Resources active in the region, Northern Oil & Gas believes there are ample opportunities for partnerships to develop.

Northern Oil and Gas, Inc. is an exploration and production company based in Wayzata, Minnesota. The company currently controls approximately 25,000 net mineral acres in the Williston Basin and 10,000 net mineral acres in the Appalachia Basin. [Click here to obtain additional information...](#)

Pet Ecology, Inc.

OTC:PECD

Pet Ecology Brands, Inc. recently announced that a national television advertising campaign introducing Pet Ecology Brand's "Perfect Litter Alert" to the home delivery market has been running successfully on 14 different television network channels nationally including the Animal Planet, Discovery Channel, The Food Network, Life Time TV, Fine Living, Hallmark, E! TV, HGTV, Bravo and others. The national advertising is being conducted by the Company's Internet and home delivery licensee, Pet Ecology Direct, LLC.

After a long series of market tests intended to determine the effectiveness of content of the advertising being used on TV and Internet marketing, the company has come up with an advertising plan which will ensure continuous growth of the home delivery business and Pet Ecology's brand awareness. As a result of initial marketing efforts and testing, the Company is already processing over 3,500 orders per week with the amount of orders expected to grow weekly as the customer base expands and as advertising becomes more targeted in conjunction with a scheduled increase in spending for the planned advertising.

Pet Ecology Brands, Inc. has been developing and distributing technologically advanced earth-friendly pet products that are safe for pets, people and the planet since 1996. Currently, the Company has established distribution and retail penetration in 32 distributors that have an estimated 10,000 retailers and pet professional outlets in the U.S. and Canada. Remote Surveillance Technologies, Inc.

OTC:RSUV

Remote Surveillance Technologies recently announced that it has signed a Stock Purchase Agreement to acquire 100% of the outstanding shares of San Diego-based Network Cabling, Inc., ("NCI"). NCI is a complete IT solution service firm providing design, installation and maintenance of IT systems, along with structured cabling solutions.

Based on NCI's un-audited revenue of approximately \$4.0 million through September of 2007, and with the recent signed Agreement with Security Solutions, Remote Surveillance Technologies' combined annual revenue guidance for 2007 is expected to be approximately \$10.0 million. NCI currently services clients such as Science Applications (SAIC), Johnson and Johnson, Sony, Texas Instruments, San Diego Port Authority and TD Waterhouse.

Remote Surveillance Technologies is a full-service electronic security systems integrator and remote surveillance monitoring company. RST provides security analysis, systems design, equipment purchase, installation, and integration for off-site video monitoring. RST's revenue is generated from both recurring video monitoring fees and systems installations. The monitoring advantages offered by RST to its clients include: the elimination of false alarms; incident verification at physical plant and with corporate vehicles; immediate notification to law enforcement; description and physical location of perpetrator(s) to law enforcement during the crime; immediate voice interaction with perpetrator(s); 24/7 on-site digital image recording and storage; redundant recording of events at monitoring station to preserve evidence, alarm indicator points for ease of reviewing incidents; and the significant lowering of the clients' security costs by reducing or eliminating on-site guard personnel. Straight Up Brands, Inc.

OTC:STRU

Straight Up Brands, Inc. ("Straight Up" or the "Company") an emerging developer and international marketer of premium branded wines and spirits announced revenue results through August 2007 and full financials for the year ended December 31, 2006 reflecting the increased roll-out of Bracco Wines and sales of Sizzurp Purple Punch Liqueur and Lucky Nites Golden Liqueur that were acquired in the Company's purchase of Rappin Brands in the first quarter of 2007. The results signal the continued national expansion of the Company's distribution network and the launch in summer 2007 of shipments of Lucky Nites. Revenue for the 2006 fiscal year was \$772,000, reflecting sales of Bracco wine only, which was launched in the second quarter of 2006. The Company is on track to increase wine sales for the year by 50% and for the sales of its spirits brands to exceed those of the wine.

Straight Up Brands, Inc. develops, produces, and markets branded wine and alcoholic beverages through collaborations with artists, DJs and other influential celebrities. The Company's premium branded products are within three growing categories of the spirits industry: wine, vodka and liqueurs/cordials. The Company's first product brought to market is Bracco Wine; with the acquisition of Rappin Brands, it now has Sizzurp in distribution.

Future products include Foxy Brown's sparkling wine, Storm Vodka with DJ Clue, MoMo Mojito with Ja Rule, and Triple Coconut Rum with MOP. The Company anticipates adding to these product lines with additional celebrity endorsements throughout 2007. Leveraging the marketing power of artists combined with the current growth and solid profit margins in the spirits industry, the Company is well positioned for strong revenue growth, earnings and success.
