December 2007

Cellulosic Ethanol Solves Food or Fuel Challenge

With oil prices at historic highs, economic and political interest in alternative fuels, specifically ethanol, is growing at a frenetic pace. Ethanol has been hotly debated since 1978, when Congress approved a tax break for the fuel.

In 2005, Congress decided to require that 7.5 billion gallons of ethanol be added annually to U.S. gasoline supplies by 2012, an amount expected to be reached soon. At present, California uses approximately a billion gallons of ethanol per year.

At the heart of this year's dispute on Capitol Hill is the Senate bill's renewable fuel standard, which would mandate 36 billion gallons of alternative fuels by 2022, up to 15 billion from corn-based ethanol. After 2016, an increasing portion would have to be advanced biofuels, including cellulosic ethanol produced from plant materials, such as switch grass and wood chips, thought to be easier on the environment than corn-based ethanol. The House version of the bill includes no such mandate. Instead, it offers tax incentives to promote research on cellulosic ethanol. As can be expected with any political debate, there are a myriad of different factions and special interests groups going to bat for their constituents, including lawmakers from oil-producing states sounding off against lawmakers from corn-growing states.

Background

Ethanol is commonly produced from either corn or cellulosic feedstocks. While conventional ethanol is derived from soft starches (corn for example), cellulosic ethanol is derived from a wide variety of sources of cellulose (cell wall) plant fiber. These range from stalks and grain straw to switchgrass and quick-growing trees (poplar and willow), and even municipal waste.

Although corn is currently the more commonly used and more popular feedstock for making ethanol, cellulosic feedstocks have several advantages over using corn. Because cellulosic crops are not used for food, there is

inherently less price volatility. And because a wide variety of crops can be used, they can be grown in a wide variety of geographic locations, even on marginal lands, and can, therefore, be more abundant. Additionally, more ethanol can be produced per acre with certain crops than can be made with corn. For these reasons, using dedicated energy crops appears to be a superior long-term alternative vis-à-vis using food crops for ethanol production.

Despite these advantages, in the short term corn will remain a key component of the ethanol industry until cellulosic ethanol comes online commercially. However, corn is unsustainable in the long term due to land use issues, water issues, food price issues, etc., that will limit corn's contribution to a sustainable 15 billion gallons annually by 2017. Above that level, any ethanol demand will have to be met by cellulosic ethanol. Forty-six Democrats, including several Californians, recently wrote congressional leaders to express similar concerns: "Rapid expansion of ethanol made from corn and other food crops has also created new unforeseeable challenges, including rising food prices, rising animal feed prices, heightened competition for water, water pollution, and the loss of grasslands and other valuable wildlife habitats."¹

Democrats have also written to congressional leaders to say the country would benefit far more from biofuels made from nonfood sources. That would do more, they said, to reduce greenhouse gas emissions without reducing the availability, or increasing the price of corn used for animal feed.

Approximately 24% of the nation's corn is expected to go to ethanol production this year, up from 13% in 2004, before Congress enacted the ethanol mandate. Even though corn production has increased, corn prices have shot up. A bushel sold for approximately \$3.50 last week, up from approximately \$2 two years ago. Food industry groups recently wrote lawmakers to complain that diverting corn from food to fuel "strains the supply for the commodity and increases prices for all users."

¹ According to a November 28th, 2007 Los Angeles Times Article titled *Ethanol a sticking point in energy bill* by Richard Simon

Cellulosic Ethanol Solves Food or Fuel Challenge - Continued

Here are some numbers to consider².

Presently, corn yields, on average, approximately 160 bushels per acre, with industry predictions climbing all the way up to 300. And we get about three gallons of ethanol per bushel. That means for every acre of corn harvested, approximately 900 gallons of ethanol can be made.

Add in four tons of stover (converted cellulosically) per acre, with which you can produce 100 gallons per ton, and we're looking at additional ethanol production of 400 gallons per acre, for a grand total of 1,300 gallons per acre. And that's using two different feedstocks, with two different harvest times, two different costs and two different conversion processes.

Now consider a dedicated biomass energy crop like switchgrass, miscanthus or sorghum. These crops can be harvested, at the present time, at a rate of 20 tons per acre, with ethanol production of 100 gallons per ton, for a total of 2,000 gallons per acre. Based on these figures, it is evident why energy crops and the cellulosic process will be huge successes.

BlueFire Ethanol, Inc. (OTCBB:BFRE)

(A cellulosic ethanol pure play)

BlueFire Ethanol, Inc. was established to deploy the commercially ready, patented, and proven Concentrated Acid Hydrolysis Technology Process for the profitable conversion of cellulosic ("Green Waste") waste materials to ethanol, a viable alternative to gasoline.

BlueFire's use of the Concentrated Acid Hydrolysis Process Technology positions it as the only cellulose-to-ethanol company worldwide with demonstrated production of ethanol from urban trash, rice and wheat straws, wood waste and other agricultural residues.

With the research and development work completed, patent protections in place, the product markets researched, and several full-scale BioEthanol projects currently in various stages of development, BlueFire is uniquely positioned to become the world leader in the development, ownership and operation of these biorefineries. BlueFire has completed the arrangement of the major commitments necessary to proceed with final development of the First North American Waste to Ethanol Production Facility to be located in California.

Paul Silver - Director of Research, WSR

Friedland Investment Events along with Wall Street Resources is proud to announce our next Global Equities Conference where business and pleasure go hand-in-hand, providing the ideal platform to meet face-to-face with CEO's, network with peers and meet with institutions, fund managers and investors while enjoying all that Las Vegas has to offer.

Why Present:

To position yourself and your organization in front of an audience made up of the leading institutions, hedge funds, brokers, analysts, venture capitalists and investors. With our in-depth experience in hosting such events, we are uniquely positioned to match company executives with the financial community. You'd be hard-pressed to find a better venue and program anywhere else.

Why Attend:

To meet, network and build relationships with the leading executives and industry peers.

Having pulled together a focused agenda, we feel that there's no better way to set the context for the presentations delivered by the CEOs of over 25 companies as well as presentations by industry experts. So, whether you are evaluating potential investment prospects, benchmarking start-ups, listening to companies you have in your portfolio or seeking new business or investment partners, be sure to join us.

*Presenting companies over the past 5 years have experienced an increase in market value exceeding **\$50 Billion dollars.***

For more information, please visit www.friedlandevents.com or call 609-360-0584.

² Green Chip Stocks November 2007 article titled *Investing in Cellulosic Ethanol* by Nick Hodge

Micro-cap Portfolio

The micro-capital portfolio is a collection of WSR's best ideas and is intended to help speculative investors increase their investment performance. Positions in the portfolio include early stage companies and other micro-capital companies that appear to be significantly under-valued or technically attractive. Early stage companies are typically WSR clients and (in our opinion) have the potential for a three hundred percent return over the next three to five years. Other companies included in the portfolio are generally trading at a significant discount to their peers, breaking out of long-term bases, are turn-around plays, or have recently announced a significant event. Changes to the portfolio are emailed to WSR's subscribers via its *Daily Notes* publication and are updated each month in *The Emerging Growth News*.

Select Microcap Portfolio Position Events in November 2007

Advanced Growing Systems, Inc. (OTC:AGWS) named Dan Dunn as the Company's CFO replacing current CFO Lyle Mortensen who continue to serve on the Company's Board of Directors and will head its audit committee. **Apollo Gold Corp. (AMEX:AGT)** signed a core drilling contract with Falcon Drilling Ltd. for its Huizopa project in Mexico and announced an option to purchase the Smuggler Mines in Gilpin County, Colorado. Apollo also announced operating results for its 3rd quarter of 2007 which included record net income of \$2.1 million or \$0.01 per share. **Assured Pharmacy (OTCBB:APHY)** reported its third quarter 2007 results which included record revenue of \$3.7 and a net loss of (\$722,185) a 36% decrease from the loss of (\$981,085) in the 3rd quarter 2006. **Axesstel, Inc. (AMEX:AFT)** reported 3rd quarter results including a revenue of \$15.4 million which was a huge drop from \$32.1 million in the 3rd quarter of 2006. This led to (\$3.0M) loss for the quarter compared to \$225,000 in net income in the 3rd quarter of 2006. These results caused a significant drop in share price and a delisting notice from the AMEX. **Axiom Technologies (OTC:AXGI)** reported its proprietary TaggerTrap graffiti detection system is making headlines and grabbing significant media attention. Management commented that this media attention has led to a significant upswing in purchase orders. **China Direct (AMEX:CDS)** reported 3rd quarter results including record revenues of \$44.5 million and net income of \$2.99 million or \$0.16 per share. The company also announced it signed a definitive agreement to acquire a Zinc and Lead company in China. **Credence Systems Corp. (NASDAQ:CMOS)** announced its CFO will resign upon the filing of its next 10K. **Dynamic Response Group (OTCBB:DRGP)** announced that its pest control product "RIDDEX" has generated over \$2 million in sales from its short form infomercial since airing in August 2007. **Ecosphere Technologies, Inc. (OTCBB:ESPH)** deployed its first two Ecosphere Ozonix™ systems for field testing. The new systems are targeting the \$40 billion "Produced Water" issue challenging oil and gas production. Upon successful field testing, management plans an aggressive rollout. **eFoodSafety.com, Inc. (OTCBB:EFSF)** announced the launch of its new Immune Boost Bar™ and its appointment of CPG Focus Consulting to lead its distribution. eFoodSafety also announced the successful formulation of a trans-dermal delivery system for its Citroxin aimed at treating the MRSA virus "Super Bug". **Falcon Technologies, Inc. (OTC:FLCN)** announced a record backlog of \$14 million as of October 31, 2007. Subsequently, it announced a new services contract with a large university in northern California for an initial term of two years valued at up to \$800,000 annually. **GeoPharma, Inc. (NASDAQ:GORX)** reported its fiscal 2nd quarter results including \$6 million in revenue and a net loss of (\$1.7) million or (\$0.15) per share. GeoPharma also received FDA approval to manufacture and distribute Carprofen, as well as announced an agreement with Vetoquin for marketing and distribution of its Vetprofen™ nationwide. **HearUSA, Inc. (AMEX:EAR)** reported record 3rd quarter results including \$26.9 million in revenues and net income of \$488,000 or \$0.01 per share. HearUSA also announced it acquire two private hearing care centers in Charlotte, NC with combined TTM revenues of \$2.4 million. **Home Solutions of America, Inc. (NASDAQ:HSOA)** delayed the release of its 3rd quarter results and continues to get hammered with class action law suits. **HS3 Technologies, Inc. (OTCBB:HSTH)** reported its fiscal 1st quarter results of \$154,000 in revenue and a net loss of (\$500,000). The company also reported that it bought back

5,000,000 warrants with an exercise price of \$0.12 from an investment group. Based on the \$514,000 contract announced on October 2, 2007 we expect the company to post record revenues in its fiscal 2nd quarter. **Hudson Technologies, Inc. (NASDAQ:HDSN)** reported its 3rd quarter results including \$4.7 million in revenue and net income of \$357,000 or \$0.02 per share. **iSECUREtrac Corp.** reported 3rd quarter results including \$2.2 million in revenue and a net loss of (\$2.6) million or (\$0.24) per share. **Lucas Energy, Inc. (OTCBB:LUCE)** reported its fiscal 2nd quarter results including its 10th consecutive quarterly profit with \$926,487 in revenue and \$104,956 in net income. WSR CORPORATE SPONSORS:

Wall Street Resources is a professional research and consulting firm connecting under-followed emerging growth companies with sophisticated investors looking for emerging growth company investment ideas. Leveraging over a decade of experience analyzing micro-to-small capital companies, the principals of WSR are dedicated to providing aggressive investors with unique opportunities, while helping emerging growth companies communicate with the investment community. The following companies are WSR's current clients which support its financial publications:

Featured Companies:**Advanced Growing Systems, Inc.****OTC:AGWS**

Advanced Growing Systems, Inc. recently announced that it has named Dan Dunn as the Company's Chief Financial Officer. This position will be shared with current CFO Lyle Mortensen until December 31st, 2007 at which time Mr. Mortensen will step down from his position. Mr. Mortensen will continue to serve on the Company's Board of Directors and will head the Board's audit committee.

Mr. Dunn brings over 13 years of accounting experience specializing in early stage construction and manufacturing companies. Mr. Dunn has a successful track record of taking companies to the next level by designing and implementing innovative financial strategies. He was previously Chief Financial Officer with Janus International Corp., a manufacturer of steel rolling overhead doors, where he directly assisted in growing the company from a start up to over \$80 million in sales while adding two additional manufacturing facilities, one distribution center and a foreign joint venture in a four year period.

Advanced Growing Systems, Inc., founded in 2006, is the parent company of Organic Growing Systems, Inc. (a scientifically advanced Organic fertilizer manufacturer) and Advanced Nurseries, Inc. (a wholesale group of Commercial Nurseries located in the Southeastern US). AGWS is dedicated to providing its shareholders significant value and is directly involved in the \$48 Billion fertilizer market and the \$66 Billion Green Industry. AGSI was founded by a skilled group of industry professionals each with over 20 years of direct experience in the "Green" industry.

Axiom Technologies, Inc.**OTC:AXGI**

Axiom Technologies, Inc. ("AXGI" or the "Company"), a leading provider of surveillance security systems software and hardware, recently updated shareholders on the progress of TaggerTrap, its state-of-the-art graffiti detection product. Axiom is excited to announce that TaggerTrap is grabbing media headlines as it makes its commercial debut in California. The Los Angeles Times and other CBS news affiliates have reported that the City of Montebello is the first city in the United States to use Axiom's TaggerTrap to combat graffiti, which is a billion dollar problem across North America.

The following are news articles covering Axiom's TaggerTrap: -- Article titled "Security Camera to Combat Tagging in Montebello" on November 14th, 2007. Source: cbs2.com

-- Article titled "Wanna be in pictures? Tag in Montebello" on November 15th, 2007 written by Tami Abdollah. Source: LATimes.com

-- Article titled "SoCal city uses new technology to nab taggers." Source: DailyComet.com

-- Article titled "SoCal city use new technology to nab taggers" on November 15th, 2007. Source: Examiner.com

-- Article titled "SoCal city uses new technology to nab taggers" on November 15th, 2007. Source: MercuryNews.com

-- Article titled "Caught on camera" written by Sandra T. Molina. Source: SGVTribune.com

Axiom's primary products include MAXIMUM Surveillance Software, which is the key solution providing interoperability for numerous digitalized security and surveillance products from diverse manufacturers. The Company's Digital Video Recorders (DVRs) and Network Video Products (NVPs) are targeted at the Security and Surveillance segment of the gaming industry. The Company's newest product "Tagger Trap" is a state of the art graffiti detection

product, which detects and alarms local police of graffiti activity. The estimated cost of graffiti clean up in North America is projected at \$1.0 billion annually. Millions of dollars have been budgeted in the past year by large metro police departments to detect and apprehend graffiti taggers.

BlueFire Ethanol, Inc.

OTCBB:BFRE

BlueFire Ethanol, Inc. announced that The U.S. Department of Energy has invited it to participate in its loan guarantee program, which will provide federal loan guarantees for clean energy projects and is expected to spur further investment in these advanced energy technologies. As one of 143 project applicants who previously submitted pre-applications to the loan guarantee program, BlueFire Ethanol, along with 15 others, was recognized for its proposed third California-based project to build a commercial-scale cellulosic ethanol plant using an array of low-cost feedstocks including landfill waste.

BlueFire intends to build a multinational company that leads the world in producing biobased transportation fuels. Its business will encompass development activities leading to the construction and long-term operation of production facilities while maintaining technological advantage and ownership of the process technology and all its improvements. Ethanol will be produced from biorefinery facilities opportunistically constructed on or near landfills, waste collection and waste separation sites. Each facility will deploy the proprietary technology, which uses all cellulosic waste materials traditionally disposed of in landfills as feedstock.

Ecosphere Technologies, Inc.

OTCBB:ESPH

Ecosphere Technologies, a diversified clean technology and services company, recently announced its preliminary third quarter and year-to-date 2007 results. The Company's revenues for the third quarter of 2007 were approximately \$7,000 and for the nine months were approximately \$668,000. The third quarter was spent negotiating a term sheet and definitive agreement as well as supplying extensive due diligence material to the buyer of Ecosphere's robotic coating removal technology. As a result of these efforts in the third quarter, the approximate \$8 million landmark sale of its patented ship stripping robotic technology closed on October 9, 2007.

Ecosphere's un-audited revenues and gains, before related direct costs of approximately \$3 million, for the 10 months ended October 31, 2007 were approximately \$8.6 million up 310% over the comparable period in 2006 of approximately \$2.1 million. It also equates to an increase of 258% over full year 2006 revenues of \$2.4 million. Ecosphere has not yet finalized its net earnings for the 10 months ended October 31, 2007 as the fourth quarter results will be reported pursuant to the completion of the 2007 10-KSB annual report.

Ecosphere Technologies, Inc., through its subsidiaries, develops and commercializes water and renewable energy technologies in the United States. It produces mobile filtration systems that are affixed to shipping containers or integrated into rugged off road vehicles to respond to natural or manmade disasters, as well as for industrial and military applications. The company also offers a line of patented robotic vehicles that remove paint and other coatings from ships using ultra high pressure water, reducing the discharge of contaminated residue or grit into the air and ocean.

In addition, Ecosphere Technologies develops Ecos Lifelink, a micro utility that provides clean water, power, Internet, and telecommunication services to remote areas using solar and wind energy. Further, it is developing Ecos Com Cube, which provides cellular telephone, VOIP, and Internet connection services to residents of remote and off-grid areas of developing countries using renewable energy generated by the solar panels and wind turbines. The company was founded in 1998. It was formerly known as UltraStrip Systems, Inc. and changed its name to Ecosphere Technologies, Inc. in 2006. Ecosphere Technologies is based in Stuart, Florida.

Identify, Inc.**OTCBB:EDFY**

Identify Inc. recently announced that it has signed a non-binding letter of intent to acquire Orbis Systems, Inc. and ViewTrade Securities, Inc., both wholly-owned subsidiaries of ViewTrade Holdings (“ViewTrade”), a privately-held developer and provider of technology-advantaged trading platforms and financial products for global institutional markets. Identify anticipates completing the transaction during the first quarter of 2008 with consideration for the acquisition in the form of a combination of common stock of the Company and assumption of debt of ViewTrade. The Company expects to use Orbis Systems’ technology to help enhance the Company’s current offerings, develop new technologies, and take advantage of several cross-marketing opportunities, including integrating the Company’s IDScreen technology into ViewTrade Securities’ online trading platform.

Identify, Inc. was formed in August 2004 with the objective of becoming the leading organization in the field of developing and deploying data analysis technology solutions for preventing identity theft and fraud. It is currently a later development-stage company and expects shortly to begin a period of growth. Identify will seek to fulfill its goals by analyzing the means by which identity crimes are perpetrated and through the development of new technologies and procedures to assist corporations, the government, and consumers in the fight against identity fraud and related crime.

Identify owns the intellectual property rights to two strategic approaches towards the detection and prevention of identity fraud. One is a patented information-based approach that analyzes identity data information for individuals in large databases, and is capable of detecting and scoring incidences of identity manipulation and potential theft (Identity Quotient Index(TM)). Identify will continue to market this technology to the financial services industry, as well as to large healthcare organizations and local, state, and federal government agencies.

eFoodSafety.com, Inc.**OTCBB:EFSF**

eFoodSafety.com, Inc. recently announced that its wholly-owned subsidiary Knock-Out Technologies, Ltd. has completed the research and development phase of incorporating its clinically proven product, Citroxin, into a unique trans-dermal cream with proven efficacy in transporting bio-active components beyond the level of the skin’s outer-most layer (stratus corneum).

The goal is to permit the active compounds in Citroxin to enter into systemic circulation, thereby allowing the proven health benefits of Citroxin to quickly improve numerous facets of internal health. On the back of the recent successful lab test demonstrating Citroxin’s ability to eradicate MRSA (Methicillin Resistant Staphylococcus Aureus), the initial aim of Trans-dermal Citroxin will be to allow Citroxin to be delivered in an efficacious dose directly into the bloodstream. This will arm the body’s defense systems to directly deal with most strains of Staph infection.

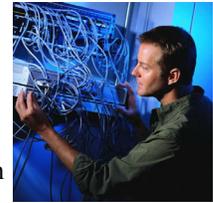

eFoodSafety.com, Inc. is dedicated to improving health conditions around the world through its innovative technologies. The Company’s Knock-Out Technologies subsidiary has developed an environmentally safe sporicidal product formulated entirely of food-grade components that eradicates anthrax and a germicidal product, Citroxin that kills six major bacteria: E-coli, Listeria, Pseudomonas, Salmonella, Staphylococcus, and Streptococcus, Avian Influenza, and Black Mold. The sporicidal product has completed its final efficacy laboratory study requisite for EPA registration. The Company’s MedElite subsidiary distributes clinically proven products to physicians who then prescribe the products for their patients.

It recently became the owner of the Talsyn(TM)-CI/bid Scar Cream, that has been clinically proven to facilitate and improve the appearance, redness and strength of scars, as well as seven other products in the Talsyn(TM) line. The Company is also owner of Cinnergen(TM), a clinically-studied, non-prescription liquid whole food nutritional supplement that promotes healthy glucose metabolism and Cinnechol(TM), a new multi-faceted nutritional supplement specifically designed to naturally reduce total cholesterol levels without causing any side effects. The Company has entered into a joint venture agreement with CK41 Direct, Inc. to launch the PurEffect(TM) anti-acne skin care system.

GelStat Corporation**OTC:GSAC**

GelStat Corporation a consumer healthcare company focused on the development of over-the-counter (OTC) products for treatment of pain and inflammation recently announced that it received a \$200,000 purchase order from Icarus Medical Industries Co. for GelStat Migraine. The purchase order is contingent on approval from the Ministry of Health in Kuwait and is the first three expected orders to roll out the product throughout the Middle East.

GelStat has a suite of effective healthcare products that address many consumer markets. Collectively, GelStat’s portfolio of products are in markets that produce over \$10 billion dollars in annual sales. GelStat Migraine is a sublingually (under the tongue) administered OTC medication for acute relief from the pain and associated symptoms of migraine.

GelStat™ Arthritis is the second available product and utilizes GelStat’s patent pending formulation. It is provided as a daily use, sublingual dissolving tablet. The Company also has developed GelStat Sleep and GelStat Sinus.

HS3 Technologies, Inc.**OTCBB:HSTH**

HS3 Technologies, Inc. recently announced that the Company has signed a new contract with a Florida resort hotel. This second contract is for the upgrade and installation of new RFID door locks throughout the hotel. HS3 Technologies anticipates generating up to \$500,000 in hardware related revenue. This new contract is in addition to the most recent security upgrade project of \$600,000 with this customer. These two contracts, in addition to the \$250,000 per year it expects to generate in recurring video monitoring revenue, will represent a multi-million dollar revenue opportunity with its real estate development customer.

HS3 Technologies, Inc. is a national provider of innovative security solutions, headquartered in Denver, Colorado. HS3 provides technologies and services through a national authorized dealer and distribution program. Utilizing independent sales professionals, national distribution and local dealers, HS3 offers custom security solutions for commercial, residential, government and military applications. These state-of-the-art products include digital video recording technology (DVR), biometric access control (door locks), personal biometric identification units, CCTV, video monitoring centers, cellular networks, wireless mesh networks units and wireless internet-linked satellite surveillance systems. HS3 Technologies is bringing together technologies, services and people to fulfill the increasing global security needs of today and tomorrow.

Knight Energy Corporation**OTC:KNEC**

Knight Energy announced that it has commenced production on its Jackson Property natural gas well located on its 160-acre property in Stephens County, Texas. The Jackson #1 Well has been producing high quality natural gas for the last week and has been averaging in excess of 300 mcf of gas per day. Knight Energy plans to drill additional wells on this property in the near future. Knight Energy is also drilling additional wells on some of its other properties, and it expects to announce the results of these efforts in the near future.

Knight Energy Corp. was formed in March 2006 for the purpose of operating and developing energy related businesses and assets. Shortly thereafter, Knight acquired an independent oil and gas services company, Charles Hill Drilling, Inc., which owned a 100% working interest in a 160-acre oil and gas lease in Stephens County, Texas, a drilling rig and other oil and gas equipment. The Company has leased an additional 400 acres that run contiguous to its 160-acre lease, and it has the right of first refusal on approximately 3,100 more acres in the same area.

In November 2006, the Company leased approximately 1,000 acres for oil and gas exploration in the Salt Creek Prospect area of Oklahoma. The Company is currently reviewing further acquisitions and investments in the oil and gas industry as well as other energy related businesses and assets.

Northern Oil & Gas, Inc.**OTCBB:NOGS**

Northern Oil & Gas, Inc. a Nevada corporation focused on drilling exploratory and developmental wells in the Rocky Mountain regions of the United States recently announced that it has entered into a definitive agreement to acquire approximately 4,500 additional net acres in Mountrail County, North Dakota. This acreage is near EOG Resources' recent exploration successes in the Parshall Field, North Dakota's largest Bakken reservoir found to date. The acquisition increases Northern leasehold assets in Mountrail County to approximately 13,000 net acres. The acquisition increases Northern's gross leasehold interest in Mountrail County to 45,000 acres.

Northern also announced it has begun to acquire leasehold assets in Burke and Divide Counties in North Dakota. Northern has accumulated approximately 7,500 net acres in the horizontal drilling play targeting both the Bakken and Winnepegosis resource formations. The acreage is near recent discoveries in the Bakken and Winnepegosis.

The primary target of Northern Oil is the Middle Bakken formation in the Williston Basin. Northern Oil's secondary target is conventional, 3D driven, oil and gas exploration and development throughout the Rocky Mountain Region. The new acreage located in the Appalachia Basin will give the Company an opportunity to participate in the early stage development of a prolific North American natural gas play. With companies such as Talisman Energy, Chesapeake Energy and Range Resources active in the region, Northern Oil & Gas believes there are ample opportunities for partnerships to develop.

Northern Oil and Gas, Inc. is an exploration and production company based in Wayzata, Minnesota. The company currently controls approximately 25,000 net mineral acres in the Williston Basin and 10,000 net mineral acres in the Appalachia Basin.

Pet Ecology, Inc.

OTC:PECD

Pet Ecology Brands, Inc. recently announced that a national television advertising campaign introducing Pet Ecology Brand's "Perfect Litter Alert" to the home delivery market has been running successfully on 14 different television network channels nationally including the Animal Planet, Discovery Channel, The Food Network, Life Time TV, Fine Living, Hallmark, E! TV, HGTV, Bravo and others. The national advertising is being conducted by the Company's Internet and home delivery licensee, Pet Ecology Direct, LLC.

After a long series of market tests intended to determine the effectiveness of content of the advertising being used on TV and Internet marketing, the company has come up with an advertising plan which will ensure continuous growth of the home delivery business and Pet Ecology's brand awareness. As a result of initial marketing efforts and testing, the Company is already processing over 3,500 orders per week with the amount of orders expected to grow weekly as the customer base expands and as advertising becomes more targeted in conjunction with a scheduled increase in spending for the planned advertising.

Pet Ecology Brands, Inc. has been developing and distributing technologically advanced earth-friendly pet products that are safe for pets, people and the planet since 1996. Currently, the Company has established distribution and retail penetration in 32 distributors that have an estimated 10,000 retailers and pet professional outlets in the U.S. and Canada.

Remote Surveillance Technologies, Inc.

OTC:RSUV

Remote Surveillance Technologies recently announced that it has signed a Stock Purchase Agreement to acquire 100% of the outstanding shares of San Diego-based Network Cabling, Inc., ("NCI"). NCI is a complete IT solution service firm providing design, installation and maintenance of IT systems, along with structured cabling solutions.

Based on NCI's un-audited revenue of approximately \$4.0 million through September of 2007, and with the recent signed Agreement with Security Solutions, Remote Surveillance Technologies' combined annual revenue guidance for 2007 is expected to be approximately \$10.0 million. NCI currently services clients such as Science Applications (SAIC), Johnson and Johnson, Sony, Texas Instruments, San Diego Port Authority and TD Waterhouse.

Remote Surveillance Technologies is a full-service electronic security systems integrator and remote surveillance monitoring company. RST provides security analysis, systems design, equipment purchase, installation, and integration for off-site video monitoring. RST's revenue is generated from both recurring video monitoring fees and systems installations. The monitoring advantages offered by RST to its clients include: the elimination of false alarms; incident verification at physical plant and with corporate vehicles; immediate notification to law enforcement; description and physical location of perpetrator(s) to law enforcement during the crime; immediate voice interaction with perpetrator(s); 24/7 on-site digital image recording and storage; redundant recording of events at monitoring station to preserve evidence, alarm indicator points for ease of reviewing incidents; and the significant lowering of the clients' security costs by reducing or eliminating on-site guard personnel.

Straight Up Brands, Inc.**OTC:STRU**

Straight Up Brands, Inc. ("Straight Up" or the "Company") an emerging developer and international marketer of premium branded wines and spirits announced that Lorraine Bracco is to be the featured headliner of the charity tasting event Women in Wine, presented by the Borgata Heart & Soul Foundation and sponsored by Wine Spectator on Saturday, November 10th, 2007 at the Borgata Hotel Casino & Spa in Atlantic City, New Jersey. The event will be hosted by Robin Leach and, in addition to featuring Bracco Wines, will present a celebrity chef cook-off and a wine education forum in honor of the distinguished female winemakers of the United States.

Straight Up Brands, Inc. develops, produces, and markets branded wine and alcoholic beverages through collaborations with artists, DJs and other influential celebrities. The Company's premium branded products are within three growing categories of the spirits industry: wine, vodka and liqueurs/cordials. The Company's first product brought to market is Bracco Wine; with the acquisition of Rappin Brands, it now has Sizzurr in distribution.

Future products include Foxy Brown's sparkling wine, Storm Vodka with DJ Clue, MoMo Mojito with Ja Rule, and Triple Coconut Rum with MOP. The Company anticipates adding to these product lines with additional celebrity endorsements throughout 2007. Leveraging the marketing power of artists combined with the current growth and solid profit margins in the spirits industry, the Company is well positioned for strong revenue growth, earnings and success.

Wall Street Resources, Inc. and/or the employees of Wall Street Resources, Inc. will not be held responsible for any losses that might occur from the use of the information provided by our newsletter services, or any other information related to Wall Street Resources, Inc. that might be acted upon by an investor. The information provided herein may be displayed and printed for your personal, noncommercial use only. You may not reproduce, retransmit, distribute, disseminate, sell, publish, broadcast or circulate the information to anyone, without the express written consent of Wall Street Resources, Inc.

This newsletter may contain forward-looking statements, particularly as related to pro forma financial statements, earnings estimates and business expectations, within the meaning of Section 27A of the Securities Act of 1933 and Sections 21E of the Securities Exchange Act of 1934, and are subject to the safe harbor created by these sections. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, goals, assumptions or future events or performance are not statements of historical fact and may be "forward looking statements." Forward looking statements are based on expectations, estimates and projections at the time the statements are made that involve a number of risks and uncertainties which could cause actual results or events to differ materially from those presently anticipated. These forward-looking statements are only made as of the date of their release and Wall Street Resources and the companies discussed do not undertake any obligation to publicly update such forward-looking statements to reflect subsequent events or circumstances.

Wall Street Resources, Inc. is an information provider only. We cannot control market conditions, liquidity, market shutdowns, entry and exit prices, Internet shut-downs, or fax and mail delays. All investors should only invest or trade with capital that is risk capital that they can afford to lose. You may cancel your Wall Street Resources' newsletter service at any time and receive a full, pro-rata refund for the unused portion of your subscription. If emerging growth stock investing or trading seems too risky for you, you might want to consider starting with a less aggressive form of investing, such as the regular mutual fund contributions.
