Bond Labs Reports Record 1st Quarter Results

By Paul Silver

Bond Laboratories, Inc. (OTCBB:BNLB)

Bond Laboratories is a manufacturer of innovative and proprietary nutritional supplements for health conscious consumers. The Company produces and markets products through its NDS Nutrition division. NDS' products number over 50 brands of energy, sports, and dietary supplements. These products are sold directly through specialty health and nutrition retailers, and are included among the top-selling products at GNC® franchises. Bond Labs is headquartered in Omaha, Nebraska. For more information, please visit <http://www.bond-labs.com>.

Bond Labs recently announced significant and continued revenue growth and positive net income for the first quarter. Revenue for the three months ended March 31, 2013 was \$6.1 million as compared to \$5.0 million for the comparable period last year, an increase of 22.3%. Net income for the three months ended March 31, 2013 was \$0.6 million as compared to \$0.7 million for the comparable period in 2012. Excluding non-cash charges related to the issuance of common stock to certain employees and consultants for the fair value of services rendered, adjusted net income for the quarter ended March 31, 2013 increased 28.4% to \$0.9 million from \$0.7 million for the comparable quarter ended March 31, 2012. The increase in adjusted net income, while partially offset by higher selling and marketing costs

principally related to ongoing international expansion efforts, was driven by both increased sales volume and improved gross margin.

“Quarterly revenue exceeded \$6 million for the first time in the history of the company. Moreover, shipments to international GNC® franchise locations increased significantly during the quarter,” commented John S. Wilson, Chief Executive Officer of Bond Labs. “Our continued focus on launching innovative and highly effective products remains a key driver of our success and ongoing growth. I anticipate that international sales will represent a greater portion of total sales for the quarters and years ahead, and remain very excited about the current state and future prospects for the business,” concluded Mr. Wilson.

Florida Small Cap 30

The Florida Small Cap 30 highlights what we believe are the top 30 publicly traded investment opportunities in Florida with a market capitalization less than \$500 million on a risk/reward basis. While we limit the number of positions to 30, the portfolio may temporarily contain less than 30 positions as the result of removing positions. To qualify for inclusion, companies in the WSR-Florida Small Cap 30 must have a market capitalization less than \$500 million as well as met a certain number of valuation and performance based hurdles including, but not limited to, revenue growth, PEG ratio, tangible book value, and profitability. Changes to the Florida Small Cap 30 list will be emailed to WSR's subscribers via its *Daily Notes* publication and are updated each month in *The Emerging Growth News*.

WSR's Aggressive Growth and Speculator Focus Lists

Companies included in the WSR-Aggressive Growth list are primarily companies based outside of our home state of Florida and are generally trading at a significant discount to their peers, breaking out of long-term bases or have recently announced a significant event. To qualify for inclusion, companies in the WSR-Aggressive Growth portfolio must have a market capitalization less than \$500 million and must have met a certain number of valuation and performance based hurdles including but not limited to revenue growth, PEG ratio, tangible book value, and profitability.

Companies included in WSR-Speculator portfolio are typically early stage or turnaround companies which are frequently WSR clients and (in our opinion) have the potential for a three hundred percent return over the next three to five years. Changes to these lists are emailed to WSR's subscribers via its *Daily Notes* publication and are updated each month in *The Emerging Growth News*.

JUNE'S TOP COMPANIES UNDER \$5.00 AS MEASURED BY INSIDER BUYING:

Investors and analysts look to the buying and selling trends of insiders, who are typically long-term investors, for clues to the broader market outlook. According to Ben Silverman, InsiderScore.com's director of research, "Insiders have been very accurate in terms of calling market bottoms, both temporary, in terms of corrections, and troughs."

Although insider buying is a useful tool to consider when making a decision on which stock to buy, it should be looked at carefully lest it give a false positive signal. Investors need to look behind the headlines and conduct their own research before buying on this basis. For example, option exercises can also give false signals. This section summarizes the companies (trading under \$5.00 per share) with the greatest amount of purchasing by insiders during the previous month.
