

October 2014

Stevia First Leverages its Technology and Forms Partnership to Meet Supply-Constrained Demand for Stevia within the \$6 Billion Sugar-Substitutes Market

By Paul Silver

Stevia First Corp (OTCQB: STVF) is an R&D-based agricultural biotechnology company engaged in the cultivation and harvest of stevia leaf and the development of stevia and other related products. Stevia First has developed fermentation-based stevia production capabilities which bypass the need for traditional stevia farming. The Company's strategy is to leverage its proprietary break-through technology to establish a vertically-integrated enterprise that controls the process of stevia production from plant breeding through propagation, planting, cultivation, and harvesting, and which develops, markets, and sells stevia products.

The Market for Stevia

The market for sugar substitutes is valued at approximately \$6 billion. Stevia is growing rapidly within this sector of the sweetener market due to increased awareness about the dangers of sugar, and large beverage companies are very interested in the space. The primary issue is that there is not enough supply. For a company like Coca Cola that spends billions of dollars a year on sweeteners, they would need between 3-5 times the current aggregate global capacity of stevia to meet their demands. To meet this demand using an antiquated agricultural (ag) based supply chain is impossible. Stevia First is bringing an innovative ag-biotech production method to the table to dramatically increase yield and lower production costs which is drawing the attention of the major beverage companies.

Product Development & Strategy

After successful development of its unique method of stevia fermentation, Stevia First is now ready to scale-up its commercial operations. The Company's first product will be an efficiently-produced Reb A sweetener that should be able to compete effectively with other stevia-derived Reb A products once on the market. The higher-grade sweetener product, referred to as SGN95, is still being developed.

Commercialization

Over the past few months, the Company has formed a partnership with Qualipride, a major overseas stevia supplier, that has given Stevia First exclusive rights to its supply chain. Qualipride has sales of 350 metric tons of stevia extract last year, and they have a supply chain that can support more than 1,000 metric tons of high purity Reb A., a product that sells for \$100,000 per metric ton (\$100 million in potential revenue).

Based on this partnership, the Company will be able to fulfill long-term supply contracts with major beverage companies.

Before the end of 2014, the Company intends to commercialize both a stevia resale and distribution business through its deal with Qualipride as well as an enzymatic enhancement process, converting a low value stevia extract that costs \$30-\$40/kg into a high purity, high value Reb A product that markets for \$100/kg. Neither business requires any additional outside capital. Longer term, contingent upon securing capital and/or finding a strategic partner, the Company intends to build its own California-based extraction/purification facility and also support an ag-supply chain.

Investment Highlights

- Stevia First is in the process of patenting proprietary fermentation methods to produce larger quantities of higher-grade steviol glycosides (Reb A) from Stevia leaf.
- Intellectual property related to steviol glycoside production using fermentation.
- Stevia extract is expected to become a major player in the \$55 billion global sweetener market.
- Management and board contain leaders in biotechnology R&D with 20+ years.

Investment Conclusions

Its partnership with Qualipride transforms Stevia First from a developmental stage R&D organization into a large scale commercial marketer of one of the largest stevia supply chains in world. In addition, it is the most vertically integrated stevia company in the world with preferential access to raw materials at a lower cost than are available to other buyers. With its stable supply chain combined with its agri-bio technologies, Stevia First is a game changer in this nascent sector. It is an attractive strategic acquisition target for PureCircle (LSE: PURE), a leading provider of high-purity stevia products to the global F&B industry or any major food, ingredient, or beverage company looking to secure a low-cost stevia supply chain.

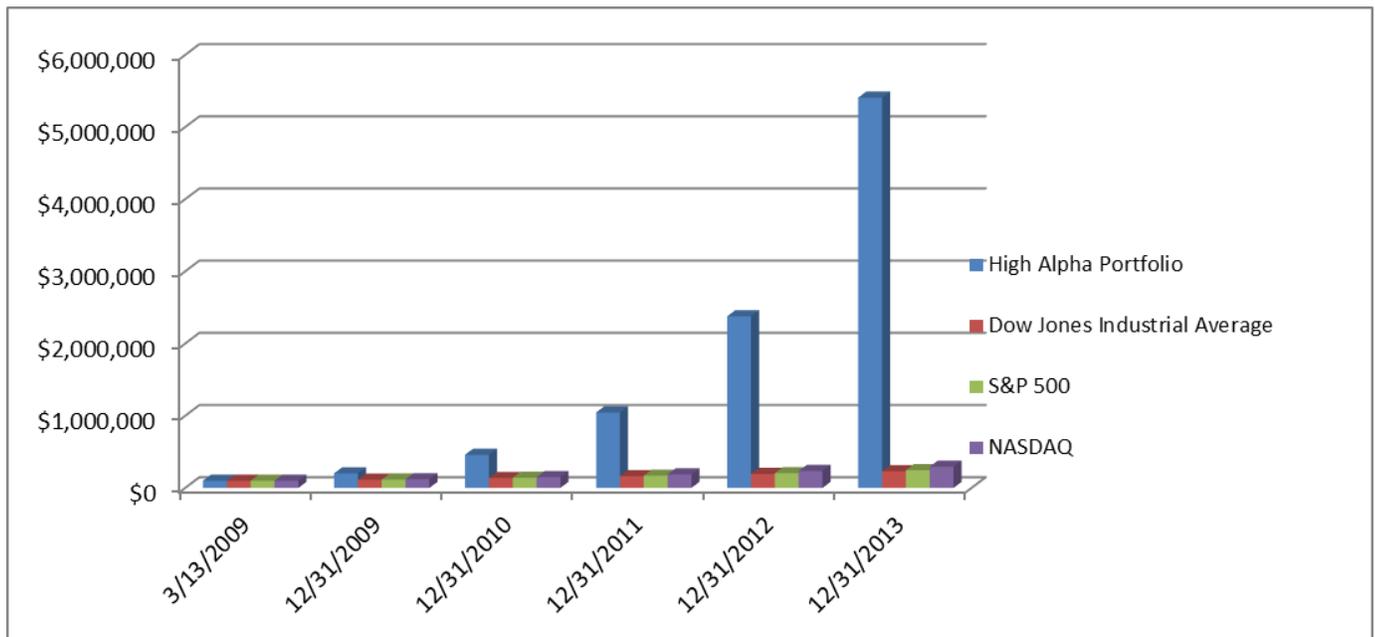

Paul Silver

Paul Silver is the Managing Director of Research at Wall Street Resources. Previously he has been in auditing with a Big Four accounting firm in New York City, a sell-side research analyst for two global investment banks in New York City including Salomon Smith Barney and UBS Paine Webber. At Salomon Smith Barney he was a member of the firm's research team covering Real Estate Investment Trusts that was consistently ranked #1 by Institutional Investor magazine. Mr. Silver has written extensively on small cap equities and is a contributing writer to numerous publications is a co-manager of the WSR High Alpha model portfolio which has resulted in a 127.39% average annualized return from inception on March 13, 2009 through December 31, 2013. WSR's Featured Companies:

Please refer to important disclosures at the end of this newsletter. Copyright © 2014 by Wall Street Resources, Inc., all rights reserved.

Wall Street Resources is a professional research and consulting firm connecting under-followed emerging growth companies with sophisticated investors looking for emerging growth company investment ideas. Leveraging over a decade of experience analyzing micro-to-small capital companies, the principals of WSR are dedicated to providing aggressive investors with unique opportunities, while helping emerging growth companies communicate with the investment community. The following companies are WSR's current clients which support its financial publications:

Featured Companies:

Black Ridge Oil & Gas, Inc. **OTCQB/OTCBB:ANFC**

Black Ridge Oil & Gas controls over 12,000 net acres in the Bakken and Three Forks play in western North Dakota and eastern Montana. The 2013 US Geological Survey assessment estimated that there are 3.7 billion barrels of recoverable oil in the Bakken Formation and an additional 3.7 billion barrels of recoverable oil in the Three Forks Formation. At a total of 7.4 billion recoverable barrels, this represents a twofold increase from the 2008 assessment. Together with the continued advances in horizontal drilling technology, the Bakken oil play is proving to be both high-yield and sustainable.

EnerJex Resources, Inc. **OTCQB:ENRJ**

EnerJex Resources, Inc. is an independent exploration and production company focused on the acquisition and development of oil and natural gas properties located in the mid-continent region of the United States. The Company owns oil and gas leases covering nearly 100,000 acres in multiple prolific hydrocarbon basins located in four states including Colorado, Kansas, Nebraska, and Texas. EnerJex's operations are focused in five distinct projects where the company produces oil and natural gas from reservoirs that are characterized by long lived reserves with low production decline rates. Within these projects, the Company has identified more than 500 low-risk drilling locations. Through its large acreage footprint in the Denver-Julesburg ("DJ") Basin, EnerJex also has significant exposure to emerging oil resource plays that are being pursued by competitors on trend with the Company's properties.

To obtain additional information go to: <http://www.wallstreetresources.net/enerjex.aspx>

FieldPoint Petroleum Corp. **AMEX:FPP**

The Company acquires, operates, and develops oil and gas properties located in Texas and Wyoming. FieldPoint Petroleum looks to continue expanding in Texas and Wyoming, as well as in other Rocky Mountain and mid-continent states such as Montana, North Dakota and Oklahoma. As of January 2013, the Company has varying ownership interest in approximately 300 wells located in Oklahoma, Louisiana, New Mexico, Texas and Wyoming. FPPC oil and gas production is sold on the spot market. The Company believes that, with operator's responsibility and authority, it is in a better position to control cost, safety, and work timelines, as well as other critical factors affecting the wells' economics.

Gray Fox Petroleum Corp.
OTCQB:GFOX

Gray Fox Petroleum is an oil and gas exploration and development company focused on expanding the 135+ year tradition of Western US energy production.

Gray Fox owns a 82% interest in the 32,723-acre West Ranch Prospect, which is comprised of 22 Federal leases in the Butte Valley Oil Play Region of north-central Nevada, in Elko and White Pine Counties, 50 miles north of Ely, NV. The Company's West Ranch Prospect overlies structures and reservoir horizons similar to those that have produced a combined 50+ million barrels of oil in Nevada to date.

Gray Fox is currently developing an initial exploration work program to further assess the prospect's resource and production potential. To maximize on the Company's assets, Gray Fox has assembled a core team of management and advisory professionals with oil and gas exploration and production backgrounds, as well as business building and capital raising expertise.

Liberator Medical Holdings, Inc.
OTCBB:LBMH

Liberator Medical Holdings, Inc.'s subsidiary, Liberator Medical Supply, Inc., established the Liberator brand as a leading national direct-to-consumer provider of quality medical supplies to Medicare-eligible seniors. An Exemplary Provider(TM) accredited by The Compliance Team, its unique combination of marketing, industry expertise and customer service has demonstrated success over a broad spectrum of chronic conditions. Liberator is recognized for offering a simple, reliable way to purchase medical supplies needed on a regular, ongoing, repeat-order basis, with the convenience of direct billing to Medicare and private insurance. Approximately 85% of its revenue comes from supplying products to meet the rapidly growing requirements of general medical supplies, personal mobility aids, diabetes, urological, ostomy and mastectomy patients. Liberator communicates with patients and their doctors on a regular basis regarding prescriptions and supplies. Customers may purchase by phone, mail or internet, with repeat orders confirmed with the customer and shipped when needed.

Midwest Energy Emissions Corp.
OTCQB:MEEC

Midwest Energy Emissions Corp. develops and employs patented and proprietary technologies to remove mercury from coal-fired power plant emissions. The U.S. Environmental Protection Agency's (EPA) Mercury and Air Toxic Standards (MATS) rule requires that all coal- and oil-fired power plants in the U.S., larger than 25 mega-watts, must remove roughly 90% of mercury from their emissions starting April 16, 2015. Midwest employs patented technology that has been shown to achieve mercury removal levels compliant with MATS at a significantly lower cost and with less operational impact than currently used methods, while preserving the marketability of fly-ash for beneficial use, a roughly \$450mm industry annually. Management estimates that mercury emissions control is a recurring \$2-\$3 billion opportunity in the U.S. annually, with further international growth expected as countries adopt mercury emissions regulations under the United Nations Minimata Convention on Mercury.
