BAE Systems Awards Contract to TTM Technologies, Inc.

TTM to Provide PCBs and Assemblies for Military Thermal Weapon Systems Program

SANTA ANA, Calif.--(BUSINESS WIRE)--

TTM Technologies, Inc. (Nasdaq:TTMI) today announced that it has received a contract valued in excess of \$8.0 million from BAE Systems for printed circuit boards and printed circuit board assemblies used in the Thermal Weapons Systems Program. The Thermal Weapon Sight (TWS) is an advanced next-generation family of thermal sights for light, medium, and heavy weapon applications and enables individual and crew-served weapons gunners to see deep into the battlefield, increasing their surveillance and target acquisition range.

The contract for the first full-rate production and deliveries began in April of 2008, and will extend over a 12 month period. Work will be performed in TTM's Stafford Springs, CT; Santa Clara, CA; and Stafford, CT facilities.

Kent Alder, President and CEO of TTM, noted, "We are pleased that BAE Systems has awarded TTM this contract for our highly technical PCBs and PCB assemblies, which will contribute to current and future infantry armament. We continue to see strength in the aerospace/defense business and this contract award provides further validation of our strategy to broaden our end customer base."

Safe Harbor Statement

This release contains forward-looking statements that relate to future events or performance. These statements reflect the company's current expectations, and the company does not undertake to update or revise these forward-looking statements, even if experience or future changes make it clear that any projected results expressed or implied in this or other company statements will not be realized. Furthermore, readers are cautioned that these statements involve risks and uncertainties, many of which are beyond the company's control, which could cause actual results to differ materially from the forward-looking statements. These risks and uncertainties include, but are not limited to, the company's dependence upon the electronics industry, the company's dependence upon a small number of customers, general economic conditions and specific conditions in the markets TTM addresses, the unpredictability of and potential fluctuation in future revenues and operating results, increased competition from low-cost foreign manufacturers and other "Risk Factors" set forth in the company's most recent SEC filings.

About TTM Technologies, Inc.

TTM Technologies, Inc. is North America's largest printed circuit board manufacturer, focusing on quick-turn and technologically advanced PCBs and the backplane and sub-system assembly business. TTM stands for time-to-market, representing how the company's time-critical, one-stop manufacturing services enable customers to shorten the time required to develop new products and bring them to market.
