About Our Non-GAAP Financial Measures

This release includes information about the Company's non-GAAP net income attributable to stockholders and non-GAAP earnings per share attributable to stockholders, which are non-GAAP financial measures. Management believes that both measures -- which add back amortization of intangibles, stock-based compensation expense, non-cash interest expense on debt, asset impairments, restructuring and other charges as well as the associated tax impact of these charges -- provide additional useful information to investors regarding the Company's ongoing financial condition and results of operations.

A material limitation associated with the use of the above non-GAAP financial measures is that they have no standardized measurement prescribed by GAAP and may not be comparable to similar non-GAAP financial measures used by other companies. The Company compensates for these limitations by providing full disclosure of each non-GAAP financial measure and reconciliation to the most directly comparable GAAP financial measure. However, the non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP.
