Cummins Announces Availability of X12™ With Autocar

COLUMBUS, Ind.--(BUSINESS WIRE)-- Cummins Inc. (NYSE: CMI) is pleased to announce that starting in the fourth quarter of 2018, Autocar – an American manufacturer of severe-duty, cab-over-engine vocational trucks, will introduce the X12 in their ACX® model.

“With its best-in-class power-to-weight ratio, Cummins believes

that the X12 engine will be well suited to address the needs of the refuse market as well as other weight sensitive vocational applications,” said Brett Merritt, Vice President – Cummins On-Highway Engine Business. “Autocar is a key player in the North America refuse market and this introduction will further our current collaboration across diesel and natural gas platforms.”

To meet customer needs, the Cummins X12 boasts a remarkably low engine weight of 2,050 pounds that doesn’t compromise on durability or performance. Delivering up to 500 horsepower (373 kW), the X12 has the highest power-to-weight ratio of any comparable engine in the market. Haulers specifically with the Autocar ACX powered by the X12 engine will see a significant weight savings of 733 pounds versus Cummins’ previous 12-liter engine. That’s 733 pounds more payload available.

“Autocar is focused on bringing innovations to the market with real, tangible benefits to our customers,” said Jim Johnston, President of Autocar. “This new engine puts more cash in our customers’ pockets, plain and simple. We’re gratified that Cummins trusts us to bring the X12 engine to the refuse market first.”

The X12 uses the latest Single Module™ aftertreatment system, which takes up to 60 percent less space and weighs up to 40 percent less than prior aftertreatment configurations. Combined engine and aftertreatment weight for the X12 is around 2,240 pounds – considerably lower than that of any other heavy-duty system.

“Built around improved uptime and reliability, the X12 will be in prime position to support

Autocar's vision of 'Always Up@,'" Merritt said.

The X12 will be available in Autocar's ACX starting in the fourth quarter of 2018.

About Cummins Inc.

Cummins Inc., a global power leader, is a corporation of complementary business segments that design, manufacture, distribute and service a broad portfolio of power solutions. The company's products range from diesel and natural gas engines to hybrid and electric platforms, as well as related technologies, including battery systems, fuel systems, controls, air handling, filtration, emission solutions and electrical power generation systems. Headquartered in Columbus, Indiana (U.S.A.), since its founding in 1919, Cummins currently employs approximately 58,600 people committed to powering a more prosperous world. Cummins serves customers in about 190 countries and territories through a network of some 500 company-owned and independent distributor locations and approximately 7,500 dealer locations. Cummins earned about \$1 billion on sales of \$20.4 billion in 2017. Press releases can be found on the Web at www.cummins.com. About Autocar

Autocar® is the oldest motor vehicle brand in the United States and built America's first truck, in 1899. Focused on purpose-built trucks from the very beginning, today Autocar is the leading American manufacturer dedicated to severe-duty cab-over-engine trucks. Autocar has strong and growing positions in the markets for biggest, baddest trucks on the road, such as Class 8 refuse and recycling trucks, concrete pump trucks, terminal tractors, and other severe-duty vocational applications. A proudly American-owned company, Autocar builds trucks in Hagerstown, Indiana and Birmingham, Alabama and is affiliated with GVW Group, based in Highland Park, Illinois. www.AutocarTruck.com.
