Safe Harbor Statement

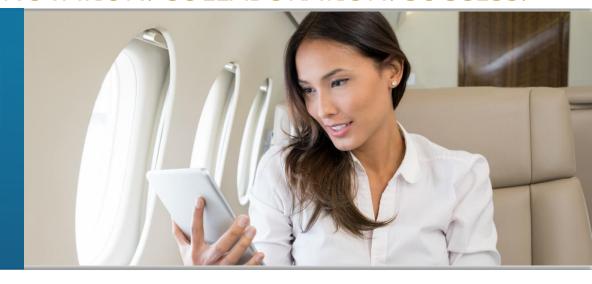

These slides (and the accompanying oral discussion) contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements involve known and unknown risks, uncertainties, and other factors that could cause the actual results of the Company to differ materially from the results expressed or implied by such statements, including general economic and business conditions, conditions affecting the industries served by the Company and its subsidiaries, conditions affecting the Company's customers and suppliers, competitor responses to the Company's products and services, the overall market acceptance of such products and services, the effect of the Company's strategy, and other factors disclosed in the Company's periodic reports filed with the Securities and Exchange Commission. Consequently, such forward-looking statements should be regarded as the Company's current plans, estimates, and beliefs. The Company does not undertake and specifically declines any obligation to publicly release the results of any revisions to these forward-looking statements that may be made to reflect any future events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Astronics Corporation (Nasdaq: ATRO)

INNOVATION. COLLABORATION. SUCCESS.

We work side-by-side with customers, integrating our array of power, connectivity, lighting, structure, interior, and test technologies to solve complex challenges.

Market Cap	\$1.2 billion
Recent Price	\$43.76
52-Week Range	\$26.39-\$49.45
Average Daily Volume (3 mos.)	101,620

Shares Out	28.1 million
Shares Out	
Institutional ownership	72%
Insider ownership	14%
Index membership	Russell 3000®/2000®
IPO	1972

Two Business Segments

Aerospace

- » Electrical Power and Motion (EP&M)
- » Lighting and Safety (L&S)
- » Avionics (Connectivity & Data)
- » Systems Certification
- » Structures

Test Systems

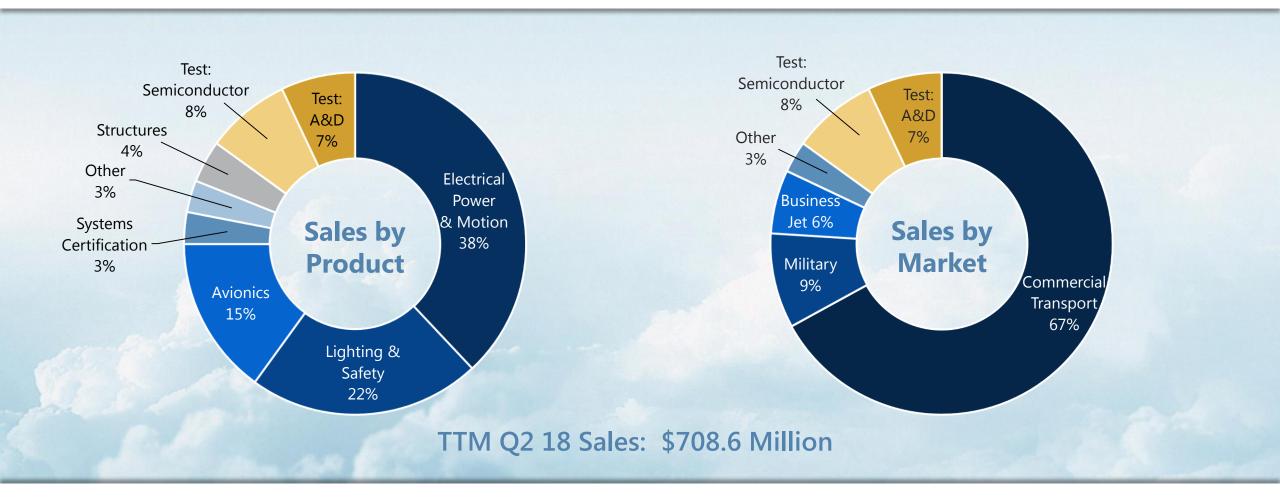

- » Semiconductor
- » Aerospace & Defense

^{*} Guidance provided as of August 3, 2018. Segment sales tally may differ due to rounding.

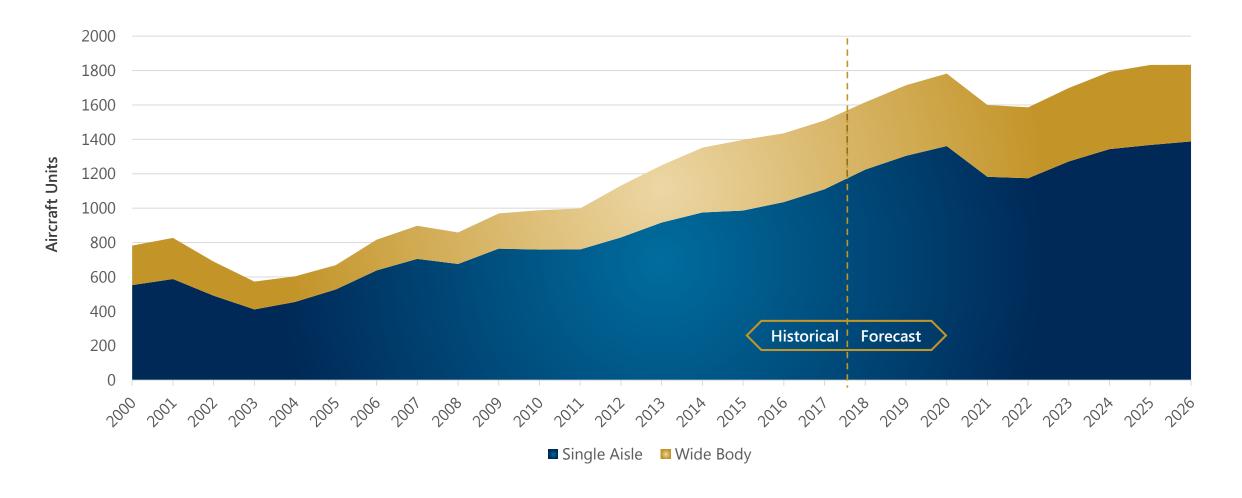

Sales by Product and Market

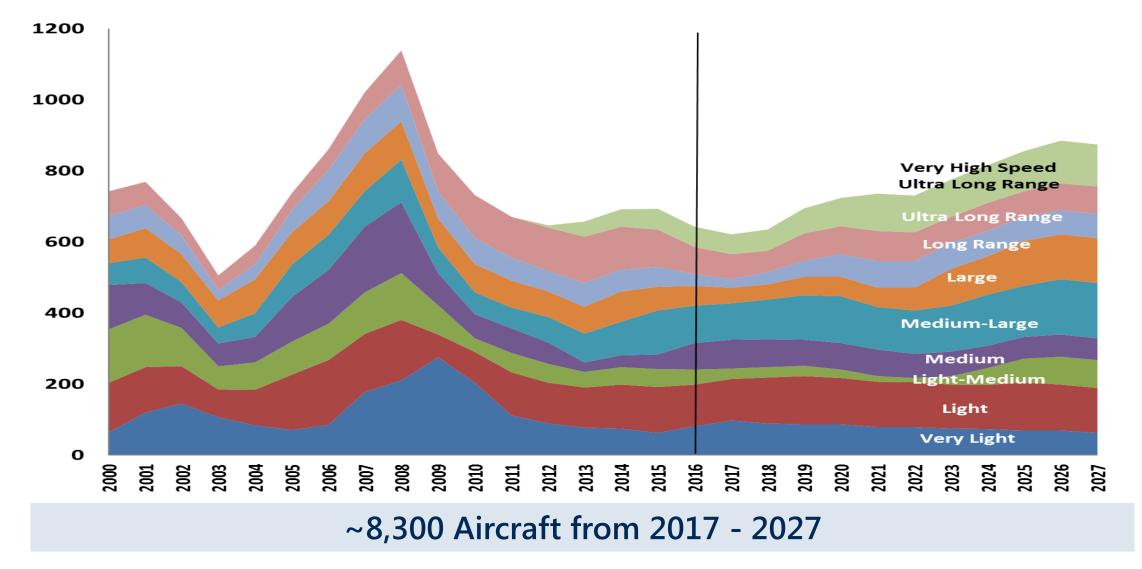

Commercial Transport Delivery Forecast

Business Jet Delivery Forecast

Products & Solutions

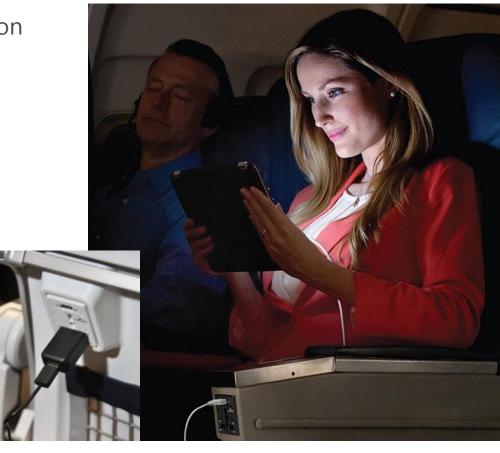

Power and Motion

In-Seat Power Supply (ISPS)

- » In-seat power, line-fit and retrofit, now powering 1 million+ seats on over 230 airlines worldwide
- » IFE power supplier to Thales, Panasonic, and Zodiac
- » ASP: \$750-\$850 per seat
- » Currently 90%+ market share in growing market of seat power worldwide
- » Large growth opportunity with narrow body adoption

Power and Motion

Establishing leadership in airframe power

Solid-state power distribution systems replace extensive wiring and traditional electromechanical components with modular electronics and software

» Intelligent systems for power generation, distribution and conversion

- » Increased reliability
- » Reduced weight
- » Automation, flexibility
- » Lower life cycle cost
- » Reduces pilot work load

Wins:

- » DAHER TBM 900
- » Bell 505, 525 & V280
- » Pilatus PC-24
- » Cessna Denali

Connectivity & Data

Connectivity Systems, Antennas and Databus Solutions

- » Acquired Telefonix in December 2017 for \$104 million
 - Leader in cord reels; provides connectivity hardware: Wireless access points, Servers and controls
- » Complete IFEC solution:
 - Connectivity hardware, installation design and integration engineering
 - Certification services
- » Satellite-based broadband
 - Ku-band: leading technology, lower cost, flexible applications, efficient, upgrading
 - Suited for commercial, business, VVIP, and military aircraft applications
- » Data interface solutions
 - Aircraft Interface Device (AID): translation devices that enable varying system protocols to communicate
 - > webFB: Wireless Electronic Flight Bag

The Executive Aircraft

Combined capabilities: IFE for VVIP*

- » Large private and government jets
- » \$1 million to \$10 million per install
- » UHD Media Center: first aeronautical player with 4K Ultra HD technology

*In flight entertainment for Very, Very Important People

Lighting & Safety

Serving commercial, business jet and military

Passenger Service Units (PSUs)

- » 777/777X approximately \$240K* in content (PSUs, fuel access doors, exterior lighting)
- » 737 approximately \$115K* in content (BSI PSUs, fuel access doors, exterior lighting)
- » 787 approximately \$45K* in content (fuel access doors)
- » 747 approximately \$30K* in content (PSUs, fuel access doors)
- » Embraer E2 (PSUs, emergency lights)

» Exterior Lighting Systems

» Cabin Lighting Systems

» Cockpit Lighting Systems

Aerospace Segment

Well Positioned on Wide Range of High Profile Next-Gen Aircraft

CURRENT

NEXT GENERATION

Embraer Phenom 100/300

Exterior lighting

UH-60 Blackhawk

Exterior cockpit lighting

V-22 Osprey

Cabin, cockpit & exterior lighting

Cessna

Exterior & cockpit lighting

Airbus A380

Cabin lighting & cabin electronics

Boeing 787

Passenger power & fuel doors

Boeing 737 NG & BSI

PSU, fuel doors & passenger power available

F-35 JSF

Exterior lighting suite & lighting controllers

Pilatus PC-24

Airframe power & induction starter generator

Boeing 777X

PSU & fuel doors

737MAX

Exterior lighting system & PSU

Airbus 350

Emergency egress lighting & passenger power

Embraer E2

Interior and exterior emergency lighting system & PSU

Cessna Denali

Induction starter generator, electronic circuit breakers & passenger power

Bell 505, 525 & V280

Airframe power

Test Systems

Aerospace & Defense and Semiconductor Testing

A&D test instruments, automated test systems, and training and simulations systems

- » Integrated logistics support
- » Validate operating performance on multiple top-priority defense communications and weapons systems platforms

Expanding test instrument business with next-gen PXI platform offerings

Next-gen radio test set that combines 16+ field test capabilities in one device

Semiconductor: supporting the largest smart device ramps in history

- » Shortened time to volume
- » Reduced cost of test
- » Innovative test solutions
- » Flexibility
- » Scalability

The new ATS 5034 SLT Platform delivers a high throughput and low cost of test for testing semiconductor devices at the system level.
