## Astronics Awarded Additional Follow-on Inflight Connectivity Equipment Order from Collins Aerospace

### *Supports Strong Increase in Business Jet Connectivity Demand*

EAST AURORA, NY, September 28, 2021 – [Astronics Corporation](#) (Nasdaq: ATRO), a leading provider of advanced technologies for global aerospace, defense and other mission critical industries, announced today it was awarded a \$19 million order from Collins Aerospace (“Collins”) for business jet connectivity equipment to be delivered in 2022. The order is a follow-on to the approximately \$11 million order announced in February 2021.

The growing fleet employing Collins’ system is building customer recognition and confirming that LuxStream provides unparalleled high-speed world-wide connectivity that delivers a broad variety of remote conferencing services and streaming entertainment.

“We are excited to support the growing success of the Collins Aerospace Ku-band connectivity service,” said Michael Kuehn, Astronics CSC President. “We believe this order validates the continued success of Collins’ connectivity services and the performance of Astronics’ connectivity hardware. Astronics is committed to developing and producing the best connectivity hardware for airborne platforms.”

## Safe Harbor Statement

This news release contains forward-looking statements as defined by the Securities Exchange Act of 1934. One can identify these forward-looking statements by the use of the words “expect,” “anticipate,” “plan,” “may,” “will,” “estimate” or other similar expressions and include all statements with the demand in business jet connectivity services, customer response to the connectivity service, and the performance of the Company’s connectivity hardware. Because such statements apply to future events, they are subject to risks and uncertainties that could cause actual results to differ materially from those contemplated by the statements. Important factors that could cause actual results to differ materially from what may be stated here include the impact of a global pandemic and governmental and other actions taken in response, trend in growth with passenger power and connectivity on airplanes, the state of the aerospace and defense industries, the market acceptance of newly developed products, internal production capabilities, the timing of orders received, the status of customer certification processes and delivery schedules, the demand for and market acceptance of new or existing aircraft which contain the Company’s products, the need for new and advanced test and simulation equipment, customer preferences and relationships, and other factors which are described in filings by Astronics with the Securities and Exchange Commission. The Company assumes no obligation to update forward-looking information in this news release whether to reflect changed assumptions, the occurrence of unanticipated events or changes in future operating results, financial conditions or prospects, or otherwise.
