## **(1) Non-GAAP Financial Measures**

“Adjusted revenues” excludes the effect of purchase accounting on the fair value of acquired deferred revenue. Under GAAP, we record at fair value the acquired deferred revenue for contracts in effect at the time the entities were acquired. Consequently, revenue related to acquired entities for periods subsequent to the acquisition does not reflect the full amount of revenue that would have been recorded by these entities had they remained stand-alone entities.

“Adjusted net revenues” represents adjusted revenues less asset-based cost of revenues. Under GAAP, we are required to recognize as revenue certain fees paid to investment managers and other third parties needed for implementation of investment solutions included in our assets under management. Those fees also are required to be recorded as cost of revenues. This non-GAAP metric presents adjusted revenues without such fees included, as they have no impact on our profitability.

Adjusted revenues and Adjusted net revenues have limitations as financial measures, should be considered as supplemental in nature and are not meant as a substitute for revenue prepared in accordance with GAAP.

“Adjusted EBITDA” represents net income before deferred revenue fair value adjustment, interest income, interest expense, accretion on contingent consideration and purchase liability, income tax provision (benefit), depreciation and amortization, non-cash compensation expense, restructuring charges and transaction costs, severance, fair market value adjustment on contingent consideration liability, litigation and regulatory related expenses, foreign currency, non-income tax expense adjustment, gain on acquisition of equity method investment, loss allocation from equity method investments and (income) loss attributable to non-controlling interest.

“Adjusted net income” represents net income before deferred revenue fair value adjustment, accretion on contingent consideration and purchase liability, non-cash interest expense, non-cash compensation expense, restructuring charges and transaction costs, severance, fair market value adjustment on contingent consideration liability, amortization of acquired intangibles, litigation and regulatory related expenses, foreign currency, non-income tax expense adjustment, gain on acquisition of equity method investment, loss allocation from equity method investments and (income) loss attributable to non-controlling interest. Reconciling items are presented gross of tax, and a normalized tax rate is applied to the total of all reconciling items to arrive at adjusted net income. The normalized tax rate is based solely on the estimated blended statutory income tax rates in the jurisdictions in which we operate. We monitor the normalized tax rate based on events or trends that could materially impact the rate, including tax legislation changes and changes in the geographic mix of our operations.

“Adjusted net income per diluted share” represents adjusted net income attributable to common stockholders divided by the diluted number of weighted-average shares outstanding.

See reconciliation of Non-GAAP Financial Measures on pages 9-14 of this press release. Reconciliations are not provided for guidance on such measures as the Company is unable to predict the amounts to be adjusted, such as the GAAP tax provision. The Company’s Non-

GAAP Financial Measures should not be viewed as a substitute for revenues, net income or net income per share determined in accordance with GAAP.
